NCAA releases final reports in research series

The final research reports from the 1987-88 National Study of Intercollegiate Athletes, conducted by the American Institutes for Research at the request of the NCAA Presidents Commission, have been released.

Report Nos. 5 and 6 in the series have been printed and are now available. The executive summaries of the two reports appear on pages 14 and 15 of this issue of The NCAA News.

Report No. 5 presents analyses of the academic transcripts of 2,077 Division I athletes and nonathlete students who are involved in other types of extracurricular activities. No. 6 features open-ended responses to a question that asked the students in the study if there was anything else they wished to say about their collegiate experiences. **Transcripts**

The transcript study analyzes both academic progress and academic performance. It shows that, in general, student-athletes earn their credits in areas of study that are similar to those pursued by nonathlete students.

In terms of academic performance, football and basketball players generally earn lower grade-point averages in their primary study areas than do student-athletes in other sports or the nonathlete students. And football and basketball players in "more successfully competitive" programs have lower GPAs than those in "less competitive" programs. Key findings include these:

• Student-athletes earn total numbers of credits that are comparable to the totals for other extracurricular students.

•Student-athletes earn fewer than eight percent of their total credits in physical education and related courses. Most of their units are in arts and humanities, social sciences, and physical sciences.

•There are no differences between football and basketball players and other extracurricular students in terms of numbers of units earned at other institutions (transferred credits).

• Senior football and basketball players earn average GPAs in the primary study areas that are about half a grade point lower than all other students in the study, and those players' GPAs in physical education and related courses are about half a grade point higher than their grades in the other primary study areas.

• Football and basketball players are no more likely to be placed on academic probation than are stu-See NCAA, page 3

Bradley bill delay sought by Schultz

NCAA Executive Director Richard D. Schultz has asked Congress to delay action on legislation to require colleges and universities to make public their graduation rates of athletes until the NCAA membership considers similar legislation at its January 1990 Convention in Dallas.

Schultz was one of several college athletics figures who testified September 12 before the Senate Labor and Human Resources Committee See Bradley, page 3

Commission will decide in October on legislation for '90 Convention

An unusually large number of major issues face the NCAA Presidents Commission in its fall meeting October 3-4 in Kansas City, Missouri, including these:

• A special staff report, requested by the Commission, regarding actions that might be taken as a result of the 18-month National Forum and the related studies conducted by the American Institutes for Research.

• Legislation to require disclosure of graduation rates.

• Proposal No. 42 as adopted at

the 1989 NCAA Convention.

• The report of the Commission's Advisory Committee to Review the NCAA Governance Process.

• A review of legislation known to date for consideration at the 1990 NCAA Convention.

The fall meeting is the Commission's final opportunity to determine the legislation that it wishes to sponsor for the January Convention.

Three of those key topics will be considered by the Commission's Divisions I, II and III subcommittees before they are taken up by the full Commission: the review of the National Forum and AIR research, the graduation-rate topic, and the review of known legislation for January. In addition, the Divisions I and II subcommittees will consider the Proposal No. 42 topic prior to action by the full Commission.

In earlier meetings, the Commission has reviewed portions of the discussions from the National Forum sessions. In its April meeting, it asked the national office staff to review all of the AIR research stud-See Commission, page 3

Direct payments to members to exceed \$54 million

Analysis of the 1989-90 general operating budget approved by the NCAA Executive Committee at its August meeting reveals that the Association continues to spend the vast majority of its moneys on member institutions, conferences and organizations.

Of the record \$89,728,000 budget for this fiscal year, 60.4 percent will be paid directly to NCAA members through distributions from championships, team-transportation and per diem payments, grants to conferences and affiliated members, and royalty payments.

The Division I Men's Basketball Championship will generate 77.7 percent of NCAA revenue. Expenses for the tournament, excluding distribution of receipts, will amount to only five percent of the budget. Payments to teams and conferences will account for another 43.5 percent.

