Gilbert on the mark

Gale Gilbert, University of California quarterback, moved up in the total-offense category after rallying the Golden Bears to a tie with unbeaten University of Arizona

A higher goal set for basketball: move officiating toward excellence

The NCAA Special Committee on Officiating Improvement announced a comprehensive program that the committee believes will improve officiating in NCAA men's and women's basketball, after a meeting last week in Kansas City, Missouri.

"The committee recognized that officiating in men's and women's college basketball generally is very good," said Milo R. Lude, committee chair and director of athletics at the University of Washington. "What we hope to do is continue the improvement in officiating, striving for excellence."

"The committee has formulated recommendations for coaches, officials, conferences, rules-making bodies and the NCAA that we hope will pull things together and lead to a more compatible relationship between coaches and officials."

The following proposals were made by the committee:

1. Ask the National Association

of Basketball Coaches and the Women's Basketball Coaches Association to make a commitment to improve bench decorum.

2. Recommend to the NCAA Executive Committee that an officiating directory be developed for all NCAA allied conferences. The directory also would include conference supervisors and supervisors for state high school associations.

3. Request the NCAA Men's Basketball Rules Committee and the U.S. Girls' and Women's Basketball Rules Committee to develop a code of ethics for coaches and officials.

4. Recommend that promotional messages be developed for use during the 1984 NCAA Division I Men's Basketball Championship that would improve the image of officials and also address certain rules interpretations. The committee also encouraged conferences to develop similar messages and to promote a greater understanding of officiating (e.g., through program features and

interviews). The committee will develop a biographical questionnaire that conferences will be able to use in obtaining information about their officials.

5. Encourage allied conferences to establish officiating camps.

6. Recommend that the men's and women's rules committees exchange up to two members to sit in on the other's meetings, with a goal of better communication between the respective rules bodies.

7. Encourage coaches to refrain from commenting to the media on officiating, and similarly encourage officials. Conferences and institutions are encouraged to adopt strong policies on this subject.

9. Recommend that individuals conducting clinics, conferences and seminars develop better communication between coaches and officials.

10. Urge institutions and allied conferences to develop game-management and crowd-control policies.

See A higher, page 12

Committee reports highlight agenda for Council meeting

Recommendations from four special committees, including possible legislation for consideration at the 1984 NCAA Convention, are featured on the agendas for the fall meetings of the NCAA Council and the three division steering committees October 10-12 at Loews Anatole Hotel in Dallas, Texas.

The Council will receive reports from the Special Committee on Governance Review, which is dealing with various options to increase the involvement of institutional chief executive officers in intercollegiate athletics decision-making, and from the Special Committee on Player Agents, which will propose several actions to assist institutions and student-athletes in dealing with the agent problem.

In its portion of the meeting, the Division I Steering Committee will hear a report from the Select Committee on Athletic Problems and Concerns in Higher Education. John P. Schaefer, executive director and acting chair of that independent commission, will present its recommendations.

The Division I committee also will consider the recommendations of the Special Committee on Division I Criteria, which is proposing greater legislative autonomy within Division I, submitting several recommendations regarding the Division I Men's Basketball Championship for consideration by the Division I Men's Basketball Committee and proposing a formal statement of philosophy for Division I.

The October meeting represents the final opportunity for the Council and division steering committees to review and develop legislative proposals for the January Convention. They will consider all legislation received in the national office as of the dates of the meeting and will make final decisions regarding the

amendments the Council or a steering committee wishes to sponsor.

In other preparation for the 1984 Convention, the steering committees will develop the agendas for the division round tables, including for the first time separate two-hour sessions for Divisions I-A, I-AA and other Division I institutions.

Also on the Council agenda:

- Appointment of individuals to fill vacancies on all Council-appointed committees, effective September 1, 1984.

- Review of the NCAA-sponsored meetings of chief executive officers held September 19-20 in Kansas City.

- Reports by the Academic Testing

and Requirements, All-Star High School Games, Eligibility, Governmental Affairs and Football Television Committees, the Committee on Infractions, the Council Subcommittee on Women's Interests and the division steering committees.

- Consideration of all Administrative Committee actions and new and revised interpretations since the August Council meeting.

In addition to the reports of the select committee and Division I criteria committee, the Division I Steering Committee will receive a progress report on the work of the Special Committee on Academic Research.

See Committee, page 12

Catastrophe insurance is under preparation

Marty Wittman was a 16-year-old high school sophomore when he was left paralyzed from an injury suffered in a wrestling match last December in Tacoma, Washington. His lifestyle never will be the same, but the costs of making a new life are something he and his family never will have to worry about.

Those costs will be paid through a catastrophic injury insurance program adopted last year by the Washington Interscholastic Activities Association. Beginning with the 1984-85 academic year, NCAA member institutions may have a chance to provide the same kind of full medical coverage to student-athletes who suffer disabling injuries.

The NCAA Insurance Committee has worked for nearly two years to develop a catastrophic injury insurance program. According to NCAA Director of Finance Richard D. Hunter, the college plan is nearing fruition. The NCAA Council endorsed the program this summer, pending review by legal counsel, and authorized the Insurance Committee to proceed with development of the plan.

"An Association attorney, who has been involved in the project since it began, is taking a last look," Hunter said. "Once he approves it, the Kansas Department of Insurance will review the program. We hope to have authorization from both within the next month."

When those requirements are met, the details of the coverage will be announced in The NCAA News. Hunter and the committee then will begin educational and marketing efforts to put the program into effect.

One of the reasons Hunter is optimistic about the NCAA plan being

approved by the state insurance department is that it is based on the high school plan, already in effect in Kansas and 47 other states. That program sometimes is referred to as the "Ruedlinger Plan," after Doug Ruedlinger, architect of both programs.

Ruedlinger is president of Doug Ruedlinger, Incorporated, a company based in Topeka, Kansas. That company will administer the program, working with the NCAA committee as it already does with an NCAA-sponsored insurance program for high school all-star games.

"We are trying to provide an athlete who is catastrophically injured with reimbursement to the extent that there is no need to look to any other source, like the courts, for help," Ruedlinger said. "If we provide everything, there can be no concern on the part of the parents for financing."

The program is designed to take effect after other insurance benefits have been exhausted. Once that point is reached and a deductible amount is paid, the family will begin receiving help almost immediately, rather than experiencing the long delays that can occur with court cases.

"We will provide prompt coverage and pay for anything that is of a medical necessity, as termed by the doctor," Ruedlinger said.

Ruedlinger always emphasizes the medical coverage as a key element of the program, even though the policy also offers additional liability protection. Some observers have questioned the necessity of the plan, believing it to be only a liability policy.

"That is a misconception," he said. See Catastrophe, page 12

Robinson's 'magic' number nears Bryant's

By Marvin West

Scripps-Howard News Service

College football is a numbers game: wins and losses, points on the board, yards gained, passes completed, tackles made, television ratings, dollars earned, dollars spent.

Always, it is numbers, numbers on a jersey, numbers on yardlines, numbers on seats, numbers in seats.

Eddie Robinson is big in numbers. He is holding at 308. That's how many games his Grambling State University football teams have won in his colorful coaching career. The total is two successful seasons away from the magic number 323, established by the late Paul "Bear" Bryant.

If Robinson lives, and he certainly looks healthy, he will exceed Bryant's numbers in time. Then, the world will get to decide how much credit Eddie deserves. You can be thinking about it. Does it matter that Bryant hunted in bigger trees, that his teams took scalps from Southern Cal and Tennessee and Penn State? Does it count the same for Robinson's Grambling to defeat Florida A&M or Tennessee State? Has Robinson done better with what he had than did Bryant with greater resources?

Will we celebrate Robinson's record, assuming he exceeds 323, as we did Bryant's push past Amos Alonzo Stagg? Or, as Robinson says, will we forever regard Bryant's total as we do Babe Ruth's home-run record—untouchable—no matter who tops it?

There are football coaches with greater egos than Eddie Robinson's, but he wants recognition comparable to results. Just like the others, he feeds on praise, on headlines, on backslapping congratulations. He was thrilled by the television special on his Grambling accomplishments. He wants badly to beat Bryant, but he also wants to be discreet.

We talked, not long after Bryant's funeral, about the exciting potential, the dilemma, the tone of this race.

"I don't want to be the man in pursuit of coach Bryant's record. I don't like the sound of that. I just want to do what he did and be what he was. I want to stand for the good things he stood for and contribute whatever I can to football. The number of victories isn't nearly as important as how Eddie Robinson continues to carry himself, that he be honorable and stand for what is right."

Robinson will be regularly reminded of the numbers comparison. Athlon magazine is circulating a national story on "That Other Coaching Legend."

Grambling followers are very eager for him to win. They see tremendous value for their school if Robinson can outrun Bryant.

Eddie Robinson followed many of the same kind of dirt roads Bryant made famous in his trip from Moro

An aunt boldly nominated young Robinson for the coaching position at Louisiana Negro Normal College in Grambling because she knew the school president, Ralph Waldo Emerson Jones.

Jones decided to interview the 22-year-old Robinson. They talked baseball. They both did a little bragging. Jones said he could throw a mean curve. Eddie said he could hit anything the president could get over the plate.

Grambling publicity director, decided there was not anything special about a famous coach building from a 3-5 record. In press releases about Robinson, Nicholson told how the coach lost every game his first year but survived to become a legend in his time. A good accountant eventually found the discrepancy and included the modest beginning in Eddie's growing total.

Grambling put Robinson into headlines—or maybe it was the other way around. Great players flowed through the school to professional football: Tank Younger, Buck Buchanan, Roosevelt Taylor, Charlie Joiner, Sammy White, Ernie Ladd, Frank Lewis, Willie Davis, Doug Williams, Everson Walls.

The team surged to the top of black football. It played in Yankee Stadium, in the Astrodome, in Tokyo.

Robinson grew in stature. He walked with kings, even George Steinbrenner. He met Bryant.

Robinson's credibility was reinforced by former players who flock back to campus to help with spring training. He is in demand for public appearances. When his team tops 323, how will we react? Is it possible for Robinson to beat the Bear?

Columnary Craft

Bottoms to the top of the football world. Like the Bear, Eddie had to whip long odds.

Robinson's father was a sharecropper in rural Louisiana. The family was every bit as poor as the Bryants in Arkansas. Robinson's father showed good quickness in moving his clan to town, to Baton Rouge. He got a job with Standard Oil.

Football was Eddie's escape. He played single-wing fullback at since-departed Leland College. His degree helped handsomely. His first job was in a feed mill.

They ended up out in a field with the veteran college president trying to strike out the cocky young athlete.

"I forgot I needed a job," said Robinson, with a chuckle. "I ripped him."

Robinson got the job. Jesse Applewhite, night watchman at the college, sunlit as Eddie's assistant.

"Our first team won three and lost five."

Robinson almost lost those three victories years later. Collie Nicholson,

Looking Back

Five years ago

The Internal Revenue Service ruled that income received by colleges from college sports broadcasts is not taxable. (October 15, 1978, NCAA News)

Ten years ago

The U.S. Senate voted October 3, 1973, to return Senate Bill 2365 to the Senate Commerce Committee, reflecting the Senate's reluctance to create Federal control over amateur athletics. ("NCAA: The Voice of College Sports")

Twenty years ago

The NCAA Long Range Planning Committee recommended and the Council supported October 23, 1963, a reaffirmation of the Association's enforcement policy: Penalties should be broad if there is a basic institutional pattern of nondeservance; narrow if violations are isolated and institutional dereliction is not involved. ("NCAA: The Voice of College Sports")

Thirty years ago

The NCAA Football Television Committee authorized an experimental "panorama presentation," designed to increase participation in the TV program, in which the network showed portions of games from four different sites October 24, 1963. The end results were not satisfactory, and the approach was discontinued. (1953-54 NCAA Yearbook)

Letter to the Editor

To the Editor:

I read Dale Brown's comments in The NCAA News. I don't think Dale has thought this through. You cannot just give \$100 per month to football and basketball scholarship people along with two round-trip air tickets home for each athlete, and one round-trip ticket to parents to the school. What about the other scholarships outside of football and basketball, both in the men's and women's sports?

