JUNE, 1970

Summer Sports Program Begins Second Year

The NCAA, approximately 100 colleges and universities and the Federal Government will join again this summer to provide a summer sports program for about 40,000 youngsters from America's poverty areas.

The National Summer Youth Sports Program is designed to expose the young participants to opportunity in education, careers and sports. It will provide instruction in sports; sports competition; daily, nourishing meals; medical examinations and attention; liability insurance; and classroom instruction covering good health habits and employment and educational opportunities for inner-city boys and girls, ages 10 to 18.

The NCAA will administer the program. The Federal Government will contribute \$3 million, while the participating institutions are expected to nearly match the government's figure with an estimated \$2.5 million expenditure. The NCAA probably will spend \$50,000 for the Program's administration and promotion.

The President's Council on Physical Fitness and Sports, headed by Captain James A. Lovell, Jr., will supervise the Program for the Federal Government.

Finch Announces Program

HEW Secretary Robert H. Finch, in announcing the Program, said, "Our goal is to help equip inner-city youth with new skills and with a broader perspective on the employment and educational opportunities available to them. We think the regular association with college athletes, many of them from the inner city themselves, plus the exposure to a college campus, will widen their interests and their horizons."

The youngsters, at least 90 per cent of whom must be from financially disadvantaged homes, will receive at least two hours of sports instruction and competition daily, plus 30 minutes of classroom instruction concerning employment, study and career opportunities.

The institutions' student-athletes, varsity coaches, physical education instructors and other qualified supervisors in sports instruction and competition, plus other faculty members and community leaders, will staff the NSYSP programs.

Besides the benefits of the Program to the inner-city young, over 1,200 coaching and supervisory jobs will be available for other residents of the target areas. Further, through the NSYSP, colleges and universities will be given the opportunity to participate more fully in community life and help solve community problems.

Ninety-seven colleges, universities and junior colleges, which have volunteered the use of their facilities and equipment, had been invited to participate in the Summer Program at press time. The NSYSP began

Photographed in the NCAA executive office before the press conference at which the 1970 National Summer Youth Sports Program was announced are (from left to right) NCAA Director of Sports Development James H. Wilkinson; V. L. Nicholson, director of sports promotion for the President's Council on Physical Fitness and Sports; and Captain James A. Lovell, Jr., special consultant to the President for physical fitness and sports.

June 1 and will continue until August 29. These institutions will contribute \$2.5 million to the program by providing their swimming pools, gymnasiums and playing fields, plus project directors and other supportive services without charge.

The NCAA will bear the expenses of a national headquarters staff and other administrative services (legal services, printing, travel, etc.). The

Federal funds will cover the cost of meals, staff salaries and wages, medical examinations, transportation, insurance and expendable equipment and supplies.

54 Cities Included

The Program will serve 54 cities in 29 states and the District of Columbia.

Individual projects will operate a minimum of five weeks, five days a

week, or six weeks, four days a week. Maximum project length is eight weeks. Each project must maintain an average daily attendance of at least 200 youths.

The institutions participating were selected on the basis of city size, numbers of poor in the city's population and the quality of the project proposed by the institution.

STUDENT-ATHLETES WILL VISIT VIETNAM

Eight outstanding student-athletes from NCAA member institutions, a well-known basketball coach and a member of the NCAA staff will visit American military personnel at outposts in Vietnam and Pacific-area military hospitals this summer.

The tour is being arranged and sponsored by the Department of Defense in cooperation with the NCAA for a two-fold purpose.

The NCAA proposed the program with the hope that the student-athletes participating would be able to contribute to good morale by personally showing their appreciation for the servicemen's sacrifices and by screening highlights films for the troops' entertainment.

The Association also hopes the athletes will be able, through personal contact, to give GI's an insight into and a favorable image of campus life, and can convince them to utilize the educational benefits of the GI Bill upon their discharge.

The Department of Defense was particularly responsive to the idea

of the tour because, in encouraging GI's to consider attending college, the group's efforts will augment the Department's program to promote use of the recently increased educational benefits of the GI Bill.

Two Separate Units

The 10 tour participants will be separated into two units of five each, one heading for Vietnam, the other to military hospitals in other areas of the Pacific. Each group will take along football and basketball highlights films and will distribute institutional mementos, such as pennants and decals, to the servicemen.

The student-athletes chosen to make the trip are:

GROUP I

(Scheduled for a 17-day visit to Pacific-area military hospitals.)

Larry Holliday—basketball forward, the University of Oregon. As a sophomore (1968-69), he ranked second to Lew Alcindor in Pacific-8 rebounding, although standing only 6-3. An injured shoulder hampered

his play during 1969-70, but he expects to be back in action in 1970-71, his senior year. Holliday is from Los Angeles.

Bill Montgomery—Arkansas quarterback. He is rated one of the smartest on-field signal callers in college football. In two seasons, he has rewritten all of Arkansas' passing (3,451 yards) and total offense records. He has led Arkansas to two consecutive Sugar Bowl appearances and performed brilliantly on both occasions. Montgomery's home town is Carrollton, Texas.

Jim Plunkett—quarterback for Stanford. With his senior year remaining, he already has rewritten the Pacific-8 Conference records book. He has completed 339 passes for 4,989 yards and 34 touchdowns. Against Purdue last fall, he gained a total of 416 yards for a single-game high. Plunkett is a native of San Jose, Calif.

Rich Yunkus—6-9 basketball center from Georgia Tech, averaged 30 points per game and ranked 6th

The Editor's View

Committee Seeks Equipment Standards

As related in the story at the top of page five in this issue of the NEWS, the NCAA has been instrumental in the founding of another committee.

Now a good case might be made that the entire world in general—and the NCAA in particular—does not need another committee.

This body, however, appears to be needed badly, and certainly merits some careful examination.

It is called NOCSAE—the National Operating Committee on Standards for Athletic Equipment. Its assignment is to set safety standards for athletic equipment, particularly that which is used in high-contact competitive sports.

The creation of this organization does not suggest that the responsible equipment manufacturers who have engaged in research and developed improved equipment for many years have been derelict to any degree.

A Central Depository

Rather, there exists a need legally for determination of minimum safety standards for various forms of equipment, and even more important, it is essential that a central depository be created for the analysis and evaluation of research being conducted on athletic injuries and on protective equipment.