Revenue		ercentage of Budget
Division I men's		
basketball	69,748,000	77.7%
Other Division I		
championships	7,733,000	8.6%
Merchandising	2,341,400	2.6%

sponsorships	1,310,000	1.5%
Publishing	1,263,000	1.4%
Communications	1,014,000	1.1%
Membership dues .	870,000	1.0%
NCAA Foundation	854,000	1.0%
Division II		
championships	665,000	.7%
Division III		
championships	364,000	.4%
Other	240,000	.3%
Totals	89,728,000	100.0%

As the accompanying chart shows, the Association will spend about \$3.1 million on student-athletes and youth programs. This amount includes insurance, postgraduate scho-

... the Association will spend about \$3.1 million on studentathletes and youth programs

larships, degree-completion scholarships, drug-education programs, the National Youth Sports Program and Youth Education through Sports clinics.

Indirect benefits to the membership amount to 17.7 percent of the budget. Included in these costs are game expense for championships, promotion and public relations, drug testing, legal fees and services, publications, committees, research, sports sciences, annual Convention, honors luncheon, NCAA Foundation, and merchandising.

The above percentages include only direct costs; no overhead or cost accounting of staff expense has been added.

The remaining 18.4 percent of the budget encompasses the costs of operating the national office. The figure is up slightly over previous years due to additional costs related to the new building and the need to maintain the existing buildings and land until they are sold.

Overall, 81.6 percent of the 1989-90 general operating budget will accrue to member institutions, conferences, organizations, student-athletes and youth programs.

Reclassification petitions approved

Thirteen institutions have had their petitions approved for reclassification of all or part of their intercollegiate athletics programs, effective September 1, 1989.

Two other institutions' petitions have been approved effective September 1, 1990.

Under the provisions of Bylaws 20.4 and 20.5, the petitions were considered by the NCAA staff and confirmed by the Administrative Committee, acting for the Council.

In addition, another 14 institutions were assigned probationary membership in all sports, 11 institutions were assigned restricted membership for all or part of their programs and seven schools had their probationary or restricted status removed.

Three of the reclassification petitions were for moves to Division I for specific sports. California State University, Sacramento, moved baseball and softball from Division II to Division I; Merrimack College moved its ice hockey program from Division II to Division I, and Samford University moved football from Division III to Division I-AA.

Louisiana Tech University, which had had its football program in Division I-AA, moved to Division I-A.

California State University, Stanislaus, moved its entire program from Division III to Division II; Houston Baptist University moved all of its program, except men's gymnastics, from Division I-AAA to Division II, and Mississippi College moved women's basketball from Division I to Division II. Knoxville College moved its football from Division III to Division II.

Gannon University added Division III football to its program, and Immaculata College and Randolph-Macon College moved their entire programs from Division II to Division III.

The University of Evansville moved its football from Division II to Division III, and Lock Haven University moved its field hockcy program from Division II to Division III.

The University of Central Florida's request to move football from Division II to Division I-AA was approved effective September 1, 1990. Similarly, the petition from the University of Wisconsin, Milwaukee, to move its entire program from Division II to Division I-AAA was approved effective September 1, 1990.

Probationary membership status is applied to an institution that fails to meet either the minimum men's or women's sports sponsorship criteria for its division. The one-year probationary period can be applied to an institution only once in every 10-year period.

If an institution fails to comply

with the minimum requirements at the end of the probationary period, it is placed in restricted membership status.

The following institutions were assigned probationary membership for all sports: Asbury College; Baptist College; Delta State University; East Tennessee State University; Eastern Montana College; Hardin-Simmons University; Indiana University-Purdue University, Fort Wayne; LeMoyne-Owen College; New Jersey Institute of Technology; Niagara University; University of Portland; Southern Methodist University; Upsala College, and Valdosta State College.

Restricted membership is applied to an institution that fails to meet the minimum requirements of its division (e.g., sports sponsorship, scheduling).

An institution placed in the restricted membership classification loses eligibility for a number of membership privileges and has from one to three years to comply. If the institution fails to comply in the required time period, it is reclassified as a corresponding member.

Chaminade University; Chicago State University; University of Maryland, Eastern Shore; Miles College, and Savannah State College were assigned restricted membership for all sports.

American College of Puerto Rico; Castleton State College; Winona State University, and University of Wisconsin, Parkside, were assigned restricted membership for men's basketball.

Two institutions were assigned restricted membership for football. They are the University of California, Santa Barbara, and Samford University.