Not everyone in Division I is making money; they do not have the big TV contracts in football and basketball, nor do they draw that well at the gate. Put a pencil to the money it would cost. Who raises this extra money?

I read in the papers almost every day where many, many Division I schools are having trouble meeting their budgets at this time. The input of women's sports has put a strain on every college, and they are just now beginning to get straightened out with their new strain on the budget. The concept of the NCAA is, and I hope always will be, the student-athlete. It is not to say they may or may not deserve this money. It is economics. Air fares, room accommodations and food—this all has to be added to the already-stretched budgets.

We have come a long way since the athlete had to work on campus for part-payment of his scholarship. The student-athlete's reward is a college education free of charge. When he graduates, he too may get a coaching job and get a Cadillac for going to the Final Four.

Abe Lemons
Basketball Coach
Oklahoma City University

Television revenue may level off

John D. Swofford, director of athletics
University of North Carolina, Chapel Hill
The Washington Post

"I think (commercial TV revenue) is going to reach a kind of saturation point. It's not going to increase in the next 10 years the way it has in the last 10. But in the next breath, I would say that there are some changes going on technically, in television, when you get into pay-per-view and subscription television, that will bring in some added money. . . ."

Walter Lewis, quarterback
University of Alabama, Tuscaloosa
Chicago Tribune

"Coach (Ray) Perkins is doing what coach Perkins thinks he should do. He can't be another coach Bryant."

Opinions Out Loud

He can only be a Ray Perkins. That's what it's going to take for us to be successful this season."

Otto Jordan, director of athletics
Washington, D.C., Public School System
The Washington Post

"I don't know if removing the SAT provision would win me over. Some of our students might not meet the curriculum requirements. I think we should look at this very carefully before it goes into effect."

"Athletics brings kids to school. Once they're here, we can help them. There should be standards, but we should make sure the criteria are fair. We may miss some people who could contribute both on the athletic field and in society because they didn't meet some arbitrary standard."

Tom Wilson, head athletic trainer
University of Houston
Houston Chronicle

"I know you hear some people say we've got 15 players who can bench press 400 pounds, but being strong isn't enough these days. Can they run and play football? I think we've reached a point where you're not going to dominate many teams with strength."

"I think we're in a battle to the finish on drugs. Professional sports is going to have to clean up what's occurring. My profession has a strong code of ethics against the use of steroids."

"I'm 100 percent in favor of testing high school and college athletes for drugs. I drink once in awhile, and I dip snuff every day; but for an athlete's body to reach its maximum performance, there's no way he can smoke marijuana or snort cocaine."

"Modern athletes have more knowledge, skill and care at their disposal now than at any time in history. But the American sports scene has to take a stand on drugs."

Lance McIlhenny, quarterback
Southern Methodist University
The Fifth Down

"I'm perfectly satisfied with the season we have right now. When you start talking about play-offs and playing more than 11 games, I don't see how it could be feasible, really."

"I have to struggle right now to play 11 games and still keep my grades up. I guess there really wouldn't be that much more; just one week. But I'm really satisfied with the way it is."

Report on the American high school
The Carnegie Foundation
The Chronicle of Higher Education

"There is at many colleges a shocking bias against preparing students to teach in public schools."

"While administrators and professors complain loudly about precollege education, they often fail to recognize that the problem frequently begins at home. Professors who work with schools are not rewarded, and students who want to teach often are told that this would be a big mistake."

John Elway, quarterback
Denver Broncos of the NFL
SportsNow

"I never let myself get in that situation—drugs or anything."

"I knew about guilt by association, so I stayed away from those things. And nobody ever forced anything on me. Well, maybe two or three beers my whole high school career. I hated it."

Daniel J. Jones, director of admissions
Marietta College
Marietta's World

"We believe we experienced a kind of knee-jerk reaction by prospective petroleum engineering students to the economic conditions faced by the industry and the resulting tightened job market. Local students are particularly aware of hard times. But what these students fail to consider is that by the time they graduate, we'll be in the boom market again, according to the predictions of most of the industry's experts."

"We're now trying to get that message across to prospective students."

Elsewhere in Education

SAT results raise some doubts

High school seniors showed improved math scores but slightly lower marks on the verbal half of the Scholastic Aptitude Test in 1982-83.

SAT math scores averaged one point higher than the year before, and verbal scores fell one point. One million students took the test.

The latest scores raised doubts about a supposed reversal in the decreasing quality of public schooling since math and verbal scores rose last year after a 19-year slide.

The scores still are far off the 1963 averages when SAT test results began their downward spiral.

George H. Hanford, College Board president, said, "It is obvious that much more remains to be done if we are to raise the level of secondary school performance of our students."

Four-year degree program passé

Officials at Oregon State University say that most undergraduate students take more than the conventional four years to get their degrees. The findings were part of a research project of the counseling and testing center.

Morris L. LeMay, director of the center, said it is almost a misnomer to say that a present university program is a four-year course. Only 20 to 25 percent of Oregon State students graduate in four years, he said.

LeMay cited several factors that have lengthened the average college stay.

He said some students stay an additional year to earn a second degree or for job-enhancement purposes. He also said others who can afford it stay in school waiting for the economy and job outlook to improve. Some who cannot afford to stay in school full-time work part-time and go to school part-time, which lengthens the time they take to earn a degree.

Watered-down curriculum apparent

Less than three percent of last year's high school graduates met the academic requirements recommended by the National Commission on Excellence in Education, the National Center for Education Statistics has reported.

Less than two percent studied a foreign language for two years as the commission recommended for college-bound students.

The center analyzed the transcripts of more than 12,000 members of the class of 1982.

The center found that the students took an average of 21.8 credit hours in high school, but many took courses in subjects other than those the commission regarded as most important.

Education Secretary Terrel H. Bell said the study supports the commission's claim that some high schools offer a watered-down curriculum.

Reagan's education grade is low

Ernest L. Boyer, president of the Carnegie Foundation for the Advancement of Teaching, says President Reagan deserves a grade of less than C for his leadership in trying to revive American schools.

Boyer is urging the Federal government to pay for remedial education for high school students, to offer scholarships to attract bright students into teaching and to provide low-interest loans to help schools build science laboratories and other facilities.

Concerning computers, Boyer said, "We're buying now and planning later. I think we need to blow the whistle on this and find out what the computers can and cannot do."

"All too much of today's computer instructional material resembles a book cover without pages," Boyer told *The Washington Post*. "The technology is available . . . but educational content that makes the investment worthwhile is largely lacking."

Government moves to collect loans

Federal government employees are being warned to expect a 15 percent reduction in their paychecks unless their Federally guaranteed college loans are repaid.

The move is part of a campaign by the Reagan administration to collect more than \$2 billion in delinquent student loans.

The administration also has begun penalizing states and universities that have student loan delinquency rates that are higher than the average.

Schools study improvement plan

Chicago public school officials have begun drafting a five-year plan that could lead to tougher academic standards for students and more accountability by teachers and principals, according to the *Chicago Tribune*.

Committees have proposed such changes as lengthening the school year, adding required classes in high school and setting tighter hiring and retention standards for employees.

Administrators emphasize that the plan is in the early stages and that the proposals have been discussed only in general terms.

To attract top teacher applicants, it has been suggested that better pay be offered, a teacher "hierarchy" be established to reward exceptional instruction and the requirement that teachers live in the city be dropped.

Conference on education planned

Education will be the focus of an intensive national conference entitled "Education, Public Policy and the Reagan Administration," November 21-22 at the Hyatt Regency in Washington, D.C.

The conference is sponsored by the Harvard Educational Review; the Institute for Educational Leadership, Inc., and the Bureau of National Affairs, Inc.

Panel discussion topics will include recommendations of the National Commission on Excellence in Education, the Federal role in education, differing views of the competent teacher and directions in civil rights policy in education.

Conference speakers will include members of Congress, the government and representatives of secondary and higher education. Registration information can be obtained by contacting Education Conference Registrar, BNA Conferences, The Bureau of National Affairs, Inc., 1231 25th Street, N.W., Suite S-602, Washington, D.C. 20037. There also is a toll-free number: 800/424-9890.

U.S. mastery on basketball courts around the world is on the wane

By Jim McKone

Coming home happy and undefeated from Venezuela and owning a gold medal from the Pan American Games, coach Lon Kruger warns that the United States basketball team might have trouble winning the 1984 Olympics.

"International competition has improved so much; the days when the United States could go in, show up and win by 20 or 30 points are long over," said Kruger, director of athletics and head basketball coach at Pan American University.

"We had to play very well to win by small margins. It wasn't that our team played badly. It was a compliment to the improvement of the other countries."

"Mexico led 20-4 at the start of our first game and was ahead by 11 at the half. Mexico played extremely well and gained the bronze medal in Caracas when nobody expected them to do that well."

"Brazil took the silver medal. Canada, Puerto Rico and Argentina all were capable of beating the United States in any game—and all of them almost did. Cuba had perhaps the most talented team in the Pan American Games yet didn't make it into the gold-medal round after losing three close games."

Kruger and his former Kansas State University teammate, Bob Chipman, assisted head coach Jack Hartman of Kansas State as the United States swept every game in Venezuela. Kruger and Chipman formed one of Kansas State's all-time great backcourts when they played for Hartman a decade ago. All three earned gold medals.

The coaches do not always get included on the gold-medal list at international competition; but at this hard-fought prelude to the 1984 Olympics in Los Angeles, they earned it.

"This was almost a no-win situation for coach Hartman," Kruger said, "because everyone expects the United States to win in international basketball; and if we don't win big, people wonder why."

"Coach Hartman did an outstanding job. It was certainly a pleasure to be back working with him again." (Kruger formerly was an assistant at Kansas State.)

Lon Kruger

"It's hard for Americans to believe, but the Pan American Games were a tossup. To a nonpartisan observer just looking at the teams, the United States very possibly would not have been the favorite."

"We were possibly the shortest team there. Our tallest player, Waymon Tisdale of the University of Oklahoma, is 6-9. Nearly every team had a man taller than we did, and Brazil had three."

"In terms of overall basketball ability nationwide, the United States will have the advantage for awhile, I believe. But these international teams have certain advantages. They average 25 to 27 years of age. We average 20."

"And these international teams play together years at a time. Canada had been together four years (and had just won the World University Games in Canada). Brazil might have been together longer than that. We were together four weeks."

"The Olympics won't be automatic for us to win, even in Los Angeles. There are too many good teams now, all over the world."

"It's going to be very competitive in Los Angeles. All the teams in Caracas were capable of beating the United States. We had to play a very good game to beat Venezuela by 11 points—and Venezuela was the only team there that didn't win a game—yet they were close until the end."

"I would expect that a majority of

our Olympic players will have had Pan American Games experience. Michael Jordan and Sam Perkins from the University of North Carolina, Chapel Hill, certainly represented the North Carolina program in the manner you would expect. Tisdale was perhaps the best performer we had."

"Tisdale has a great career in front of him. He's going to be a sophomore, 6-9, 225 pounds, agile, a good shooting touch . . . he has all the tools."

The international rules did not bother the Americans much, Kruger said. "Basketball is pretty much basketball—if they don't worry about the rules too much, they can make the adjustment OK."

The crowds did give all the Latin American countries a home-court advantage in Venezuela.

"The crowds were for the South American countries, and understandably so," Kruger said. "There is a natural envy of the United States. Although we were not the crowd favorite, the people in Venezuela were very friendly, receptive and cordial. They were hospitable in every way possible."

"When they got in the arena, there was a lot of noise, a lot of whistling; but it was just a strong crowd reaction, like in American college basketball. The crowds were knowledgeable. They would react to the smallest things. If either team missed a free throw, they would whistle and jeer. They got upset at the home team for missing chances."

"Give our players credit. They handled the crowd and the pressure well. They tended to business on the court. The crowds were vocal and excited and made a lot of noise, but it was a healthy rivalry, not hostile."