NOCSAE will appraise research and determine its validity and eventually set minimum standards which key protective equipment must meet to be certified.

All equipment which meets the standards established will be certified. The goal is improved gear and increased safety, not to select one official helmet or chest protector.

Similarly, membership in NOCSAE will be open to any qualified group wishing to apply. The initial fee asked of any member is \$100 for Committee expense.

The charter membership includes the NCAA, the National Federation of State High School Athletic Associations; the Athletic Goods Manufacturers Association; and the American College Health Association.

It will take patience, care and diligence to reach NOCSAE's important goals. The results will be greater safety and fewer injuries, which more than justify undertaking the problems.

NCAA to Conduct Vietnam Tour

Continued from page 1

among college scorers last season. He is a two-time Academic All-America, with a 3.5 grade point average in industrial management. Born in Omaha, Neb., Yunkus now calls Benton, Ill., his home town.

GROUP 2

(Scheduled for a 17-day visit to Vietnam.)

Larry DiNardo—co-captain of the 1970 Notre Dame football team and an All-America offensive guard. He has started for the Irish since he was a sophomore in 1968 and logged the most playing time (313 minutes) of any Notre Dame player last fall. He is an Academic All-America, majoring in government, from Queens, N. Y.

Mel Gray—two-sport great at Missouri. All-Big Eight end. Great speed enabled him to score 10 touchdowns and grab 26 passes good for 705 yards for the Tigers last fall. Voted outstanding performer in the 1970 Big Eight track championships after winning the 100- and 220-yard dashes in record time (9.3 and 20.4). He has run a wind-aided 9.1 hundred. Gray's home town is Santa Rosa, Calif.

Scott Henderson—co-captain of defending national champion University of Texas Longhorns. He has been a starting linebacker for two seasons on the quick-hitting Texas defensive unit. He also has made the Academic All-America team for two years. Henderson hails from Dallas.

Scott Hunter—may become the greatest passer in Alabama history. He established six records as a sophomore and added 15 more in his junior year. He connected on 58.6 per cent of his passes in 1969, including 22 of 29 in last fall's classic 33-32 win over Mississippi. An Aca-

demic All-America, Hunter is from Prichard, Ala. (suburb of Mobile).

Accompanying the first group will be Fred Taylor, Ohio State's highly regarded basketball coach. He has guided the Buckeyes to six Big Ten championships and a first, two seconds and a third place finish in the National Collegiate Basketball Championship during his 12-year career.

Chuck Neinas, NCAA assistant executive director, will participate in the Vietnam tour. He has been involved in the general administration of the NCAA for nine years.

NCAA Permits Baseball Play On Sunday

Sunday play in the National Collegiate Baseball Championship—the College World Series—will be permitted as a result of action taken by the Association's Executive Committee at its spring meeting.

The College World Series will be conducted June 12-18/19 at Omaha, Neb. It matches the winners of competition in each of the NCAA's eight districts.

Previously, Sunday play was permitted only in cases where a game scheduled for another day was rained out. Now games may be scheduled for that day of the week, although they must begin after 12 noon.

One additional qualification on Sunday play was established. If an institution's policy does not permit its team to compete on Sunday, it may request that its game be moved from that day.

INTERPRETATIONS

Situation: Two institutions plan to conduct an intrasquad basketball game following the close of their regular seasons. The plan would be for one team to be made up of those student-athletes (from both institutions) who have completed their eligibility and the other team to be made up of student-athletes (from both institutions) who have eligibility remaining. The game or contest would be played prior to the playing of the final game of the National Collegiate Basketball Championship. There would be no practice(s) prior to the playing of the game.

Question: Is such a contest permissible under present NCAA legislation?

Answer: No. The game would be considered as postseason practice. [Bylaw 8-2-(b)-O.I. 182]

Situation: An institution wishes to award financial aid to student-athletes through the actions of a committee made up of faculty members or perhaps a committee composed of faculty and students. Conceivably, the committee could be the institution's faculty committee on athletics and the athletic department could be represented on that group. As far as award of financial assistance is concerned, the committee's administration would not extend beyond the realm of athletics.

Question: Can such a committee properly function within the framework of NCAA legislation?

Answer: No. Under present legislation, financial assistance to student-athletes must be administered by the institution's committee or agency which administers financial aid to students generally. [NCAA Constitution 3-4-(a)-O.I. 40]

Situation: A member (with eligibility remaining) of Institution A's football (or basketball) squad desires to serve as a counselor in a specialized sports camp conducted by a coach of Institution B.

Question: May the student-athlete described above serve as a counselor in the specialized sports camp?

Answer: Yes; however, not more than one member with eligibility remaining from Institution A's football (or basketball) squad may be so employed. [NCAA Constitution 3-1-O.I. 16 and NCAA Bylaw 8-2-O.I. 186]

Situation: An outside organization or individual plans to utilize as counselors several members of an institution's basketball or football squads (with eligibility remaining) in a specialized sports camp.

Question A: May these student-athletes be utilized as counselors without constituting out-of-season practice?

Answer A: No. Only one such member of the basketball or football squad may be so employed. [NCAA Bylaw 8-2-O.I. 186]

Question B: May a student-athlete's name or picture be used to promote or publicize the camp?

Answer B: No. A student-athlete of an NCAA member institution may be listed as a staff member of the camp, but his name or picture may not be used to advertise or promote the camp. [NCAA Constitution 3-1-O.I. 21 and May 24, 1968, Report to Membership.]

Situation: A member institution has been offered money by a professional sports organization on the basis that either the money will be placed in the institution's general fund and credited to the athletic department for an unspecified purpose, or the money will not be earmarked by the donor for any specific use, but is to be credited to institutional funds for financial assistance to student-athletes generally.

Question: Would NCAA legislation permit the member institution [in either instance] to accept and utilize such funds for awards to student-athletes?

Answer: No. [NCAA Constitution 3-1-O.I. 11]

Situation: A member institution supports one or more regional campuses. These are not junior colleges but two-year institutions which administratively and educationally are an integral part of the parent four-year institution. The students transfer at the conclusion of two years to the parent institution (or any other institution). The two-year institutions conduct athletic programs.