Probationary or restricted membership status was removed in all sports for Alabama State University, Clark Atlanta University, Creighton University, Medgar Evers College and St. Francis College (New York).

Also, restricted membership status for men's basketball was removed for California Institute of Technology and Johnson State College.

TV package approved

For the second consecutive year, NCAA Productions will produce a six-game women's basketball television package under the auspices of the Association's Special Committee on Women's Basketball Television.

Production costs for the sixgame series are financed by the Rawlings Sports Goods Company, maker of the official balls for NCAA men's and women's basketball championships.

Four of the six 1989-90 games will air live on ESPN (all times Eastern):

• The University of Maryland, College Park, and North Carolina State University, Sunday, January 7, 1 p.m.

• Louisiana Tech University

at Old Dominion University, Sunday, January 14, 1 p.m.

• California State University, Long Beach, at Stanford University, Wednesday, January 24, midnight.

• The University of Iowa at Purdue University, Sunday, February 11, 12:30 p.m.

The first game of the season, featuring the University of Texas, Austin, at Rutgers University, New Brunswick, will air live on SportsChannel America Sunday, December 10, at 4 p.m. Clearances for the sixth game in the package, a February 24 visit by Louisiana State University to the University of Georgia, will be announced later.

Committee Notices

Member institutions are invited to submit nominations to fill interim vacancies on NCAA committees. Nominations to fill the following vacancies must be received by Fannie B. Vaughan, executive assistant, in the NCAA office no later than October 2.

Council: Replacement for Cecil W. "Hootie" Ingram, Florida State University, who has been named director of athletics at the University of Alabama, Tuscaloosa. Appointee must be a representative of Division I-A South independents.

Nominating Committee: Replacement for Maureen T. Horan-Pease, Drew University, resigned from the committee. Appointee must be a woman from Region 2 of Division III (see page 26 of the 1989-90 NCAA Manual).

Division I Women's Basketball Committee: Replacement for Sarah E. J. Yates, resigned from Florida A&M University. Appointee must be a Division I women's basketball representative.

Correction: The September 11, 1989, issue of The NCAA News included a call for nominations to fill the Division I position that is carmarked for a Council representative on the Student-Athlete Advisory Committee. No nominations are necessary because that appointment will be made by the Council, and the individual selected will be a member of the Council.

Legislative Assistance

1989 Column No. 32

late October

NCAA Bylaw 14.2.5—hardship waiver

The provisions of Bylaw 14.2.5 permit a student-athlete to be granted an additional year of competition by the conference or the NCAA Eligibility Committee for reasons of "hardship." Hardship is defined as an incapacity resulting from an injury or illness that has occurred under specific conditions. One of the conditions is that the injury or illness occurs when the student-athlete has not participated in more than two events or 20 percent (whichever number is greater) of the institution's completed events in his or her sport. Only competition (including a scrimmage) against outside participants during the traditional playing season, or, if so designated, during the official NCAA championship playing season in that sport (e.g., spring baseball, fall soccer), shall be countable under this limitation in calculating both the number of events in which the student-athlete has participated and the number of completed events during that season in the sport.

During its August 2-4 meeting, the NCAA Council reviewed the application of the Association's hardship rule in those sports in Divisions I and II that are not separated clearly into traditional and nontraditional segments. In this regard, the Council determined that in those individual sports in which championships selection is based upon competition throughout the season, the hardship rule should be applied on the basis of the entire season's competition; further, that in those sports in which championships selection is based upon competition during only a portion of the season, the hardship rule should be applied on the basis of competition conducted during that portion of the year. For example, in some individual sports (i.e., cross country, fencing, golf, skiing, swimming, tennis and wrestling), NCAA championships qualification for the individual championships (as opposed to the team championship in an individual sport) is based upon individual competition occurring throughout the entire academic year. In the other individual sports, the selection for individual championships is based on participation only during part of the year (i.e., after December 1 in indoor or outdoor track, after January 1 in gymnastics and rifle). The Council has asked that this interpretation be published in The NCAA News for comment by the membership and (if necessary) reconsideration by the Council during its October meeting. NCAA Bylaw 17.3.2—preseason basketball practice NCAA member institutions in all divisions are reminded that a member institution shall not commence on-court preseason basketball practice sessions prior to October 15. Prior to this date, members of the institution's coaching staff are precluded from involvement with one or more team members at any location in any of the following activities: (1) setting up offensive or defensive alignments; (2) chalk talks; (3) discussions of game strategy; (4) reviewing game films or videotapes; (5) activities utilizing basketball equipment, or (6) observing student-athletes in any basketball activities, even if such activities are not arranged by the institution's coach. However, in accordance with Bylaw 17.3.2.1.1, team conditioning or