Kruger is a veteran international basketball player. He played for the team that toured China in 1973, one of the first American groups to visit China after the doors were opened to Western countries. He also coached at Kansas State when the Wildcats played an international tournament in Japan, besides being hosts to European teams. He played professionally in Israel during the 1974-75 season.

McKone is sports information director at Pan American University.

Soccer-loving Zendejas family gets its biggest kicks in football

By Jeffrey T. Shain

Football has had several place-kicking families over the years. The Gogolaks, Charley and Pete, were the first of the breed, and Chris and Matt Bahr followed them into the National Football League.

Now, football scouts have to like what they see coming out of Chino, California.

The Zendejas family is beginning to make itself known.

Joaquin Zendejas kicked at University of La Verne in California and hung on with the San Diego Chargers until this season's final cut. He was beaten out by veteran Rolf Benirschke. Meanwhile, brothers Luis and Max are kicking at Arizona State University and the University of Arizona, respectively.

But wait, there's more.

Cousin Tony Zendejas was the Big Sky Conference's first-team place kicker as a junior with the University of Nevada, Reno, in 1982, and his brother, Martin, is the Wolf Pack's kicker of the future, having enrolled as a freshman.

And to top things off, Alan Zendejas, brother of Joaquin, Luis and Max, plays high school football and soccer back in Chino.

Luis Zendejas, at one time the top NCAA Division I-A kicker this season, says the family's kicking tradition was started by his father, Joaquin Sr.

"He always wanted one of us to become a professional soccer player, but it hasn't come yet," Luis says.

Jack Cappel, football coach at Don Antonio Lugo High School, has coached Luis, Max and Alan to All-CIF honors over the years. Joaquin, Tony and Martin kicked for nearby Chino High School.

During the summer, all six Zendejas kickers gather on one football field to practice. Luis says the group kicking sessions improved everybody's performance.

"It (competition) makes you a better player," Luis says. "You have something to compare yourself to, because if you practice by yourself, you might end up backing off."

It could be supposed that with the rivalry Arizona State and Arizona have had over the years, there would be more intense competition between Luis, a junior, and Max, a sophomore.

However, Max does not see it that way, saying, "Basically he does his thing, and I do mine."

Luis says there are not many differ-

ences between the six cousins, as each was taught by the same person—Joaquin Sr.

"We all have the same style (soccer-style) and just about the same rhythm, so you can't make too many comparisons."

Even though Joaquin did not make the Charger squad, Luis is sure his brother will end up hooking on with another professional team.

"He's the one with the strongest leg and everything," Luis says. "He just never got the recognition with the school he went to. There's just no way I can see another kicker better than him."

He's not sure if Joaquin was hurt by not going to a major college.

"They'll find you if you're good enough," Luis says. "But I think (because of the larger school) they'll have more trust in you."

Does the family think that the name Zendejas will grace the backs of six professional uniforms in the near future?

"We all have the potential to be there," Luis says. "It's just the chance (that we need)."

"But I wouldn't doubt it."

Shain is a writer for *United Press International*.

Football notes

Total offense in I-A reaches all-time high

A record offensive Saturday

Forget those modest predictions about 1983 offensive figures we made a week ago—the ones about records “probably” falling. Just write in “definitely.”

National total offense in Division I-A last Saturday hit an all-time high 734.3 rushing-passing yards per game (both teams combined in 53 games). That wiped out the previous record of 732.0 on November 6 last year.

At the same time, passing yardage hit 384.5—second highest in history to the 393.9 November 6 last year. That pushed passing yardage for the season to 365.6—above the record for a full season of 364.8 last year. The season is not half over and offensive figures nearly always rise as the season goes on, so a record yardage figure seems certain. And total offense is 694.9 for the season to date, not far from the record 703.3 at the end of 1982.

Efficiency is phenomenal

Yards per passing attempt last Saturday hit 7.12 yards, bringing the season figure to 6.77, compared to the all-time high for a full season of 6.67 in 1977. Yards per total offensive play reached an amazing 5.11, pushing the season figure to 4.87—already above the record final mark of 4.84 a year ago.

Pass completion percent last Saturday hit 54.4. The average completion was 13.1 yards. And, there were 2.26 touchdown passes per game, so it was not just a matter of a lot of short passes. Once again, passing emphasis inched downward, as 37.6 percent of all plays were passes. Last year's final figure was 38.0 percent, a record.

The only explanation is that if you complete a higher percentage, you do not have to throw as often. Completion percentage now is 53.4 for the season—well above last year's record final figure of 52.2 percent. Interestingly, though, touchdown passes per game are still behind last year's pace, with 2.00 vs. a final 2.16—a record. A few more Saturdays like the last one could change that in a hurry.

Scoring, field goals soar

Scoring hit 46.6 points per game last Saturday—a figure exceeded only once in the past six years. It was 48.8 last November 13, also 46.6 last October 30; then, you must go back to November 12, 1977, when it was 47.0.

That pushed scoring for the season to 43.7 points per game, just barely below the record for a full season of 43.8 set last year.

Again, field goals were a major factor. There were 2.28 successful field goals per game, and accuracy reached 66.9 percent. Neither figure is a record, although the 2.28 is second to the 2.43 on November 6 last year (66.9 is not even the season high, believe it or not). For the season, however, accuracy now is 64.5 percent, well above the record-high 63.9 for 1982.

Record I-AA passing day

Passing yardage in Division I-AA hit an all-time high 359.9 yards per game last Saturday (both teams combined, 47 games), breaking the 358.1 on November 20 last year. That pushed the season figure to 326.6 and improved the chances of breaking the record 332.0, the final 1982 figure. Scoring for the day reached 42.8, pushing the season figure to 41.1 compared to the record final of 41.7 in 1981. The reason is field goals, now averaging 1.69 per game with 61.1 percent accuracy vs. the records of 1.59 and 60 percent in 1982.

24 catches—a record

Mississippi Valley State wide receiver Jerry Rice set an all-time, all-divisions, single-game NCAA record for pass receptions with 24 last Saturday night against Southern-

Greg Allen, Florida State, is the leading rusher in I-A with a 156.7 per-game average

Baton Rouge in Itta Bena, Mississippi. His catches went for 219 yards and one touchdown, and his team lost, 31-28. Rice once said, “I can catch 30 in a game if they throw to me.” By half time, the 6-3, 200-pound junior from Starkville, Mississippi (where he played end, quarterback and defensive back), had 12 receptions and even got in on the throwing end, completing a pass to quarterback Willie Totten. The former all-time, all-divisions NCAA record was 22 catches shared by the I-A record-holder, Jay Miller of Brigham Young (vs. New Mexico, November 3, 1973, for 263 yards) and the I-AA record-holder, Marvin Walker of North Texas State (vs. Tulsa, November 20, 1982, for 164 yards). (The Divisions II-III mark is 20.) (Chuck Prophet, Mississippi Valley State SID)

Young leads McMahon

Only four games have been played in Brigham Young's schedule, but BYU quarterback Steve Young is ahead of the all-time season record of 385.6 yards per game in total offense set by BYU's Jim McMahon in 1980 (4,627 yards in 12 games). Young's team is playing 11 games this season, so he probably has a slim chance of breaking the total-yards mark. But he is averaging 419.8 in total offense—372.8 passing and 47.0 rushing. McMahon averaged 380.9 passing and just 4.7 net yards per game rushing.

Young needs 2,563 rushing-passing yards in his last seven games (366.1 average) to break McMahon's record. That would give him a 385.64 mark to McMahon's 385.58. If he makes it, credit his outstanding running ability.

Auburn's schedule now toughest

With the season almost half gone, Auburn leads in the toughest-schedule rankings. Auburn's past and future Division I-A opponents now have a 24-8-2 won-lost-tied record for a .735 percentage against I-A opponents, excluding their games with Auburn.

Florida's schedule is second at .708, then come Penn State .650, Maryland .645, Missouri .638, Florida State .634, Kansas State .632, UCLA .610, Vanderbilt .600 and Georgia Tech .594 to complete the top 10.

In some ways, this looks familiar in comparison to the preseason toughest-schedule rankings using 1982 results exclusively. In other cases, it is quite different. UCLA's schedule was No. 1 in the preseason, Florida was third, Penn State fourth and Auburn fifth. Not too much changed there. But South Carolina's schedule, No. 2 in the preseason, ranks 79th now. Its opponents simply are not coming close to their 1982 pace. They are 14-19-3 for .431. Last year, the same teams were 72-37-3 for .656. Quite a turnaround.

Iowa quarterback Chuck Long ranks third in passing efficiency in Division I-A

The second 10 in the current rankings line up like this: Kentucky .590, Clemson .588, Northwestern .585, Purdue .585, Mississippi State .575, Wisconsin .575, Iowa State .573, Minnesota .571, Louisiana State .570 and Temple .569.

Florida A&M still leads in I-AA

In Division I-AA, Florida A&M led the preseason ranking and currently leads again, still by a wide margin. Florida A&M's past and future I-AA or I-A opponents have a 22-7-0 record against I-AA or I-A opposition for an elegant .759 percentage (Florida A&M actually plays no I-A opponents, but we need to explain the formula).

Nicholls State is second at .724, then come Prairie View A&M .706, Grambling .647, James Madison .615, Southeastern Louisiana .609, Alabama State .600, Davidson .579, Massachusetts .576, Richmond .568—that is the top 10.

In the second 10 are Delaware .567, Mississippi Valley State .556, Jackson State .552, Southern-Baton Rouge .552, Lafayette .542, Indiana State .539, Murray State .533, Southwest Missouri State .533, Alcorn State .531 and Holy Cross .529.

Fastest starts

Kentucky and Virginia are not the only fast-starters in Division I-A this fall but surely two of the fastest and certainly candidates to run neck-and-neck for most-improved honors. Kentucky under Jerry Claiborne is 4-0 compared to 0-10-1 last year, his first at the helm. Virginia won its first four for the first time in 31 years and is 4-1 vs. 2-9 last year, George Welsh's first on the job.

Among the conferences, the Southeastern is off to a leading 19-7-2 record against outside I-A opponents, with the Big Eight (19-11-1) and Big Ten (12-8-0) next. In I-AA, the Ohio Valley is 6-4 against outside I-AA and I-A foes and 11-5 in all outside games; the Southwestern is 4-2 and 8-4. We will have a complete rundown next week.