Question: Would the student-athletes transferring from the two-year institution to an NCAA member (other than the parent institution) be considered as immediately eligible for NCAA events if they meet the conditions of the Association's present junior college rule?

Answer: No. They would be considered as transfers from a four-year collegiate institution and required to establish a one-year's residence at the certifying institution before becoming eligible for NCAA-sponsored events. [NCAA Bylaw 4-1-(d)]

1970 Olympic Track Program Begins July 13

The United States Olympic Committee has announced that application forms are now available for the 1970 Olympic summer track and field training program.

The training will be conducted by some of America's most outstanding coaches during the three-week period beginning July 13.

With an eye on the 1972 Olympic Summer Games to be held in Munich, top U.S. performers will be gathered at each of the following six sites in accordance with their particular events for intensive training and head-to-head competition:

University of Colorado — Walks and Decathlon;

Dartmouth College — Throwing and Weight Events;

University of Michigan — Jumping Events and Pole Vault;

University of Oregon — Middle Distance Running Events and Intermediate Hurdles;

San Diego State College—Sprints and High Hurdles;

Washington State University — Long Distance Running.

The program is designed to speed up improvement by all athletes as well as to provide Olympic officials with an idea of top prospects.

Athletes interested in participating in this in-depth training program, must apply to the USOC for acceptance. Necessary forms may be obtained at the site of any national track and field championships, from members of the Olympic men's track and field committee or directly from team preparation chairman George Wilson, 707 East Broad Street, Falls Church, Va. 22046.

EXECUTIVE COMMITTEE

Championship Events Actions Reported

Several changes in championship event administrative arrangements were voted and several committee recommendations denied by the NCAA Executive Committee at its recent spring meeting.

Four actions in gymnastics—in addition to dropping trampoline as a National Collegiate Championships—top the moves.

The Pacific Coast Athletic Association and the Academic Athletic Conference of Midwest Universities were granted automatic qualification for the 1971 Gymnastics Championships.

Also beginning in 1971, there shall be three All-around competitors and two specialists competing for the institutions involved in the team championship competition. Previously there have been two All-around entrants and three specialists.

Two requests by the Gymnastics Rules and Meet Committee were denied by the Executive Committee.

Foreign Competitors OK

The first was a request to hold the

National Collegiate and National College Division Championships on the same weekend. The second was a recommendation to prohibit foreign athletes from competing in the Championships.

Another request denied was that of the Ice Hockey Rules and Tournament Committee that only officials who are members of the National Ice Hockey Officials Association be selected to officiate intercollegiate contests and the National Collegiate Championship.

Instead, the Executive Committee voted that the Committee be instructed not to consider organizational affiliation in the selection of officials for the Championship, and that officials shall be judged solely on merit and ability.

In connection with the newly adopted district qualification tournaments in wrestling, the Executive Committee voted that no awards would be presented to either individual athletes or teams based upon performance in the district meets.

The use of a Thursday-Saturday format for regional tournament play

in the National College Division Basketball Championship when such would prove desirable and in the best interests of the Tournament was authorized.

Finally, amendment of Executive Regulations 2-14 and 2-15 was voted to permit one commercial message for a beer to be inserted during a non-playing period in the broadcasts and telecasts of NCAA Championship events. Exact language for the revision will be reviewed at the Executive Committee's August meeting.

Association To Pay Cost Of Awards

The costs of awards for 10 NCAA championship events which normally incur a deficit will be assumed by the Association, the Executive Committee has decided.

The action came at the spring meeting of the 10-man body which governs Association finances and manages its meets and tournaments.

Endorsed in principle was a proposal that the NCAA establish a promotional allowance for these events with a goal of increasing meet revenues.

The events included are five National Collegiate Championships—cross country, fencing, golf, skiing and tennis—and five National College Division Championships—cross country, golf, gymnastics, tennis and track and field.

Currently, host institutions for these events are reluctant to spend money for promotion for fear it will not be recovered in additional income. Creation of the promotional allowance will eliminate that risk for the hosts, while providing greater exposure for the meets.

Concerning the awards, the Association will henceforth provide both team and individual awards as currently authorized for those events.

In a separate action, the Executive Committee voted to absorb the cost of game officials and awards for the six College Division Regional Football Championships. Previously they have been charged as game expense, with the charges therefor applied against the monies to be shared by the participating teams and the sponsoring agencies.

Possible Record In Ticket Sales

Has Union University, Jackson, Tenn., set an NCAA record with its sale of 600 season baseball tickets this year?

The feat is especially noteworthy because this is the first year in the institution's history that admission has been charged to baseball games.

In addition, students, faculty, staff and their dependents are admitted free to all athletic contests, so they are not included in the total of 600.

Per Diem Raised

The NCAA per diem allowance paid individuals traveling on Association business has been raised from \$25 to \$30 by the Executive Committee.

The change is effective when the Association's next fiscal year begins, September 1, 1970.

The per diem was raised from \$20 to \$25 for the current year, but still proved inadequate to meet rising costs, particularly of hotel rooms and meals.

VOLLEYBALL CROWN GOES TO UCLA

Los Angeles, Calif.—UCLA's Pauley Pavilion has become the home of two NCAA Championship teams. The Bruin basketball team, of course, was the first, but now the volleyball team, playing in the same arena, has taken the first National Collegiate Volleyball Championship.

Coach Al Scates' team demolished Cal State Long Beach in the final match 15-7, 15-4, 15-8 to take the title. Also falling to the impressive Bruins along the way were the University of California, Santa Barbara, and Ball State.

Santa Barbara defeated Ball State for third place in the two-day tournament that was attended by 5,000 fans at UCLA's facility.

The Bruins were undefeated in five matches, losing one set to Long Beach, 13-15, in the seeding round.

The previous week, Long Beach had taken the regional championship, but UCLA was high for the finals.

Three of the Bruins made the All-Tournament team: Dane Holtzman, Kirk Kilgour and Ed Becker. Long Beach placed Dodge Parker and Craig Frole on the team, and Tom Boynge of Santa Barbara also was honored. Holtzman received the greatest number of votes for the Outstanding Player designation.