physical fitness activities supervised by coaching staff members may be conducted on or off court, provided these activities do not begin prior to the first day of classes of the academic year or September 1, whichever date occurs earlier. In addition, meetings or discussions between a studentathlete and a member or members of an institution's coaching staff regarding academic support services, drug education, training-room procedures, team discipline, care and maintenance of equipment, general meeting schedules, information about lodging and meals, or off-season conditioning activities are not considered practice activities.

NCAA Bylaws 14.5 and 14.6.1.1—satisfactory progress /nonqualifier and partial qualifier

Divisions I and II member institutions are reminded that a nonqualifier is prohibited from practicing, competing and receiving athletically related financial aid (and a partial qualifier from practicing and competing) during the second year of residence unless and until the student-athlete has satisfied the provisions of Bylaw 14.6.1.1 by fulfilling an academic year of residence (i.e., by enrolling in a minimum full-time program of studies during each term of attendance for a regular academic year and completing a minimum full-time program during each term of attendance, or by accumulating a number of hours that is at least equivalent to the sum total of the minimum load of each of the required terms of the academic year).

All student-athletes in Divisions I and II member institutions must meet the satisfactory-progress provisions of Bylaw 14.5.2 in order to be eligible for intercollegiate competition during the second year of residence. A student-athlete may satisfy the provisions of Bylaw 14.5.2 based upon: (1) satisfactory completion prior to each fall term of a cumulative total of academic semester or quarter hours equivalent to an average of at least 12 semester or quarter hours during each of the previous academic terms in academic years in which the student-athlete has been enrolled in a term or terms, or (2) satisfactory completion of 24 semester or 36 quarter hours of academic credit since the beginning of the previous fall term. A student-athlete who is ineligible at the beginning of the fall term may have his or her eligibility reinstated at the beginning of any other regular term of that academic year based upon: (1) a cumulative total of semester or quarter hours of academic credit that is equivalent to the completion of an average of at least 12 semester or quarter hours during each of the previous academic terms in academic years in which the student-athlete has been enrolled in a term or terms, or (2) satisfactory completion of 24 semester or 36 quarter hours of academic credit during the certifying institution's preceding regular two semesters or three quarters.

scheduled for 1 p.m. that day.

day.

News Fact File

Women hold 32.3 percent of all NCAA committee positions 240 of 744. The "governance plan" adopted in 1981 to involve women's athletics in the NCAA assured women minimum representation equal to the percentage of women participating in intercollegiate athletics, which then was about 30 percent. Today, the participation figure is 33.4 percent. A total of eight more positions assigned to women (of the 744 total) would reach the 33.4 percent level.

Source: Staff analysis prepared for the August NCAA Council meeting in conjunction with a report by the Committee on Women's Athletics. This material was provided by the NCAA legislative services department as an aid to member institutions. If an institution has a question it would like to have answered in this column, the question should be directed to William B. Hunt, assistant executive director for legislative services, at the NCAA national office.

Bradley

Continued from page 1

on the Student-Athlete Right-to-Know Act, sponsored by Sen. Bill Bradley (D-New Jersey) and Sen. Edward Kennedy (D-Massachusetts). The legislation is commonly know as the Bradley bill.

Schultz told the committee, "We're not opposed to disclosure, and I think we'll have legislation in January that will do everything they're trying to do with this bill."

The NCAA Presidents Commission is working on the issue, and Schultz said the presidents were opposed to Federal intervention and would like the NCAA membership to police itself.

Schultz told the committee that if the NCAA fails to approve legislation on public disclosure of graduation rates, he would lobby for Federal legislation. "I think it's that important," he said.