Columbia's Don Lewis is tied for fifth in I-AA receiving with 7.7 receptions per game

Quotes of the week

Southern Methodist split end Bobby Leach responding to a newsman's question about his 91-yard kickoff return with 0:04 left to beat Texas Tech 34-27 last year at Lubbock (it came after an across-the-field throwback pass from Blane Smith): “If I had a dollar for every time somebody asked me about that play, I'd be looking for tax shelters.” (Bob Condron, Southern Methodist SID)

Dartmouth coach Joe Yukica commenting at the weekly luncheon on sophomore kicker Craig Saltz-gaber, who was four-for-five in field goals against Army: “Once in a while, he has a double bogey; but there are a lot of birdies lined up in that leg.” (Bruce Wood, Dartmouth assistant SID)

When jet fighters from the Mississippi National Guard did a low-level flyover to commemorate Navy's first-ever football game in the state, more than a few hearts leaped with the noise level. After the dressing room had stopped vibrating, Mississippi State coach Emory Bellard quipped: “Don't worry, men. We're not playing them (the Air Force) tonight.” (And State beat Navy, 38-10.) (Bo Carter, Mississippi State SID)

William Paterson coach John Crea on why he removed quarterback Derrick Young from the game after a hard hit with his team in the lead: “Derrick started calling audibles we didn't have in the playbook.” (Russ Mensel, William Paterson SID)

Morehead State coach Steve Loney, in a bad mood after a 35-0 loss to Marshall, was headed for the interview room and coughing and sneezing when a reporter asked him if he had a cold. Loney replied: “No. I'm trying to commit suicide by pneumonia.” (Craig Bohnert, Morehead State SID)

Oklahoma State tailback Shawn Jones fumbled the ball away twice early to set up two Texas A&M field goals and came back to rush for 203 yards, leading his team to a big

Second in I-AA punt returns (18.2 average) is Gary Clark of James Madison

victory. Said Jones: “I was trying to figure why that football kept falling out of my hands. It's funny how you start to realize how funny that ball is shaped. I just hope my dad didn't turn the TV set off after the first quarter.” (Pat Quinn, Oklahoma State SID)

Arkansas' Kevin Wyatt likes to talk kiwee with teammates Greg Gatson and Bobby Joe Edmonds. Kiwee? Says Wyatt: “When speaking kiwee, you talk in reverse or associate names with objects or other names. For example, Razorbacks would be Schick-fronts—Schick is associated with razors, and fronts is the opposite of backs.” It works with names, too, explains Wyatt, son of former major-league pitcher John Wyatt: “We call coach (Jesse) Branch coach Clark-tree. Clark comes from Jessie Clark (former Arkansas fullback), and tree is related to branch.” Sorry you asked? (Rick Schaeffer, Arkansas SID)

Steven Kirtley is a 24-year-old Marine sergeant who spent 14 months as a hostage in Iran. Now, the government is paying his way through the University of Florida, and he is living out a beautiful fantasy as a walk-on football player (he did not even play high school football). Kirtley, 6-3 and 205, is a fifth-string linebacker. Asked what he said on a lecture tour before enrolling at Florida, Kirtley told Bob Oates of the Los Angeles Times: “When people wanted to know if my life was in danger all that time, I told them, yes. The Iranians almost bored us to death.” (Andy Pollack, Florida assistant SID)

When Philadelphia scout Jim Katcavage visited the Pittsburgh athletics department recently to pick up some statistics, he rattled off the names of the Pitt seniors who impressed him, then added, “And a kid I really like, although I wish he were taller, is that number 6. His name is hard to pronounce—what is it?” A secretary turned and interjected, “His name's not that hard to pronounce. It's Wenglikowski. Wing-la-cow-ski.” Katcavage just smiled. “Let's just call him Alan, OK?” Replied Melissa Wenglikowski: “He's my husband, and I sure hope he's big enough to get drafted.” (Jim O'Brien, Pittsburgh SID)

With all the hoopla about the 12th-man kickoff team at Texas A&M, most have passed over a walk-on football player with an unusual and appropriate last name—Ernest Walkup, a senior linebacker from Houston. (Ralph Carpenter, Texas A&M SID)

Senior split end Lennie Jacosky is a standout both on the field and in the classroom, with a perfect 4.000 grade average as an accounting major. (Mike Bovino, Wayne State SID)

Attendance gap wider

Attendance remains down slightly in both Division I-A and Division I-AA, and the gap is a little wider than last week in both divisions. In I-A, the drop is 1,410 per game or 3.28 percent, and the decline in percentage of capacity is almost identical—from 81.1 to 78.5 or 3.21 percent. In I-AA, however, it seems to be merely a matter of scheduling differences, because while per-game attendance is down 279 or 2.42 percent, percentage of capacity is up—56.5 percent now vs. 54.6 a year ago at this same stage:

	Games	Attendance	Per-Game	Capacity
Division I-A season figures to date	228	9,493,896	41,640	78.5
Same 105 teams at this stage in 1982	234	10,073,724	43,050	81.1
Division I-AA season figures to date	166	1,867,360	11,249	56.5
Same 84 teams at this stage in 1982	172	1,982,744	11,528	54.6

TV in the News

ACC enters pay-cable agreement

The Atlantic Coast Conference will enter the field of subscription cable television this winter, offering a special package of 20 men's basketball games.

The ACC, Raycom-Jefferson Productions, and the Entertainment and Sports Programming Network will offer the "season ticket" package to cable television subscribers in the conference area. Nonsubscribers will have ESPN blacked out during the cablecasts.

According to a Raycom executive, the package would be offered for something "in the \$50-\$75 range." No single games will be offered.

The agreement is separate from a three-year, \$18-million contract between the ACC and Raycom, which also syndicates games to ESPN. The ACC also has agreements with NBC-TV and CBS-TV. Nearly all 63 conference games, including the postseason tournament, will be televised under terms of at least one of the agreements, according to Commissioner Robert C. James.

NBC names Vaughn to new post

Martin Vaughn has been named administrator, sports programming, for NBC Sports. He had been working in the NBC Associates Program since last year.

In his new post, Vaughn will serve as a liaison between sports management and affiliate relations pertaining to sports clearances. He also will be involved in scheduling college basketball, college football bowl games, and professional football and baseball.

Vaughn, a 1975 graduate of Pennsylvania, was a two-time all-Ivy League quarterback for the Quakers.

Pac-10 signs television pacts

New, three-year agreements with CBS-TV, NBC-TV and MetroSports have been signed by the Pacific-10 Conference, assuring that league its most extensive coverage of men's basketball.

A total of 47 games will be televised this season, featuring all conference schools. Each telecast will be released in the conference area, while the networks will carry six games nationally. MetroSports will syndicate selected games to the Entertainment and Sports Programming Network.

Rozelle unfazed by poor showing

Through the first four weekends of the 1983 season, the National Football League has experienced falling television ratings and dwindling attendance. Neither NFL Commissioner Pete Rozelle nor Val Pinchbeck, the league's director of broadcasting, expressed any dismay at the figures.

"We wait until baseball's regular season ends, when we get into full-time football weather," said Pinchbeck. "Then, we make a few comparisons based on previous years. We don't sit down and go through the numbers until we feel it's meaningful to do it."

Rozelle cited several factors in explaining the figures: tight baseball pennant races, generally good weather over the Labor Day weekend, the media attention to drug problems in the NFL, the after-effect of last season's seven-week players' strike and the spring-summer exposure of the new United States Football League.

League to get its best coverage

Metropolitan Collegiate Athletic Conference men's basketball will receive the most extensive television coverage in its history this season, as 51 games will be televised under five different agreements.

Two regional syndication packages—with Sports Productions, Inc., of Dallas and Tanner Sports Network of Memphis—will telecast a total of 31 Metro games. A dozen contests will be carried on network television (seven by NBC-TV and five by CBS-TV). National cable sports networks will account for 11 more appearances—USA Network with nine and the Entertainment and Sports Programming Network with two.

In all, 34 league games will be televised, representing 63 percent of the league's 54-game regular season.

Sports operations manager named

NBC Sports has named William Jarr manager of sports operations.

Jarr will act as liaison between the production and technical areas of NBC Sports. Besides working closely in the implementation and coordination of sports production requirements, he will coordinate feed distribution and be responsible for integrating programming while coordinating the total sports presentation.

Jarr joined NBC in 1980 as a broadcast control manager in the network on-air operations area.

Four high school all-star games denied certification by NCAA

Four applications for certification of high school all-star basketball games, including the Dapper Dan Roundball Classic, were denied by the NCAA All-Star High School Games Committee in its September 20-21 meeting in Kansas City.

The committee also refined certain criteria used in evaluating applications and recommended to the NCAA Council the adoption of a new criterion that states that "payment of expense shall be limited to players and coaches actually participating in the game."

The committee noted that the organizers of the Dapper Dan Classic, the third-largest event in terms of gross income, failed to meet two criteria: Participants had been permitted to play without having taken part in the organized practice sessions, and the contest was in violation of criterion No. 4, which states, in part, that "not more than 60 percent of the game's gross receipts can be consumed by expenses directly connected with the administration and conduct of the event."

Financial reports revealed that the Dapper Dan had exceeded this limitation twice in the past three years.

College baseball attendance sets another record in '83

College baseball attendance set another record in 1983, its fourth in succession, but the rate of growth declined because of generally poor weather nationally.

According to Collegiate Baseball, 1983 attendance for college and junior college baseball teams was 12,896,497, a 14.5 percent boost over 1982.

The attendance jump from 1981 to 1982 was a dramatic 2.8 million,

Two coaches' associations join forces

The National Collegiate Women Swim Coaches Association has merged with the College Swimming Coaches Association of America into an organization that will, in the words of CSCA president Sam Freas, "serve as a united voice for inter-collegiate swimming." The group will retain the latter organization's name.

The merger was approved unanimously by both organizations at their recent annual meetings.

Freas, head swimming coach at the University of Arkansas, Fayetteville, explained that the women's organization had grown with the development of the Association for Intercollegiate Athletics for Women (AIAW).

"Now, with the NCAA governing all of intercollegiate athletics, it was felt by both organizations that a merger would provide better communication with the NCAA."

"It is obvious that the NCAA wants to do everything it can to help further collegiate swimming," Freas continued. "On very short notice, a representative of the Association was on hand at our Las Vegas meetings to explain the organization and operation of the NCAA. It was very helpful and greatly appreciated by all of the coaches."

Penny Lee Dean, head women's swimming coach at Pomona-Pitzer Colleges and a member of the NCAA Women's Swimming Committee, was scheduled to serve as president of the women's organization this year. With the merger, she will become president of the CSCA at the end of Freas' two-year term.

Also denied certification was the Western Pennsylvania Basketball Classic, formerly known as the Colt Classic. That event exceeded the 60-percent limitation for the past two years, issued complimentary tickets for the 1983 game, did not donate net proceeds from the 1983 event to a charitable or educational purpose and missed the deadline for 1984 application.

Certification was withheld from the Huntington Tip-Off Tournament in Huntington, Indiana, and the Flint Hills All-Star Game in Emporia, Kansas. Applications from both contests missed the deadline.

The committee approved 52 contests and took no action on 12 others, pending submission of further information.

Eight applications were approved for new all-star contests; two were denied certification, and no action was taken on two others.

The committee denied a request by a high school coaches' association in Nebraska that legislation be recommended to authorize state coaches' associations to certify summer intrastate all-star contests. Those games are not certified under existing procedures.

The committee defined practice sessions referred to in criterion No. 9 as "official practice sessions at which one of the all-star game's coaches would be in charge."

The concept of complimentary tickets, as it applies to criterion No. 4, was further defined. The committee noted that free admission to members of the working press and to members of participatory uniformed support groups—including marching bands, cheerleading squads, pompon squads and drill teams—would not be a violation.

Outside corporations not involved in the sponsorship of the game are permitted to purchase tickets for distribution. However, passes for college scouts, parents, children and chaperons of game participants, or passes used by high school conference administrators and coaches to gain admittance to regular-season contests, will be considered complimentary tickets and will not be allowed.

The committee also has requested that all requests for consideration of applications be handled through the NCAA national office. Requests of this nature have been handled by members of the committee.

West Virginia program censured and reprimanded

West Virginia University has been publicly reprimanded and censured by the NCAA Committee on Infractions for violations occurring in the recruitment of a prospective student-athlete in men's basketball during the spring of 1983.

The penalty does not include sanctions, and the university remains eligible for postseason competition and television appearances in basketball.

"Three recruiting violations were found involving a prospect who did not attend the university," said Charles Alan Wright, NCAA Committee on Infractions. "The violations also involved an outside athletic representative, although his actions did not appear to represent intentional improprieties."

"In this regard, however," Wright stated, "the committee believed that a public reprimand was warranted to emphasize the university's responsibility to exercise diligence to avoid future recruiting violations in its recruitment of basketball players."

The Committee on Infractions found violations related to recruiting contacts, local automobile transportation and entertainment.

compared to 1,638,227 from 1982 to 1983.

Attendance figures were compiled by a special nationwide survey, from which projections of estimated attendance were made.

The University of Miami (Florida) again paced the nation's colleges with 139,843 fans. Texas was second with 112,775, followed by Arizona State (93,828).

Increased promotions, along with improved facilities, more comfortable stadiums and better programs, all helped boost overall attendance, despite some of the worst weather in recent years.

The 1983 season was notable for increased attention to the college game, especially the NCAA Division I Baseball Championship in Omaha, Nebraska, which was carried nationwide by the Entertainment and Sports Programming Network. At Omaha, the turnout of 115,700 was an all-time record for nine sessions, compared to the previous mark of 106,141.