The results:

Round Robin (for seeding purposes only): UCLA (3-0), defeated UCSB, 15-6, 15-10; defeated Ball State, 15-4, 15-6; and defeated CSLB, 15-12, 13-15, 15-2. CSLB (2-1), defeated Ball State, 15-11, 17-15; defeated UCSB, 15-9, 15-10; and lost to UCLA. Ball State (1-2), lost to CSLB, lost to UCLA and defeated UCSB, 15-9, 5-15, 15-13. UCSB (0-3), lost to UCLA, lost to UCSB and lost to Ball State.

In first round of championships, UCLA defeated UCSB, 15-10, 15-13, 15-8, and CSLB defeated Ball State, 16-14, 6-15, 15-10, 15-6. UCSB defeated Ball State, 15-4, 15-4, for third place and UCLA defeated CSLB, 15-7, 15-4, 15-8 for championship.

Dick Phelps, 28-year-old assistant coach at Pennsylvania, has been named head coach of basketball at Fordham. Phelps has been at Penn for four years. He succeeds Ed Conlin at Fordham.

Wayne Shaw is returning to Cal Poly SLO as sports information director after spending a year as assistant SID at Indiana. Shaw had previously been in the position at Cal Poly on an interim basis.

Cal State Long Beach's Bill Imwalle attempts to spike the ball past the blocks of UCLA's Ed Becker, 14, and Eddie Machado during action in the finals of the National Collegiate Volleyball Championship at UCLA's Pauley Pavilion.

THE CONFERENCES—Missouri Valley Realigns

The Missouri Valley Conference has announced an expansion plan calling for an increase in membership to as many as 12 schools, possibly within the next two years.

The proposal also provides for two geographic divisions in basketball (six teams in each) and a single eight-team alignment in football. No specific deadline was set, but it is hoped divisional play in basketball can begin with the 1972-73 season.

The new arrangement is viewed as an answer to two of MVC's fundamental problems—the wide geographic disbursement of its membership and differences in athletic program emphasis by member institutions.

In basketball, teams will play each other twice within their own division and possibly compete in one round of inter-divisional play. At the close of each season the MVC champion, which is also its National Collegiate Basketball Tournament representative, will be determined by a four-team tournament involving both division champions and the runnersup.

The conference's football program also will be enhanced by virtue of its increase to at least eight institutions playing for the league championship. One major benefit will come from increased television exposure wherein the MVC will gain more appearances as provided for in the NCAA television program.

Currently only five members compete for the Valley title on the gridiron. Drake will join the race in 1973, or as soon as scheduling permits. Out of the four vacancies which are opened by the expansion plan, two must be filled with institutions which can contribute to the conference programs in both football and basketball. The remaining two positions will be filled with institutions which will contribute to the basketball alignment.

The league's faculty representatives emphasized that simultaneous improvement in both football and basketball was a primary objective of the expansion plan.

Commissioner DeWitt Weaver said that the screening process for prospective member institutions would begin almost immediately. "We are presently processing a formal application from West Texas State University," Weaver said. "It is in its final stages now and a decision will almost certainly be reached sometime this summer, perhaps very early. Our search for members who can contribute to this plan will be diligent and preliminary steps will be taken very soon."

* * *

The curtain has fallen on the Interstate Intercollegiate Athletic Conference, a historic league that traced its beginning to a 1908 track and field meet.

It disbanded at the end of the 1969-70 academic year.

At one time the IIAC was a robust league that claimed most of the Illinois institutions of higher education. It was nicknamed the "Little Nineteen," but in 1928 had a membership of 23 schools.

The membership had dwindled to four schools in 1969—Central Michigan, Eastern Illinois, Illinois State and Western Illinois. Illinois State has joined a new loop, the Academic Athletic Conference of Midwestern Universities, and the other three schools have discarded a formal relationship.

Former Illinois State track coach Joe Cogdal, associated with the IIAC for 43 years of its 62-year history, notes that the league had roots in the 1870's, when a number of schools banded together for oratorical contests. Their first intercollegiate football game was played in 1881 between Illinois State and Knox College, and by 1894 a football association was established.

Formed in 1908

The IIAC was formed in 1908, with eight charter members—Illinois State, Illinois Wesleyan, Bradley, Millikin, Monmouth, Knox, Lombard and Illinois College.

The first track meet was held on May 22, 1908. Amos Alonzo Stagg was the referee, and George Huff the starter.

The group quickly expanded. Eastern Illinois and Western Illinois joined in 1912 and 1915, respectively.

In 1920, the name Illinois Intercollegiate Athletic Conference was adopted—providing the present-day initials of IIAC.

Conference membership reached a peak of 23 member schools in 1928, when virtually all of the small colleges in Illinois were included.

Private schools withdrew during much of the 1930's, until in 1942 only the five state schools remained—Illinois State, Eastern Illinois, Northern Illinois, Southern Illinois and Western Illinois.

Interstate Conference

In 1950, the league name became the Interstate Intercollegiate Athletic Conference, when Central Michigan and Eastern Michigan brought the membership to seven.

In 1961, Eastern Michigan and Southern Illinois withdrew. Northern Illinois followed in 1966.

The conference had only four commissioners. C. W. Whitten of the State High School Association served from 1928-32. He was followed by William T. Harmon of Illinois College, 1932-37; Clifford E. Horton of Illinois State, 1937-66; and Dempsey E. Reid of Western Illinois, 1966 to present.

Harold Smolinski, head of the accounting department at Louisiana Tech, has been named president of the Gulf States Conference for the 1970-71 school year.

Also named as officers for the coming year are Marcus Mapp of Northeast Louisiana State College, vice-president and president-elect; and Dr. Drayton Lewis of the University of Southwestern Louisiana, re-elected secretary-treasurer.

In taking over the position of GSC president, Smolinski replaces Burt Boyd of Northwestern who served during 1969-70.

Smolinski, who is chairman of the Athletic Council at Louisiana Tech, served during the past year as vice-president and president-elect of the Gulf States Conference.

* * *

Southwest Conference faculty representatives gave basketball a boost at the May meeting in Houston by increasing the number of varsity games conference members are allowed to play from 24 to 26. The SWC also agreed to study a proposal to increase the number of freshman games from 12 to 16; results of the study will be given at the December 1970 meeting in Dallas.

SWC members have shown concern for their basketball program over the last several years. Except for strong SMU teams in the mid 1950's, the SWC has not fared well in NCAA playoffs since Texas and Baylor finished second and third, respectively, in 1947 and '48. Meanwhile, the SWC has become and remained a power in football, baseball, tennis, golf and track.

The SWC did not reinstate the pre-season basketball tournament which was discontinued in the 1950's. Several coaches hailed the decision, saying it would allow them to schedule more attractive interseasonal games.

The SWC track and field schedule also underwent a major change, with the required intra-conference track meets reduced from four to two dates. Two weekends will be reserved for intra-conference meets, freeing teams to participate in other meets. For two of the last three years, SWC schools were not able to compete in the Kansas Relays because of required intra-conference meets. Both years SWC schools had outstanding relay teams. Texas A&M this season won both the 440 and 880 relays at the Texas and Drake Relays, setting a world record of 1:21.7 in the latter at Drake.

* * *

The 51st Annual Southern Conference Basketball Tournament will return to Charlotte, N.C., in 1971 for the eighth consecutive year.

The three-day sports spectacular will be played in the Coliseum on Thursday, Friday and Saturday, March 4, 5 and 6, 1971.

The Tournament will feature a tripleheader on Thursday, with the Conference winner drawing a bye on the opening day. The semi-finals will be held on Friday and the finals on Saturday. The Tournament winner will qualify for a berth in the National Collegiate Basketball Championship.

* * *

Southern Conference Commissioner Lloyd P. Jordan announced that a committee has been appointed to survey existing facilities and those under construction in the three-state area (Virginia, South Carolina and North Carolina) to establish a long-range policy for conference tournament schedules.

NSYSP Funded for Second Year

Continued from page 1

Eighty of the institutions invited to participate in the 1970 Program took part in the first summer sports program in 1969. Seventeen of the colleges, seven cities and six states are new to the Program this year.

Last year's Program, which also involved \$3 million in Federal funds, enrolled 43,020 youths. Average daily attendance for 100 projects in 54 cities was nearly 34,000.

In 1969, the NCAA spent over \$60,000 staffing and servicing the Program. Neither the NCAA nor the institutions are reimbursed for the monies and equipment they donate.

"NSYSP Not Usual Program"

Captain Lovell, when announcing the Program recently, emphasized that the NSYSP is not the usual type of sports program where "big-name athletes go into the ghettos, sign a few autographs, pat the kids on the head and show them how to hold a football or baseball . . . The people in the ghettos . . . know that kind of program really doesn't change their

situation, other than bringing a little momentary excitement into their lives."

The NSYSP will allow participating youngsters to associate daily with and receive in-depth coaching from some of the best athletes and coaches in the world, besides providing nourishing meals, medical treatment and career counseling.

Lovell went on to say that many additional institutions had indicated a willingness to participate, but that not enough government funds had been allocated for everyone to carry on an adequate program in 1970.

"It (the NSYSP conducted on an ever increasing national basis) could do a lot to improve the lives of our needy young people, and it could do a lot to improve our sports development programs," he added.

"We think this is the only way you can help and change youngsters—by giving them the same kind of opportunities and attention most of us are able to provide for our children through our own means."

COMMITTEE TO SET EQUIPMENT STANDARDS IS CREATED

Starting with an April 8 planning meeting in Kansas City, Mo., a foundation has been laid for the National Operating Committee on Standards for Athletic Equipment (NOCSAE), which is designed to propose minimum standards for athletic equipment in sports recognized by one or more of the NOCSAE member sports governing bodies.

Initial Committee members include representatives of the NCAA; the National Federation of State High School Athletic Associations; the National Junior College Athletic Association; the National Athletic Trainers Association; the Athletic Goods Manufacturers Association (an association of leading sporting goods companies) and the American College Health Association.

No qualified group making application will be excluded from membership. Each member organization has been asked to provide \$100 for the

initial expense of the Committee. More money may be requested later for funding research and possibly staff assistance.

Besides the desire for greater safety in competitive athletics, an important reason for the formation of the Committee is the number of lawsuits being contested today based on charges of substandard equipment.

According to Dr. William Combs, a Committee member representing ACHA, "the future of athletics is in jeopardy because of potential lawsuits relating to injuries received in sports."

Imposed Standards

George Killian of NJCAA indicated there was danger of standards being formulated by outside groups lacking professional knowledge and research capabilities.

The Committee's first action is expected to come in the very near future in the area of equipment de-

signed to protect the head and neck. One of the first pieces of equipment to be studied by the NOCSAE is the football helmet.

The Committee will evaluate present research and authorize or conduct additional research in order to establish minimum standards for competitive athletic equipment.

In addition, it will arrange for a testing and certification program to determine that all equipment being manufactured or used by member organizations meets the established standards.

It is the Committee's intention to establish minimum equipment standards as part of the rules of each sport by making recommendations which the rules-making bodies of the various governing organizations might then incorporate into the playing rules.

Steps also are being taken to incorporate the Committee.

At the first regular meeting of NOCSAE, April 28, David Arnold of the NFSHSA was elected chairman; Gerry Morgan, Riddell Sporting Goods, was chosen vice-chairman; and James H. Wilkinson of the NCAA was picked secretary-treasurer.

As the work of the Committee progresses, reports will be made available concerning its findings.

SEATTLE U. JOINS WCAC

Seattle University has joined the West Coast Athletic Conference as a general shifting of alignments by University Division institutions on the Pacific Coast continues.

Seattle has been a strong basketball independent since the early 1950's, and has been a frequent participant in the National Collegiate Basketball Championship.

The Chieftains join Santa Clara, Pepperdine, Nevada Reno, Nevada Las Vegas, University of the Pacific, Loyola, St. Mary's and the University of San Francisco in the WCAC.

The shifting of memberships began with the formation of the Pacific Coast Athletic Conference by former WCAC members San Jose State and UC Santa Barbara, and former California Collegiate Athletic Association members Fresno State, San Diego State, Cal State Long Beach and Cal State Los Angeles.

The WCAC then added the two Nevada institutions, and now reaches a total of nine institutions with the addition of Seattle.