Here are the top 10 college teams in 1983 attendance: 1. Miami (Florida), 139,843; 2. Texas, 112,775; 3. Arizona State, 93,828; 4. Arizona, 54,109; 5. Mississippi State, 54,017; 6. Alabama, 47,500; 7. Brigham Young, 45,593; 8. New Orleans, 41,016; 9. South Carolina, 37,100; 10. Tulane, 31,158.

WAC plans basketball tournament

The first Western Athletic Conference postseason basketball tournament will involve all nine league schools, with the regular-season champion and runner-up receiving byes into the semifinals.

First-round games will be played March 5 at on-campus sites, followed by two more on-campus games March 7. The regular-season champion will host the semifinals and final March 9-10.

The winner of the postseason tournament will represent the conference in the 1984 NCAA Division I Men's Basketball Championship.

Requirements set for trainers

With the passage of a bill sponsored by Rep. James Russell of Florissant, Missouri, athletics trainers in the state of Missouri now must meet requirements established by the Missouri Board for the Healing Arts.

Effective September 28, all trainers must meet various educational requirements before being permitted to take an examination administered by the board.

Goals of the new legislation are to enhance the professionalism of athletics trainers and ensure even higher quality care for athletes in all sports at all levels.

David E. Colt, public relations officer for the Missouri Athletic Trainers Association and trainer at Northwest Missouri State University, said athletics trainers at all levels must meet the new requirements.

Soccer spearheads growth in women's sports

Heidi Comeau, Vermont

By James A. Sheldon
The NCAA News Staff

Often neglected in discussions of the "soccer boom" in the United States is the growth of women's soccer. But, if recent trends on the collegiate level continue, women's soccer soon may be too big to miss.

Recent figures indicate a 29 percent increase in NCAA member institutions that sponsor women's intercollegiate varsity soccer. That is the largest percentage increase in the sponsorship of any NCAA women's sport since the transition from the Association for Intercollegiate Athletics for Women to the NCAA.

Last year, 104 NCAA members sponsored women's soccer when the Association conducted its inaugural women's soccer championship. This year, that total is 133; 32 programs were started and three dropped.

Reflective of the sport's growth is the formation of the first United States national women's team. Five current collegiate players were named to the 18-woman squad: Tara Buckley, back, University of Connecticut; Heidi Comeau, forward, University of Vermont; Joan Dunlap, forward, University of North Carolina, Chapel Hill; Cindy Jones, back, University of Central Florida, and Tina Luft, midfield, Texas A&M University.

Former University of Washington men's soccer coach Mike Ryan was named to head the squad; and, as his player selection would indicate, he is aware of the quality of play in the NCAA.

"In the past few years, it's been just tremendous," Ryan said. "I coach a women's amateur team here in Seattle, and the average age of my

players is 26. But none started playing soccer until she got to college.

"Now, the girls you're looking at in college have been playing seven, eight, nine, even 10 years. Their skill level is much higher."

Ryan hopes to expose his squad to international competition for the first time "hopefully over the holidays in Miami, maybe against Mexico." The major obstacle is a final commitment on corporate sponsorship, a necessity because of financial troubles at the United States Soccer Federation, the sport's governing body.

From that beginning, Ryan hopes eventually to compete against the world's top teams. A European women's championship is being conducted for the first time this year, and the Federation Internationale de Football Association (the world governing body) is laying the groundwork for a women's world cup.

Ryan believes that spectator interest will continue to grow on all levels—youth, collegiate, national and international.

"If there is a difference between

men's and women's soccer," he said, "it is that the women are enjoying their soccer. You hear it in their voices, and you see it in their play. With the men, it becomes a macho thing. There is no joy in their game."

"As Pele once said, 'Soccer is a beautiful game.' And women play it beautifully."

Here is a rundown on the new NCAA women's soccer programs:

Division I—Colgate University, Holy Cross College, Niagara University, North Carolina State University, Providence College, St. Bonaventure University, Siena College, Stanford University, Texas A&M University, Villanova University, Xavier University.

Division II—University of California, Davis; California State Polytechnic University, Pomona; Rollins College; Southampton College; Southern Illinois University, Edwardsville.

Division III—Brockport State University College; Clarkson Institute of Technology; Connecticut College; Johnson State College; Kean College; Marymount College of Virginia; Nazareth College; North Carolina Wesleyan College; Randolph-Macon Woman's College; St. Benedict's College; University of Scranton; Southwestern College (Tennessee); State University of New York, Stony Brook; Sweet Briar College; Thomas College; Virginia Wesleyan College.

Students' gift benefits community

By Linda K. Lukas

Before January 1980, there was not an ice skating facility within 50 miles of Connecticut College, a small school of 1,600 students located in New London, Connecticut. The students skated on frozen ponds, and an informal hockey club played in the Wesleyan Intramural League and against other clubs whenever ice time was available.

But in 1979, a generous gift from two students and their families made a new ice arena on campus a reality. Additional gifts came from alumni and the New London community.

The 28,800-square-foot arena was designed by Daniel F. Tully Associates, Inc., architects/engineers, and constructed in just nine months by Creative Building Systems, Inc., construction management, both of Melrose, Maine.

The design/build team specializes in recreational facilities and has built skating rinks for the University of Maine, Orono, and Dalhousie University in Halifax, Nova Scotia.

Shortly after occupying its new arena, Connecticut College gave varsity status to its ice hockey pro-

gram, which now competes at the NCAA Division III level. At present, more than 1,700 people from the campus and community use the facility each week. The structure formally was named the Dayton Arena in the fall of 1982.

Programs offered in the facility from mid-October to mid-March for students include men's varsity ice hockey, figure skating, women's club ice hockey, intramural ice hockey, skating classes and open skating.

Community programs include the Southeastern Community Youth Hockey League, consisting of 22 teams up to the high school level; figure-skating classes; six sessions each week of public skating, and Senior Men's Hockey League, a college/community organization consisting of 12 teams for players 18 years and older.

Charles Luce, director of athletics at Connecticut College, feels the rink has helped attract prospective students to the campus. "And," he said, "the arena also has been a vehicle for good will by connecting the college with people in the community."

Unlike many rinks, the Dayton

Arena is operated year-round. After the skating season ends in mid-March, a synthetic flooring is placed over the concrete slab for intramural soccer and tennis and then is removed for ice making in early October.

The \$2.2-million arena features a gabled wood hyar roof system, which spans 130 feet with no interior columns and provides a warm wood interior of Douglas fir shells and beams. In addition to the 120-by-120-foot rink, the facility houses seating for 546, shower/dressing rooms, a concession area, storage and offices.

The patented hyperbolic-paraboloid roof system is composed of 32 double-curved, saddle-shaped shells of laminated layers of plywood, with 16 shells on each side of the building. Laminated edge beams that support the shells transmit the entire roof load to precast concrete abutments around the perimeter of the building.

The rink is economically self-sufficient. Its energy-saving system, as well as funds generated by community rentals, enable the college to operate the rink with a break-even budget.

"The cost to operate our rink is miniscule in comparison to other rinks," said Luce. The college reported an expenditure of approximately \$14,000 to operate and light the facility in 1980-81, a fraction of the cost of a conventional ice rink.

"We even made ice in July for two weeks during 1981 during a hot spell to see if it would work, and it did," said Luce.

According to William H. McGrath, the designer of the rink's energy system, the low operating cost is attributable to the high insulating values used, high-efficiency metal-halide lamps, reuse of heat produced by the ice making process and the design of a high-efficiency ice-making system.

Waste heat is used for service water preheating, ventilation air heating and space heating. Excess waste heat from high activity periods is stored under the building in a shallow, crushed-rock bed for later use.

Refrigerant and cooling water circulation costs are reduced by low-resistance piping techniques to less than half of conventional values.

And now, Connecticut College is constructing a new \$3.9 million athletic center addition that will connect to the existing Dayton Arena. The 54,430-square-foot facility is expected to be completed in the fall of 1984 and hold basically the same architectural and energy-cost saving principles as the rink.

Linda K. Lukas is a business development coordinator for Daniel F. Tully Associates, Inc., of Melrose, Massachusetts.

New publications available

Four new books in the series of NCAA publications are available this month, including the 1983-84 edition of the NCAA Directory.

The Directory contains a complete list of member institutions, allied conferences and affiliated organizations and includes a list of the membership by division, with a list of those institutions that have specific sports in divisions other than their membership division.

The Directory also contains information about the organizational structure of the Association. The cost is \$2 for members and \$4 for nonmembers.

Also available are playing rules for skiing and rifle. The 1984 Men's and Women's Skiing Rules and the 1984 Men's and Women's Rifle Rules sell for \$1.50 each.

The fourth new edition to be shipped in October is the Basketball Statisticians' Manual, which costs \$2.75.

To place an order or to inquire about bulk rates, contact NCAA Publishing, P.O. Box 1906, Mission, Kansas 66201. Payment, which includes fourth-class postage, should accompany all orders. Those who want books mailed first class should include \$2 for postage for each book.

Championships Corner

1. The NCAA Women's Soccer Committee will conduct its annual meeting December 12-15 in Kansas City and will attempt to select a site for the 1984 National Collegiate Women's Soccer Championship at that time. Institutions interested in submitting a proposed budget to serve as the host for the 1984 championship should contact Patricia E. Bork, director of women's championships, at the national office, or Jean E. Tuerck, chair, NCAA Women's Soccer Committee, University of Cincinnati, Cincinnati, Ohio 45221, prior to November 15.

2. The NCAA Men's and Women's Track and Field Committees are seeking proposed budgets from institutions interested in serving as hosts for the 1984 and 1985 Division I Men's and Women's Cross Country Championships. Institutions interested in hosting either event should contact Dennis L. Poppe or Cynthia L. Smith, assistant directors of championships, at the NCAA national office or the chairs of the Men's and Women's Track and Field Committees: Ruth Marske, South Dakota State University, Brookings, South Dakota 57007, or Albert Buehler, Duke University, Durham, North Carolina 27706.

Nominations being accepted for Today's Top Five awards

Nominations are open for NCAA Today's Top Five awards for outstanding student-athletes in fall sports and for the Association's Award of Valor.

Nomination forms have been mailed to all member institutions and must be returned to the national office by November 1 to be considered for the awards, which will be presented at the honors luncheon during the 1984 Convention in Dallas.

Nominees for Today's Top Five must be seniors and must have earned a varsity letter in the sport specified. There is no limit on the number of student-athletes an institution may nominate, whether from one sport or from several sports; neither is there a limit on the number of winners from an institution.

Selection of winners will be based 40 percent on athletic ability and achievement; 40 percent on academic achievement, and 20 percent on character, leadership and involvement in campus activities.

The Award of Valor is presented to a coach or administrator currently associated with intercollegiate athletics, or to a current or former varsity letter winner at an NCAA member institution.

Nominees, when confronted with a situation involving personal danger, must have averted or minimized potential disaster by courageous action or noteworthy bravery.

Completed forms should be returned to David E. Cawood, assistant executive director, at the NCAA national office.

Scholarship nominations deadline is October 28

NCAA faculty athletic representatives have until October 28 to nominate student-athletes in football for NCAA postgraduate scholarships.

A total of 25 awards of \$2,000 each are available. Six will be selected from Division I, six from Divisions II and III, and 13 on an at-large basis.

Faculty athletic representatives who plan to submit nominations are asked to use the following guidelines:

1. Nominate no more than two candidates.
2. Use and complete the appropriate forms supplied by the national office, providing complete information.
3. Include a copy of the student-athlete's transcript with each application. Also include any entrance or

placement examination scores and a Graduate Record Examination score, if available.

4. Mail the completed forms and other information in one package to the appropriate district selection committee chair. The deadline is October 28.

Final selections will be made in December by the NCAA Postgraduate Scholarship Committee.