Current CCAA membership includes UC Riverside, Cal State Fullerton, Cal Poly Pomona, Cal Poly San Luis Obispo and San Fernando Valley State.

NOTES and QUOTES

Stewart Way has been named head coach of basketball at Marshall University.

* * *

Gene Bartow has been named head basketball coach at Memphis State. Bartow has been coaching at Valparaiso University. He replaces Hank "Moe" Iba at Memphis.

* * *

District Seven won the "attendance award" at the NCAA's 64th annual Convention in Washington, D.C., with 84.6 per cent of its membership represented.

District One had 69 per cent present and District Two, 66.7 per cent.

Over-all, 64.4 per cent of the NCAA's active members attended the Convention, an increase of 22.7 per cent over the 1960 attendance figures.

A total of 403 active member institutions were represented by one or more delegates.

* * *

Bud Winter, who has spent 29 years as track coach at San Jose State College, has announced his retirement. Winter, 59 years old, will retire at the conclusion of this track season. Winter has coached a large number of world record setters through the years. His San Jose athletes in the 1968 Olympics actually won more gold medals than the entire USSR track team.

Hanneman Runs Hurdles Down

The latest innovation in track and field competition, from the athletes' standpoint, is the style of "Wrong Way" Steve Hanneman, Wittenberg University's champion hurdler.

He recently repeated as the Ohio Conference champion in the 120-yard high hurdles, despite the use of weighted hurdles for the first time in

the Ohio Conference championship event.

For two years Hanneman has been using his peculiar modification of the classic hurdling form. It consists of running the hurdles down by stepping on them, using the sprinter's form of a bent leg instead of the normal hurdler's form of a locked leg

which is extended while clearing the hurdle.

This revolutionary style worked wonders in the 1969 Ohio Conference Track and Field Championships with non-weighted hurdles. Hanneman took the crown with a time of 14.3 seconds, knocking down every hurdle in sight.

This year, the league coaches used weighted hurdles—to even the odds. They were imported from Mount Union College, which owns the only weighted hurdles in the league.

The odds were more than evened—they were against Hanneman who ran for the first time on weighted hurdles at Ashland College a week before the 1970 Championships. There he had difficulty running through the unyielding hurdles and was edged for first place.

Wittenberg's track coach, Ron Murphy, was not about to take this lying down. He had a few tricks up his sleeve—namely "the old door stop trick." He had Hanneman train before the Championships on overweighted hurdles created by attaching two, 15-pound door stops to each hurdle.

Hanneman was equal to the challenge at the Championship meet, edging out George Zeller of Salem for first place. In fact, he didn't stop there. He went on to set a school record in the 440-yard intermediate hurdles the same day while taking a third place with a time of 54.8 seconds.

Membership

Indiana Northern University, University Park, Ind., has been elected to an associate membership in the NCAA, while Biscayne College, Miami, Fla., (Dist. 2) will become active September 1, 1970.

The addition of these institutions, plus the September 1 additions announced in the April issue of the NEWS, raises the NCAA membership to a new high of 732.

By categories, there currently are 635 active members, 32 associates, 40 allied and 25 affiliated members in the Association.

Steve "Wrong Way" Hanneman of Wittenberg University displays his unorthodox bent-leg style of hurdling in which he steps on and knocks down each hurdle in his lane. He has won two Ohio Conference championships in the 120-yard high hurdles.

Iba Named To Coach U.S. Team

Henry Iba of Oklahoma State has been named by the United States Olympic Committee to coach the 1972 Olympic basketball team.

Iba served as head coach of the gold medal-winning United States Olympic teams of 1964 and 1968, and is the only coach who has been tapped for the head coaching post more than once.

Believing Olympic competition will be much tougher, Iba feels "that we must come up with a brand new format in selecting the 1972 USA Olympic team."

After he retires as athletic director at Oklahoma State this month, Iba expects to spend considerable time observing players in all parts of the country in order to select the best players for the Olympic Trials. He also will assist in developing more coaches who are qualified and experienced in international basketball for future Olympic teams.

After 41 years of coaching, Iba's overall record of 776 victories and 338 defeats ranks him behind only Kentucky's Adolph Rupp as the all-time "winningest" college coach.

Gudger to Pan-Am Games

James Gudger of East Texas State University has been named to coach the 1971 U.S. team in the sixth Pan-American Games. He has just completed his first year at East Texas State after a 19-year career at Western Carolina University.

NOTES and QUOTES

Joe Williams, who guided Jacksonville University to the second place in the recent National Collegiate Basketball Championship, has resigned from that institution to take the head coaching job at Furman. Williams was formerly an assistant at Furman. He replaces **Frank Selvy**.

* * *

Edward Farrell, who has been an assistant coach for five years, has been named head football coach at Bridgeport University. Farrell succeeds **Nick Nicolau**, who has been named to the staff at the University of Massachusetts. Farrell is a graduate of Rutgers.

* * *

Baaron Pittenger, sports information director at Harvard, has been promoted to associate director of athletics. Pittenger has been at Harvard since 1959.

* * *

Sam Timer, defensive backfield coach at Duke University, has accepted the head football coaching job at Allegheny College. He succeeds **John Chuckran**, who has returned to Penn State, his alma mater, as assistant coach.

* * *

Ken Norton, Manhattan College director of athletics, has been named by the Council to the NCAA Academic Testing and Requirements Committee, replacing **Carl Erickson** of Kent State, whose term had expired.

PROFILE—Oregon's Raymond T. Ellickson

Ellickson Achieves Distinction as Physicist

The NCAA News learned as it went to press of the sudden death Sunday, May 31, of Raymond T. Ellickson.

Dr. Raymond T. Ellickson, currently serving on the NCAA Council as Vice-President of District Eight until January of 1971, is a professor of physics at the University of Oregon, has extensive research experience and has been widely published.

He took over as Oregon's faculty athletic representative in 1958 and has served in that capacity to date. He served as president of the Pacific-8 Conference during the 1968-69 academic year.

Ellickson received his B.A. at Reed College in 1935, his M.A. at Oregon State University in 1936 and his Ph.D. at the University of Chicago in 1938. He began his career at the University of Oregon in 1948 as Associate Dean of the Graduate School and professor of physics. Previously he had been an associate professor of physics at Reed College in Portland.

In 1941, he was a research engineer for the Pratt and Whitney division of United Aircraft, Hartford, Conn., where he analyzed supercharger performance data. In 1943, he worked for RCA Communications doing mathematical analysis of apparatus for sending coded messages.

In that same year, he worked in the Electrical Engineering Department of the Polytechnic Institute of Brooklyn on development of vacuum equipment for the preparation of metal film attenuators for wave guides.

Simultaneously, he was in charge of a contract with the U. S. Signal Corps to study aging of quartz plates for oscillators. From 1944 through 1946, Ellickson did research on infrared phosphors and from 1946-48 he was in charge of a contract with the office of Naval Research at Reed College on Infra-red Phosphors.

The summer after he began working at the University of Oregon, Ellickson was one of six Oregon scientists to attend an institute on Radioactivity Research Techniques in Oak Ridge, Tenn., sponsored by the Atomic Energy Commission.

He became head of the Department of Physics at the University of Oregon in 1949 while still serving as associate dean of the Graduate School. At the same time, he was conducting research on radioactivity in the upper atmosphere, sponsored by the U.S. Air Force.

He conducted research on scintillation counters for X-rays from 1950 to 1952. Then, in 1952, on leave from the University of Oregon, he became the senior physicist at the Chicago Midway Laboratories.

In 1955, he became acting dean of the Graduate School at the University of Oregon, serving in that position intermittently until 1959 when he resigned as head of the Department of Physics.

He was in charge of a research program on semiconductors, sponsored by the U.S. Signal Corps, from 1952 to 1961. From 1962 to date, he has worked on the American Association for the Advancement of Science program for elementary schools.

Ellickson holds a fellowship of the AAAS. He has been president of the Oregon section of the American Association of Physics Teachers and, while teaching in Portland, was

RAYMOND T. ELICKSON

president of the Association of Portland Scientists.

He was chairman of the Physics-Mathematics section of the Oregon Academy of Science, 1952-53. He

became a member of the National Research Council panel to select National Science Foundation fellows in physics in 1952-53 and, in 1955, was appointed a member of the fellowship selection panel of the National Science Foundation.

He is the author of many reports and articles on nearly all areas in which he has done research. His works can be found in the American Journal of Physics, the Physics Review, the Encyclopedia of Chemical Technology, the Encyclopedia of Chemistry, the World Book Encyclopedia, the Encyclopedia of Electronics and several other publications.

Despite all these duties, he has found time to serve as a member of the Eugene, Ore., City Planning Commission (1957-60); as a member of the Higher Commission, N.W. Association of Secondary and Higher Schools (1957-63); and as a visiting lecturer in India on the State Department Educational Exchange Program (during the summer of 1960).

Columnary Craft

Reprinted below is an excerpt from the writing of a news columnist commenting pertinently about college or amateur athletics. It is selected because the NCAA NEWS feels it makes a point or discusses a topic which will interest NEWS readers.

John Mooney, Salt Lake City Tribune

The time may well come when the only students on campus demonstrating or feeling any pride for their university will be the athletes.

I'll admit I'm partial to the athletes in the student body.

To me, an athlete is something special.

But mere physical assets aren't the reasons I am proud to have been involved in, or associated with, athletes for more than 40 years.

I think the athlete of today is unique for two reasons:

First, the athlete belongs to a group, maybe one of the few on campus, which is FOR something, and being FOR something, he is willing to give more than lip-service to insure success.

The athlete will give of his time, energy, talents, stamina, strength and skills to help his group achieve success. There are many talkers on campus today; the athlete is a doer of deeds, not an orator.

Secondly, the athlete may be unique, too, in that he knows he isn't getting something for nothing, and that's a rarity these days.

An athlete pays the price—in sweat, pain, fatigue, drudgery, time and sacrifice—for his opportunity to gain an education.

Whereas some may feel they have the "right" to get an education, most athletes accept the fact athletic skills have given them the "privilege" of gaining an education.

Pride's the Answer

Maybe it's unimportant in these days of so many issues, but did you ever stop to realize the impression a football team, for example, can give strangers?

I feel a sense of pride in being with a group of men, at the airport, the hotel lobby, in the dining room, or in a plane, when I hear strangers whisper, "Isn't that a fine looking bunch of young men?"

A team that has pride in its personal appearance will have pride in its execution of plays on the field.

Mark of Distinction

Once, you could tell the athlete on campus by his appearance.

Then, he wore either a T-shirt or his monogram sweater or jacket, levi-type jeans, white sweat sox and loafers. That was the image College Humor painted of the athlete, who had the 54-inch chest and wore a size four hat.

The athlete of today may adopt the casual campus attire of the other students, but when he's off campus, representing his university, the athlete stands out, favorably.

The athlete is learning a vital lesson in his sport—that he must follow to become qualified to lead.

He is finding out that team effort and team discipline, along with team sacrifice, pays dividends.

He is developing a pride in his personal achievements, his team's success and his university's reputation.

And those are carry-over values which will stand him in good stead long after his academic pursuits have been out-dated.

Three Bowl Game Sites Approved

New contracts for three of the four College Division Class I Regional Football Bowl sites were approved by the NCAA Executive Committee at its April meeting.

Two-year pacts were approved with the Camellia Bowl Association and the Atlantic City Special Events Committee covering the Association's West and East Championships, respectively, for 1970 and 1971. Sacramento, Calif., has hosted the Camellia Bowl since 1964; Atlantic City, N. J., hosted the first Boardwalk Bowl in 1968.

A one-year agreement was approved with the Pecan Bowl Sports Association to conduct the Midwest Championship in Arlington, Tex., where it has been held the past two years.

The Association's contract with the Downtown Lions Charity Sports Events, Inc., to conduct the Grantland Rice Bowl in Baton Rouge, La., will not expire until 1971.

All four regional championship games will be played on Saturday, Dec. 12, 1970. Each game will be televised regionally by the American Broadcasting Company.

NOTES and QUOTES

Dick Trachok has been appointed director of athletics at the University of Nevada, Reno. He succeeds **Jake Lawler**, who asked to be relieved of the duties to devote more time to teaching. Trachok is a former football coach at Reno.