In all, 90 grants will be awarded during the 1983-84 academic year by the committee. In addition to the 25 football awards, 20 will be presented to basketball players (10 men and 10 women) and 45 in sports other than football or basketball (25 men, 20 women) in which the NCAA conducts championship competition.

Discount fares available

The NCAA travel service has announced special discount fares available from several airlines for delegates traveling to the 1984 NCAA Convention in Dallas, Texas.

Special discounts of up to 45 percent off normal economy fares have been secured with Eastern and American Airlines, and super-saver discounts are available with a number of other carriers.

Restrictions that normally apply to discount rates will not apply for these special arrangements the travel service has made with each airline.

Reservations for the special rates to the 1984 Convention, to be held January 9-11 at Loews Anatole in Dallas, can be made by calling Fugazy International Travel, which handles all NCAA travel. Special fares to the Convention are available only by calling the NCAA travel service's 24-hour, toll-free number—1-800/243-1800. Persons living in Alaska, Connecticut, Hawaii or Puerto Rico should call collect at 0-203/562-6222.

Arrangements may be made with the travel service to have the tickets billed directly to the individual or the member institution.

NCAA Record

DIRECTOR OF ATHLETICS

RICHARD GOLLNICK, head track and cross country coach at Tri-State, has assumed additional responsibilities as acting AD.

ASSISTANT DIRECTORS OF ATHLETICS

DENNIS HELSEL appointed assistant AD for business affairs at Old Dominion. Helsel has been director of special events at Penn State. **ROB HALVAKS** promoted to assistant AD for business affairs at California-Irvine. Halvaks has been athletic business manager the past two years and served as SID from 1979 to 1981.

PRIMARY WOMAN ADMINISTRATOR

DONNA M. KRAVABLOSKI, former director of women's physical education and women's volleyball coach at Southwestern (Kansas), named acting coordinator of women's athletics and women's volleyball coach at Jersey City State.

COACHES

Baseball **WALT WOODS** selected at Monmouth (New Jersey), replacing **LOU DELAURO**, who resigned to pursue a private business venture. Woods, a 1972 graduate of Springfield, previously coached at Middletown, New Jersey, South High School.

Baseball assistant **JOSEPH DESHEPPO** appointed at Monmouth (New Jersey).

Men's basketball **DICK HACK** named at Tri-State.

Men's basketball assistants—**KELLY JOBE**, a former NAIA all-America at Oklahoma Christian, will be a graduate assistant at Cincinnati this year. **LARRY BLACKFORD** chosen at Liberty Baptist. Blackford coached three years at Sayre High School in Lexington, Kentucky. **KEITH HUGHES** appointed at Fresno State on an interim basis. Hughes directed the College of the Sequoias (California) to the state junior college championship two years ago. **JERRY MARTIN**, assistant coach at Ohlone College in Fremont, California, named at Castleton State. **ROBERT BARONI**, previously an assistant coach at Bridgeport and Fairfield, selected at Hartford.

BOB HUGGINS, 71-26 in three seasons at Walsh College in Canton, Ohio, selected by new head coach Charles Machock at Central Florida. Huggins led Walsh to a 34-1 record last year, including a trip to the NAIA national tournament in Kansas City.

Women's basketball **PATRICIA TORZA** appointed at Marist.

Women's basketball assistants—**FERN LEE** and **KATHY SHEARER** selected at Adelphi. **MARK FAVA**, a graduate of Manhattanville, chosen at Mercy.

Men's cross country—**IAN DALEY** named men's cross country and track coach at Maryland-Eastern Shore. A native of Jamaica, Dailey was a two-time all-America in the NCAA indoor 600-yard dash for Eastern Shore.

Field hockey assistants—**JUDY JACOB** hired at Muhlenberg. **EMILY GOODFELLOW**

YEOMAN, who earned 12 letters in three sports at Princeton, named at her alma mater. She participated in field hockey, lacrosse and squash.

Men's golf—**TONY JOY JR.**, a four-year letter winner at Youngstown State from 1971 to 1974, named at his alma mater. Joy is golf pro at Avalon Golf Course in Youngstown, Ohio. **LURA EVANS** named acting coach at East Stroudsburg, replacing **ARNE OLSON**, who is on sabbatical.

Men's golf assistant—**JOE HORLEN**, former major league pitcher with the Chicago White Sox and Oakland A's, appointed volunteer assistant at Texas-San Antonio.

Men's ice hockey—**ROB RILEY**, former standout as a player at Boston College, selected at Babson. Riley has been an assistant at St. Lawrence the past four years. **JIM CROSS** has announced his resignation at Vermont, effective at the end of the 1983-84 season. Cross will remain head golf coach and a teacher in the physical education department.

Men's ice hockey assistants **MARK MILLER**, former captain of the Michigan men's ice hockey team, named at his alma mater. Miller was selected as the team's most valuable player after the 1978-79 season. **JON OLSON** chosen at St. John's (Minnesota). Olson played at St. Scholastica, helping his team to two NAIA national championships in the late 1970s. **KEN KUZYSK** hired at Rensselaer. He played four years at Boston U., helping the Terriers to three NCAA final-four appearances.

Men's soccer assistants **CARLOS MADEIRA** named at Muhlenberg. **TONY DICICCO**, former goalie for Springfield, chosen at Hartford. Dicicco was a member of the 1973 U.S. national team.

Women's softball—**CYNDI LOCOCO** appointed at Wright State. She has been an assistant the past two years.

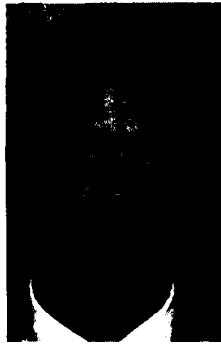

Men's swimming—**MARK MILLIGAN** chosen at King's. **PETER BROWN**, an assistant at Delaware the past two years, selected men's and women's coach at Old Dominion, replacing **BILL EHRHORN**.

Men's swimming assistant—**JANE BARKMAN BROWN**, head women's swimming coach at Princeton since 1977, named men's and women's assistant at Old Dominion.

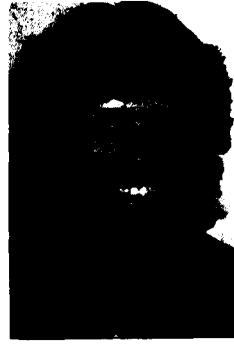

Women's swimming—**PETER LINDSAY**, men's and women's coach at Western Michigan, appointed at Michigan. He is a graduate of Miami (Ohio).

Men's tennis—**LEIGHTON JONES**, a former all-conference performer at Morehead State, named at his alma mater, replacing **GEORGE SADLER**, who retired after 14 years. Jones is the No. 2-rated player in Wales.

Men's tennis assistant—**DENNIS BIANCO**, a four-year letter winner at Youngstown State from 1972 to 1976, named men's and women's assistant coach at his alma mater. He was team

Rob Riley has been named the new men's ice hockey coach at Babson

captain during his senior season.

Women's tennis—**VICKI NEBINGER** hired at Christopher Newport, where she advanced to the NCAA Division III championship as a collegian. **CAROLYN WEEMS**, a former player at Clemson, selected at Old Dominion. Former Florida all-America **CISSIE DONIGAN** named at Georgia. Donigan was the No. 1 player on the 1982 Gator team that ranked fourth in the nation.

Women's volleyball—**DONNA M. KRAVABLOSKI** chosen at Jersey City State (see primary woman administrator).

STAFF

Academic adviser—**JOE DONAHUE** named at Monmouth (New Jersey).

Assistant promotions director—**STEVE BURKHEAD**, a graduate intern at Wake Forest last year, named at Old Dominion.

Sports information director **ALEX LOJ** appointed at Brockport State.

Assistant sports information director—**BARRY SMITH** selected at Fresno State. Smith has been a student assistant at Ohio State the past two years while earning his master's in sports administration.

Sports psychology—**DENNIS FORBES** named director of sports psychology at Army. Forbes is an associate professor in the department of physical education at Army.

Trainer—**KATHRYN ANN KOSHANSKY** appointed at Stony Brook State, replacing **JOE KOLB**, who joined the New York Arrows of the Major Indoor Soccer League.

Assistant trainer—**DANNY GOUR** chosen assistant trainer and equipment manager at Northwestern State (Louisiana).

CONFERENCES

CLARENCE W. UNDERWOOD JR., assistant athletics director at Michigan State University, named assistant commissioner of the Big Ten Conference. Underwood earned his doctorate at Michigan State in 1982. **BILL GANNON**, sports information director at Regis, named information director for the Continental Divide Conference. Gannon also is information director for the Rocky Mountain Intercollegiate Soccer League.

NOTABLES

The U.S. Sports Academy has made the following appointments: **GARY BRACKLE**, former assistant SID at Temple, named coordinator of public relations for the academy's project at Riyadh, Saudi Arabia; **JAMES THOMA**, former women's track coach at Otterbein, appointed project director and athletics coach for the academy in Sabah, East Malaysia; **JOHN OSLAND**, head men's track coach at Concordia (Minnesota), named coordinator of fitness-athletics in Riyadh; **TONY ZUNIGA**, former all-America cross country performer at Texas-El Paso, named athletics coach for the academy in Sabah. **CURTIS McCLINTON**, former Kansas running back and all-pro with the Kansas City Chiefs of the National Football League, named deputy mayor in Washington, D.C. Penn State assistant AD **DELLA DURANT** elected treasurer of the Council for Collegiate Women Athletic Administrators. **PAUL O'DONOGHUE**, tennis player at Oklahoma City, named winner of the Midwestern City Conference medal of honor, symbolic of the league's outstanding student-athlete. **Manhattanville** swimming coach **JOHN COLLINS** selected coach of the year by the American Swimming Coaches Association. **ANNE McCLOSKEY**, assistant AD and women's lacrosse coach at Loyola (Maryland), elected president of the Intercollegiate Women's Lacrosse Coaches Association.

DEATHS

RAY RANGELIS, 54, former basketball player at Northwestern, died September 19 in Chicago. Rangelis coached at Lake Forest and Northwestern. **SAMUEL COZEN**, 75, who compiled a 213-94 record in 15 years as basketball coach at Drexel, died September 21 in Philadelphia.

Briefly in the News

North Carolina State University men's basketball coach **Jim Valvano** has established an endowed scholarship in his name at his alma mater, **Rutgers University, New Brunswick**. The awards will go to students with outstanding academic credentials who are members of or candidates for an intercollegiate athletics team. **University of Nebraska, Lincoln**, women's volleyball coach **Terry Pettit** must have known his team had a good chance for the title in the **San Diego State University** Invitational Tournament. Pettit said he knew this must be his most mature team in seven seasons because while "we were in San Diego, no one asked if we could see the zoo and the ocean."

Harvard University and **Yale University** will meet for the 100th time on a football field November 19 at the Yale bowl. Yale leads the series, 54-37-8. **East Tennessee State University** surprisingly can match the brother act on the **University of Michigan** football squad (Briefly in the News September 12). The Bucs also have four sets of brothers: **Dan and David Carmichael** of Dothan, Alabama; **Henry and Pernel Latham** of Sweetwater, Texas; **Lamar and Sidney Sherman** of Greer, South Carolina, and **Greg and Rick Mullins** of Clintwood, Virginia. Women's tennis has joined the varsity sports program at **Stevens Institute of Technology**.

Earl Campbell has been named the greatest athlete in the history of the **University of Texas, Austin**, in a newspaper poll of readers in Austin, Texas. Campbell was a running back for the Longhorns and won the 1977 Heisman Trophy.

It almost was a foregone conclusion that **Jeff Paul** and **Ed Hackett** would be elected cocaptains of the **University of Maine, Orono**, baseball team for 1984. The two seniors, who live across the street from each other in Orono, were cocaptains of the football, basketball and baseball teams in high school. **Brad Kay** of **Millikin University** says that kicking the football and hitting a golf ball are a lot alike. At least, a stationary object is involved in each case, and the concentration required is the same, Kay says. Being a kicking specialist allows him to participate in football without affecting his golf game. He was one of three amateurs to qualify for the Western Open last year. **Christine Well**, professor of physical education at the **University of Arizona**, has been honored by the Women's Sports Foundation for outstanding contributions to women's sports by an individual. Lt. Col. **Micki King Hogue**, deputy director of athletics at the U.S. Air Force Academy, has been named to the foundation's hall of fame.