* * *

Homer Smith has resigned as football coach at Davidson College, and has been hired as head coach at the University of the Pacific. Smith replaces **Ken Blue**, who had held the job only a month, during the off-season.

* * *

Donald J. McKillip has become the director of athletics at St. Mary's College, St. Mary's, Cal. McKillip was formerly head football coach at Adams State College. St. Mary's has also approved the return of the football team to varsity status. The college had dropped the sport in 1951, resuming at the club level in 1967. St. Mary's will play a nine-game schedule this fall.

* * *

Ferdinand "Andy" Gelger, assistant director of athletics at Syracuse, has been named to the post of assistant commissioner of the Eastern College Athletic Conference, effective August 1.

* * *

USC baseball coach **Rod Dedeaux** has moved onto a new victory plateau. His team recently beat Long Beach State, the 900th career win for Dedeaux, a record believed unmatched in collegiate coaching circles. Dedeaux's teams have won five National Collegiate Championships.

ELSEWHERE IN EDUCATION

Substantial Enrollment Increases

The Census Bureau has said college and university enrollment last fall was 7,435,000, an increase of 9.3 per cent over fall enrollment in 1968. The bureau, which uses sampling techniques, said Negro enrollment in college was 492,000, an increase of 13 per cent over 1968.

Negro enrollment last fall was 6.6 per cent of total enrollment, compared to 6.4 per cent of total enrollment in 1968, the bureau said. Total Negro enrollment in 1968 was placed at 434,000.

The Census Bureau said total enrollment at colleges and universities increased 60 per cent since fall 1964. Negro enrollment during that period rose 110 per cent.

The bureau said also that, by last fall, 27 per cent of all persons in the United States 18 to 24 years of age were enrolled in college. The proportion in 1964 was 20 per cent. The proportion of Negroes in this age group enrolled in college in 1969 was 16 per cent, compared to eight per cent in 1964.

Pass-Fail Grades Insufficient

The Law School Admission Test Council, chaired by Prof. Harry B. Reese of Northwestern University, has issued a statement pointing to problems created by pass-fail or similar grading systems upon the processing of candidates for law school.

When a student with a transcript bearing pass-fail or similar grades seeks to enter law school, the council said, "law school admission committees will be deprived of data that has served them well in the past in making the admissions decision."

The council said it had developed more than 20 years ago the Law School Admission Test (LSAT). "Studies show that the LSAT score and the undergraduate grade-point average are the two best quantitative predictors, and that when they are used together they are better than either used separately," the statement said. The statement said also that "college grades make a significant contribution to prediction of law school grades that is not supplied by the LSAT score."

The council said it was issuing its statement "in the hope that it may be useful to college faculties and administrations in determining what grading system to use."

Appeal in Church-State Issue

Representatives from education, business and government have formed a new organization called the "Four Colleges Trust Fund" to aid four Connecticut institutions defending a taxpayers' suit testing the legality of Federal aid to church-related colleges and universities.

Honorary chairman of the new group is President Willis M. Tate of Southern Methodist University.

The trust fund will seek to help defray expenses of Fairfield University, Albertus Magnus College, Annhurst College and Sacred Heart University in the landmark case, *Tilton vs. Finch*, which is expected to be appealed to the Supreme Court.

"The matters at issue are likely to vitally affect the interests of some 800 institutions of higher education," President Tate said.

The trust fund has opened offices in Suite 770, One Dupont Circle, Washington, D.C. 20036.

Long Hair Won't Make Team

The barber shop will be the first stop for four Martin County, Calif., high school students on their way to participating in track meets this year.

That was the ruling by United States District Judge George B. Harris, who denied a motion for a preliminary injunction against officials of the Tamalpais Union High School District and dissolved a temporary restraining order which had permitted the youths to work out with the Redwood High School track team.

Judge Harris noted that the issue was "in an area involved with the sensitive, delicate and demanding role of athlete and coach."

He added that "the alternatives are merely to forego athletic competition or trim the hair above the collar and around the ears during a particular athletic season."

He said that discipline was an "ugly word" in some areas these days.

"It should not be considered unreasonable nor regarded as an infringement of constitutional prerogatives to require plaintiffs to bring themselves within the spirit, purpose and intent of the questioned rule."

Attorneys said they would appeal the decision.

NCAA Lifts Ban on Cage Competition

The total ban on foreign basketball competition for NCAA teams and athletes has been lifted by the Association's Council in recognition of the formal organization of the International Basketball Board.

Thus member institutions may now apply for Council waiver of Constitution 3-10-(c), which prohibits out-of-season basketball competition. The Council has the authority to grant waivers if such competition is officially approved by the Department of State.

Requests for sanction of competition by the Council must be made at least 30 days prior to the competition.

The Council action was based upon the recommendations of the Basketball Federation of the U.S.A., and of the NCAA's delegates to the BFUSA Governing Council.

BFUSA, at its annual meeting in March, formally agreed to participate in the IBB. BFUSA will be responsible for arranging and approving foreign competition for its membership, and stands ready to be of assistance to its constituents. It will be responsible for processing applications for NCAA members in connection with IBB procedures.

The IBB will govern all U.S. foreign basketball competition except the Olympic and Pan American Games, which will be under the jurisdiction of the U.S. Olympic Committee.

Once a request is granted BFUSA approval, that body will forward it to the IBB, which, in turn, will approve it and direct that an invitation be sent to the International Basketball Federation (FIBA) member in the appropriate foreign country.

Forms with which NCAA members may seek Council approval of proposed foreign competition are available from the Association's executive office in Kansas City.

Four June Track Meets Are Certified

Four June track and field meets have been certified by the NCAA Extra Events Committee for participation by undergraduate student-athletes attending member institutions.

Included are the United States Track and Field Federation Championships, June 12-13 at Wichita, Kan., and the AAU Championships, June 26 and 27 at Bakersfield, Calif.

Also certified are the June 6 Compton Invitational, Los Angeles, Calif., and the June 9 Long Island Meet of Champions, Hempstead, N. Y.

They meet the provisions of NCAA Bylaw 7B.

The Extra Events Committee cautioned that sanction of a meet by the USTFF does not necessarily satisfy requirements for participation by NCAA student-athletes. A meet also must have the NCAA certification before undergrads may compete.

NSYSP is Approved