Ohio State University has two goals concerning the Big Ten Conference football championship. The Buckeyes, in addition to seeking a Rose Bowl berth, intend to keep their No. 1 position in the conference in terms of academic all-Americans, now at 16 over the years. Three starters on the football team will be nominated for the honor this year; **John Frank**, tight end and an academic all-America last year; defensive tackle **Dave Crecelius**, and middle guard **Spencer Nelms**.

Head over heels

Virginia fullback Voga Wallace has gained national and even international exposure with his unusual somersault throw-in. The tactic is

designed to improve distance, and Wallace's "flips" have been an important offensive weapon in the Cavaliers' arsenal.

The NCAA News

The Market

Readers of The NCAA News are invited to use The Market to locate candidates for positions open at their institutions, to advertise open dates in their playing schedules or for other appropriate purposes.

Rates are 35 cents per word for general classified advertising (agate type) and \$17.60 per column inch for display classified advertising. Orders and copy are due by noon five days prior to the date of publication for general classified space and by noon seven days prior to the date of publication for display classified advertising. Orders and copy will be accepted by telephone.

For more information or to place an ad, call 913/384-3220 or write NCAA Publishing, P.O. Box 1906, Mission, Kansas 66201.

Positions Available

Fund Raising

Assistant Athletic Director—Revenue. Wake Forest University seeks applications for the position of Assistant Athletic Director—Revenue. This job entails the supervision, in cooperation with the University Development Office, of all athletic fund-raising at the university with specific responsibilities in the area of large gifts, both capital and endowed. The position will report to the athletic director and will coordinate capital fund-raising with the vice president for development. Qualifications: Bachelor's degree, experience in fund-raising for colleges and universities, and experience in intercollegiate athletics and solicitation of individual corporate donors preferred. Rank and salary: This is a twelve-month administrative position. The salary is commensurate with experience and job qualifications. Position available immediately. Send applications to: Dr. Gene Hooks, Director of Athletics, Wake Forest University, P.O. Box 7265, Winston-Salem, NC 27109. An equal opportunity/affirmative action employer.

Field Secretary to Cyclone Club. Full-time, twelve-month (P3) position. Salary consideration given qualifications and experience, \$16,848 minimum. Duties: Assists Executive Director of the Cyclone Club. Identifies and solicits new members of the Cyclone Club for fund-raising and public relations work. Participates in public relations and promotional activities. Qualifications: Bachelor's degree in business, marketing, public relations and/or related field. Two-to-three years' experience in public relations work, sales and/or fund-raising or related field. Experience with collegiate athletic programs and demonstrated proficiency in working with the public. Procedure: Send application letter, resume, and the names, addresses and telephone numbers of three references to: Mr. Max Urlick, Director of Athletics, 135 Olsen Building, Iowa State University, Ames, IA 50011. Deadline: OCTOBER 28, 1983, or until filled. Iowa State is an equal opportunity/affirmative action employer.

Sports Information

Director of Information Services. Responsibilities: Writes weekly press releases, feature stories, directs information office operation. Directs editing and layout of press books, newspaper and schedule cards. Coordinates media press sessions, conference tournaments' administration and other administrative duties. Coordinates promotion of conference and special events and television packages. Qualifications: Bachelor's degree required. Experience in sports information of no less than three years with proven background, preferably as a head sports information director. Knowledge of broadcast and telecast procedures preferred. Salary: Negotiable and commensurate with experience. Application Deadline: October 7, 1983. Position Available: October 10, 1983. Procedure: Forward complete resume and reference to Steven Hatchell, Commissioner, Metro Conference, 7777 Bonhomme, Suite 1501, St. Louis, MO 63105.

Sports Information Director. Lehigh University seeks a Director of Sports Information. This position reports to the Director of Public Information and will be responsible for developing and preparing news/feature articles, brochures and publications; travel with designated teams; compiling and reporting results of athletic events, and complete related assignments as directed. Successful candidate must have a BA in Journalism, plus 2-3 years' sports information experience or equivalent. Application deadline is October 28, 1983 (appointment date: February 1, 1984). Send resume and writing samples to Personnel Office, 622 Broadhead Avenue, Bethlehem, PA 18015. Equal Opportunity/Affirmative Action Employer.

Football

Head Football Coach. The State University of New York at Stony Brook is conducting a search for a Head Football Coach for its Division III intercollegiate program who will also serve as coach or assistant coach of a spring sport. Duties include: Recruitment and supervision of student-athletes who are able to be successful in an academically competitive environment; some teaching responsibilities in the spring, contingent on the nature of coaching responsibilities; and participation in fund-raising activities for athletics. Minimum qualifications: Master's degree preferred with one degree or training in the area of Health, Physical Education, Recreation, or an Allied Health Field desirable; at least five years of demonstrated successful coaching experience, preferably on a college level. Appointment would be on a three-year contract with salary dependent upon experience and qualifications.

HEAD COACH (10-month)

Coordinator of Men's and Women's Intercollegiate Indoor/Outdoor Track, Field and Cross Country programs as well as acts as Head Coach of Men's and Women's Indoor/Outdoor Track and Field teams. Recruits, trains, supervises, evaluates and prepares participants for practices, competitions and championships. Trains and supervises coaching staff. Position requires a Bachelor's degree plus playing or coaching experience at high school or college level. Excellent benefit program. Interested applicants, please send resume to Ref. No. 70 stating salary requirements. THE STATE UNIVERSITY OF NEW JERSEY RUTGERS Division of Personnel Services New Brunswick, N.J. 08903 An Affirmative Action/Equal Opportunity Employer

Starting date is the beginning of the Spring, 1984, semester. Applicants should send a letter of application, resume, credentials, a statement of coaching philosophy, three letters of reference, and the names, addresses, and telephone numbers of three other individuals who may be contacted for further information by October 15, 1983, to: Professor Norman Goodman, Chair, Head Football Coach Search Committee, P.O. Box 599, Stony Brook, New York 11790. SUNY Stony Brook is an equal opportunity/affirmative action employer. AK 709B.

Swimming

Assistant Swimming Coach, United States Military Academy. Job requirements: If selected, the applicant must attend basic officer candidate school and upon completion, he will be assigned to the United States Military Academy as assistant coach of swimming with the rank of second lieutenant. Position is a three-year assignment and would include responsibilities of on deck coaching, program planning, coordinating recruiting efforts, preparation of budget and counseling cadets. The job will encompass both the men's and women's programs. Job benefits include medical and dental care and allowances for meals and housing. Promotion to first lieutenant possible within the three year period. Send resume to Jack Ryan, Office of the Director of Intercollegiate Athletics, United States Military Academy, West Point, NY 10996. Applications close on 1 December, 1983.

Track & Field

Track Graduate Assistants. Two positions available. Will assist men and women athletes. (1) Assist jump events. (2) Assist middle distance and distance events. Available immediately. Stipend \$2,700 for academic year. Covers room, board and fees; out of state fee waived. Qualifications: bachelor's degree, 2.52 GPA (4.00 is A). Application procedure: Contact Les Stevens, Track Coach, Central Missouri State University, Warrensburg, MO 64093, 816/429-4254.

Physical Education

Faculty position, health and physical education, and head athletic trainer. Columbus College, Columbus, Georgia, 1984 academic year. Columbus College, a unit of the university system of Georgia, invites applications for an athletic trainer to develop and administer an athletic training curriculum. The primary responsibilities would include: program development, teaching athletic training and sports science courses, supervision of students and athletic training duties. This person would serve as a liaison with the Houghton Sports Medicine Foundation and Rehabilitation Services of Columbus. Employment will begin January 1, 1984. Individuals must hold an earned master's degree in related field and should have experience as a trainer on the secondary, college or professional level. Prior teaching experience is desirable. Additionally, individuals must have current certification by the National Athletic Trainers' Association, current certification in CPR and basic first aid, and expected to apply for Athletic Training Licensure for the state of Georgia. Salary \$17,000-\$20,000. Instructor or assistant professor, on non-tenure track position with excellent fringe benefits. Columbus College is located in Columbus, Georgia's second-largest city with a metropolitan area population of approximately 300,000, and is located 100 miles southwest of Atlanta. The college is an equal opportunity, affirmative action employer. Application materials must be received by October 28, 1983 to be assured of consideration. Send credentials to: Ms. Mary V. Blackman, Chairperson, Search and Screening Committee, Columbus College, Columbus, Georgia 31903.

Physical Education, Lecturer, Physical Education, and Assistant Swim/Diving Coach, Men and Women. Additional teaching responsibilities will include aquatic activities. Requires Master's Degree and a minimum of 3 years' experience. Either the undergraduate or graduate degree must be in physical education.

Pool and Aquatics Director

Bentley College is a modern campus located in pleasant suburban surroundings, approximately 10 miles from Boston and two miles from Route 128, Exit 48-E. We offer competitive compensation and benefits.

This is a highly responsible position for the person with the proper credentials and experience. The position requires the skills and abilities to establish, implement, coordinate and supervise a multi-faceted pool and aquatics program. Management will require attention to physical education, intramural, recreational, community and income-producing programs. There will be extensive interaction with college administration, faculty, students, alumni and the local and business communities. Long hours are a part of the position.

Requirements: Bachelor's degree (Master's preferred). Extensive experience in physical education and recreation; proven organizational, management, administrative and communication skills; a complete set of Red Cross and State-specialized certifications; good working knowledge of chemicals and related equipment; competent understanding of health and safety features; ability to promote income, summer utilization and to implement outreach programs.

Qualified applicants please send resume to: Compensation/Employment Administrator, Human Resources Office, Bentley College, Lewis Hall, Beaver and Forest Streets, Waltham, MA 02254. Application deadline is October 21, 1983.

AN EQUAL OPPORTUNITY/AFFIRMATIVE ACTION EMPLOYER M/F

Successful background in coaching diving skills at either the high school or college level. Send letter of application, resume, placement credentials and letter of recommendation supporting qualifications by October 21, 1983, to Edgar M. Johnson, Coach of Swimming, College of Physical Education, Athletics and Recreation, University of Delaware, Newark, Delaware 19711. The University is an Affirmative Action/Equal Opportunity Employer.

Open Dates

Women's Tennis, Division I. University of New Orleans needs two teams to participate in a six team, round-robin tournament April 14-16, 1984. Other dates are open for dual

matches. Contact Bernie Cox 504/286-6620. **Football, Division I-AA.** University of Massachusetts/Amherst has open dates September 15, 1984, September 24, 1988, and September 23, 1989. Call Al Rife, 413/545-2342.

Football, Indiana State University, Terre Haute, has open dates November 3, 1984, and September 21, 1985. Call Bill Goldring, 812/232-6311, extension 5721.

Football, Division III. Hope College, Holland, Michigan, has open dates October 5, 1985; October 4, 1986; October 3, 1987; September 10, 1988, and October 1, 1988. Contact Ray Smith, 616/392-5111.

Women's Basketball. Femis State College, Big Rapids, Michigan, has open dates December 1, 2 or 3, and December 8, 9 and 10. Home or away. Contact: Coach Pat Dolan, Head Basketball Coach, 616/796-0461, extension 5527.

Fellowship of Christian Athletes Regional Director

Northeast United States. Experience in athletics, administration, communication and development of financial support. Must acknowledge Jesus Christ as Savior and Lord and be active in the local church of Jesus Christ.

Send resume to Vice President-Field Staff Operations, FCA, 8701 Leeds Road, Kansas City, MO 64129.

ATHLETIC DIRECTOR TOWSON STATE UNIVERSITY BALTIMORE, MARYLAND 21204

Applications and nominations are invited for the position of athletic director at Towson State University to be appointed in early 1984. Towson's program is a relatively new Division I NCAA program, encompassing 23 men's and women's sports, and competes in the East Coast Conference. The University is committed to the retention of its student-athletes. Modern facilities include the Towson Center, the lighted Towson Stadium, as well as several acres of athletic fields.

Responsibilities: The Athletic Director reports to the Vice President of Institutional Advancement, and works with a strong, supportive staff. Candidates must have strong leadership abilities, scheduling acumen, effective negotiation skills, successful administrative experience including knowledge of budget structure and management (preferably in intercollegiate athletics), excellent skills in the areas of communication, interpersonal relationships, fund-raising and public relations, and a thorough knowledge of NCAA regulations. Candidate should be self-motivated and have ability to manage the program with limited executive-level direction.

Qualifications: Master's degree preferred, bachelor's degree required, and significant experience at a Division I institution preferred. Salary: Upper 30s plus fringe benefits.

Send complete credentials—salary history, names and telephone numbers of at least three references, a two-page statement of your philosophy of intercollegiate athletics and the role of the athletic director at a liberal arts-based university—by November 4, 1983. Requests for additional information and submission of nominations or applications should be addressed to: Office of the President, Towson State University, Baltimore, Maryland 21204.

Towson State University is an affirmative action/ equal opportunity employer

Tulane quarterback receives another court-ordered delay

Tulane University quarterback Jon English received another court-ordered delay on September 30, allowing him to continue playing football for the institution.

The State Fourth Circuit Court of Appeals in New Orleans issued a temporary injunction preventing the NCAA from barring English from participation in college football on October 1, although he has been ruled ineligible under the Association's transfer rule by both the NCAA Council and the state district court. Following the October 1 football game involving Tulane and Vanderbilt University, the state circuit court intends to review the appeal made by English of the district court decision.

The district court decision supporting the NCAA was issued after a five-day hearing that included testimony from the NCAA. Tulane University and the student-athlete. In his opinion.

Civil District Judge Revis Ortique noted that it was unlikely that English would prevail on the merits in this case, and therefore, his request for an injunction was denied.

It had been argued by English's lawyers that the NCAA's control of members amounted to a violation of state antitrust laws and that the student-athlete transfer rule was ambiguous.

English spent 1979 at Michigan State University, then enrolled a year at Allegheny Junior College; he played football two years (including the 1982 season) at Iowa State University, then spent six months at Delgado Junior College in New Orleans. He enrolled at Tulane in August and began playing football under the protection of a temporary restraining order issued against the NCAA and the university.

Application of bylaw reviewed

The NCAA Administrative Committee (acting for the Council) has reviewed the application of NCAA Bylaw 1-2-(b) to contacts between prospective student-athletes and high school coaches who may be representatives of the athletic interest of Division I or II member institutions.

The committee divided such high school coaches into two categories: (1) those employed and compensated by the high school district to coach and (2) those who volunteer to coach.

The committee determined that those high school coaches who are employed and compensated by the school district are permitted under

the provisions of Bylaw 1-2-(b) to contact prospective student-athletes in conjunction with their high school coaching responsibilities but cannot attempt to recruit those prospects for NCAA member institutions.

Volunteer high school coaches are not permitted under the provisions of Bylaw 1-2-(b) to coach in circumstances that involve contact with prospective student-athletes inasmuch as they are not subject to the same level of control by the high school district as its employees would be, and they may assume volunteer coaching positions for reasons related to recruitment for member institutions.

Olympic baseball players sought

Three college coaches are among eight regional coordinators chosen by the United States Baseball Federation to assist in selecting a national team to represent the U.S. in competition during the 1984 Summer Olympic Games in Los Angeles.

Howard McCullough, assistant coach at the University of North Carolina, Chapel Hill, is the Southeast coordinator; Norm DeBriyn, head coach at the University of Arkansas, Fayetteville, is the Southwest coordinator, and John Gonsalves, head coach at California State University, Long Beach, is the Pacific Southeast coordinator.

The coordinators helped to select sites at which 65 tryout camps were held in September. The best athletes from these tryout camps now are to be identified and placed on a preliminary team roster. A final squad of 20 players will be chosen next spring.

Baseball will be a demonstration sport in the 1984 Olympics, with the U.S. team competing with five other nations July 31-August 7. All games will be played at Dodger Stadium.

Baseball protection talks ended

A proposed rule that would protect college baseball players from being signed to professional contracts through four full years of school no longer is being considered by professional baseball.

Consideration was given to adopting such a rule at baseball's winter meetings last year, but the NCAA Baseball Committee and several college coaches raised questions about it. Because coaches are divided on the merits of the rule, professional baseball decided to table further discussion.

The current agreement permits college players to sign professional contracts after their junior season or their 21st birthday.

Exception telecast applications are increasing

Increased interest by Divisions I-A and I-AA institutions in exception telecast opportunities has prompted the NCAA Football Television Committee to remind those constituencies of ABC Sports' and CBS Sports' negotiation rights under the 1982-1985 Football Television Plan.

More than 110 exception telecast applications of all types have been requested for 1983, according to Hugh D. Hindman, director of athletics at Ohio State University and committee chair. "There has been a significant increase in applications this year in comparison to this period during the 1982 season," Hindman said. The committee approved 130 requests in 1982.

"I also think more institutions are

becoming educated in the various opportunities available for local telecasts under Article 16 of the plan."

Hindman indicated that several institutions have negotiated agreements with local affiliates or cable systems prior to submitting proper applications, according to procedures outlined under Article 16. He said the networks have expressed a desire to provide their local affiliates a fair opportunity in negotiating for exception telecast rights.

Provisions concerning "Rights of Networks" under Article 16 state:

Authorization for any exception telecast or cablecast described in this article will be issued in each instance only with the understanding that the carrying network which has control of the date on which the exception telecast or cablecast is to be aired shall have a first right to

A higher

Continued from page 1

The committee will recommend that the Executive Committee approve a set of published guidelines for the 1984-85 season, which would be available to the membership.

11. Recommend that a grant be approved by the Executive Committee for regional women's officiating clinics to provide standard interpretations and mechanics. Details of the grant are contingent upon receipt of a formal request from the National Association of Girls and Women in Sport.

12. Recommend to the NCAA Council that Constitution 3-4-(d)-(1) be amended to permit student-

athletes to officiate intramural games only at their institutions for compensation at the regular rate paid by the institution. The committee hopes this will encourage student-athletes to become involved in officiating and provide a better understanding of the role of an official.

The committee will meet again in May to follow up on these recommendations, specifically examining game-management guidelines, the codes of ethics and the officiating camps.

In addition to Lude, members of the committee are Louise Albrecht, director of women's athletics, Southern Connecticut State Univer-

sity; Brice B. Durbin, executive director, National Federation of State High School Associations; Fred Jacoby, commissioner, Southwest Athletic Conference; John Overby, supervisor of men's officials, Big Eight and Missouri Valley Conferences; C. M. Newton, men's basketball coach, Vanderbilt University; Henry O. Nichols, men's basketball official, Villanova University, and Marcy Weston, women's volleyball coach, Central Michigan University. Albrecht (rules interpretation) and Weston (officiating mechanics) have been involved in women's college basketball rules and officiating, while Newton is chair of the NCAA Men's Basketball Rules Committee.

Catastrophe

Continued from page 1

emphasized. "What is most important is the lifetime medical coverage."

Ruedlinger recently presented Wittman the keys to a new van as one benefit available to such injured athletes. The van was modified to include hand controls and a wheelchair lift.

Medical and rehabilitation expenses, transportation costs, costs of remodeling the family home to accommodate a wheelchair, plus wages lost by parents who have to miss work to help administer care to the injured athlete are examples of the kinds of protection the Ruedlinger Plan offers for victims at the high school level.

"We will provide medical-related expenses plus an income, if the injured person cannot otherwise earn an income, for the rest of that person's life," said Ruedlinger.

Wittman's injury represented the first case administered under the new program. Officials in Washington contrast it with that of a football player injured in 1975 who won a court case but has not received a penny in benefits.

The NCAA's interest in catastrophic injury insurance arose at the time efforts were being made to form a sports rehabilitation foundation. The Insurance Committee and Committee on Competitive Safeguards and Medical Aspects of Sports both studied the two concepts. Although

there was some agreement that a foundation concept might be a good method of providing assistance to athletes already injured, both committees believed that insurance was a better long-term solution for the membership.

"There was never any question that insurance was the best way to go," Hunter said. "The question was how to put together an insurance plan that would work and it has taken awhile to do that."

"The insurance concept is a contract," Ruedlinger said. "It stipulates the conditions in advance, rather than having a group of people trying to decide the merits of a case after it has occurred."

In addition, the NCAA insurance program would cover all sports. The foundation was intended to provide benefits only for athletes injured playing football.

As with other NCAA-sponsored insurance programs, this will be offered on a voluntary basis to all member institutions. According to Hunter and Ruedlinger, though, this plan has one major difference—it is not available anywhere else.

"The Insurance Committee is optimistic that there will be a large enrollment, because this is not the type of coverage that can be purchased from any other source," Hunter said. "Financially, it would not have been possible to offer such coverage with-

out the NCAA's involvement."

"In consideration of the low cost, it will be hard for someone to say no," Ruedlinger added. "But the plan will be effected, regardless of the number of participants."

Member institutions will have until July 1, 1984, to sign up for the coverage, which will be underwritten by an "A+" company (the highest rating possible). Details of the coverages and deductible amounts available for purchase, as well as the costs for these options, cannot be announced until approval is granted by the state insurance department. Complete information will be published in The NCAA News.

The News will be one of several methods used by the Insurance Committee to provide information to the membership. Monthly contact with member institutions is planned as part of an overall communications plan that the committee will implement. Until those efforts begin, Hunter and Ruedlinger can provide additional information.

Joseph L. Kearney, commissioner of the Western Athletic Conference, chaired the Insurance Committee during much of this project. He consistently justified the program on the basis that regardless of any legal obligations, colleges have a moral obligation for the well-being of their student-athletes. The current plan, as Hunter said, represents "a lot of work by a lot of people" to fulfill that moral obligation.

Committee

Continued from page 1

The Division II Steering Committee will review the Association's multi-division classification provisions as they affect that division, especially in terms of Division I institutions placing women's sports in Division II. The Division II group also will continue to discuss proposed limitations on playing dates and contests in all NCAA sports.

Among the items on the Division III Steering Committee agenda are

that division's transfer rule, a review of the results of a Division III membership survey and a discussion of signing prospective student-athletes in Division III.

In addition to the Council and steering committee sessions, the Council Subcommittee on Women's Interests and the Nominating Committee will hold meetings October 9, and the Special Committee on Governance Review will complete its recommendations to the Council

in an early morning meeting October 10.

NCAA President John L. Toner will chair the Council meeting, while the three division vice-presidents—Gwendolyn Norrell, Division I; Edwin W. Lawrence, Division II, and Kenneth J. Weller, Division III—will lead the steering committee discussions. Norrell also chairs the women's interests subcommittee; the Nominating Committee is chaired by Charles H. Samson, Texas A&M University, and the governance review committee is chaired by NCAA Secretary-Treasurer John R. Davis.

Highlights of the meetings will be reported in the October 17 issue of The NCAA News. A compilation of all actions taken by the Council is being added to the News' coverage of Council meetings and will appear in the October 24 issue.

and the second network. The control network then will initiate contact with the institution to negotiate for rights to the game. Such negotiation may be conducted on the network's behalf by its affiliated station in the institution's home television market.

The second network may not contact the institution or undertake negotiations with it until the negotiating period of the control network has passed, or the control network has negotiated for five business days with the institution, whichever is earlier. Thereafter, it may seek rights to the exception telecast under the provisions of this plan, for a period of not to exceed three days, provided that the applicant institution also may negotiate with the control network during such negotiations. If the institution fails to reach agreement with either network during these eight days, thereafter it is free to negotiate with any other party.

Institutions interested in applying for an exception telecast should contact James W. Shaffer, associate television program director, at the NCAA national office.