"We have not fought this at all," Schultz said. "What we've tried to do is provide constructive comments to them on how the bill ought to be structured. We haven't publicly or privately opposed it."

The Bradley-Kennedy bill would apply to all colleges and universities with intercollegiate athletics programs.

"It's a valid point that this (Federal) legislation covers schools that are not in the NCAA," Schultz told the committee. "But our thinking is that if we resolve our own problems, the NAIA (National Association of Intercollegiate Athletics) would do the same thing."

GAO report

Two days before the Senate hearing, the General Accounting Office released a report, which was requested by Sen. Kennedy, stating that no more than one in five athletes have graduated at some colleges with major basketball programs and that graduation rates among football players at top schools were not much higher. The study covered the period from September 1982 to September 1987, which provided the latest available figures. 35 of 97 schools surveyed for basketball had graduation rates of zero percent to 20 percent among players for the period cited. In football, 14 of 103 Division I-A schools studied had graduation rates of zero to 20 percent.

Ursala R. Walsh, NCAA director of research, questioned the survey's findings, saying that "24 of the 35 institutions identified as graduating less than 20 percent of the men's basketball players admitted only one (nine institutions) or two (15 institutions) men's players in 1982-83.

"Obviously, given even less than normal rates of attrition, it is not difficult to achieve a graduation rate of zero when there are only two candidates and, even if they have transferred in good standing and actually have graduated from another institution, they count as zeros for the institution at which they first enrolled."

Comparison won't hold up

Concerning criticism that the graduation rate of athletes is below that of the general student body, Walsh said, "The comparison between men's basketball players' graduation rates and the general student body's is not symmetrical, in that the populations surveyed are not alike. In the first place, the basketball players are all men and, secondly, the racial composition of the team is ordinarily very different from that of the general student population.

"Black student-athletes." Walsh said, "have been burdened by a long history of oppression and discrimination. They remain largely segregated in minority neighborhoods and minority schools, generally the least adequately staffed and funded. Consequently, they are not as well prepared for college as their white counterparts, and they do not graduate at the same rate. Just two of the 1,525 studentathletes tested for drugs at NCAA winter and spring championships in 1988-89 were declared ineligible for further competition after testing positive for a banned substance.

Both positive tests that resulted in ineligibility were for THC, a metabolite in marijuana. The rate of ineligibility was 0.1 percent.

In addition, 31 student-athletes (2.0 percent) tested positive for other substances on the 1988-89 banneddrug list but did not lose eligibility under the guidelines of the NCAA drug-testing program. Thirty of these positive tests were for sympathomimetic amines, mild stimulants found in many over-the-counter cold and diet products.

In August, the NCAA Executive Committee approved the removal of sympathomimetic amines from the list of banned drugs.

Drug tests were administered to 730 participants in 14 winter championships and 795 participants in 10 spring championships.

Including results from the fall, a total of 3,143 student-athletes were tested at NCAA championships or postseason football bowl games in 1988-89. Thirteen student-athletes (0.4 percent) tested positive for 15 banned substances and lost their postseason eligibility.

Of the 9,807 student-athletes

Commission

Continued from page 1

ics and to suggest actions that the Commission may wish to consider. Subsequently, all of the discussions in the four National Forum sessions were added to that assignment.

The matter of requiring disclosure of graduation rates came up at the 1989 Convention, and the Commission reported to that Convention that it would sponsor legislation in that regard at the next Convention. The logistics involved and the extent of the disclosure will be determined at the October 3-4 meeting.

In discussing Proposal No. 42, the Commission will consider the position taken by the NCAA Council in its August meeting; i.e., that the consideration of financial aid should be eliminated entirely in the Bylaw 14.3 initial-eligibility legislation. The Commission also will consider the alternative of delaying the effective date of Proposal No. 42, currently scheduled to be in effect August 1, 1990.

The report of the Advisory Committee to Review the Governance Process appeared in the August 2 issue of The NCAA News. One

Continued from page 1 dent-athletes in other sports or those students in other cxtracurricular tested in the past three years, 78 (0.8 percent) tested positive for 85 banned substances and were declared ineligible for postseason competition.

Student-athletes are required to sign a statement of drug-testing consent before they can be certified as eligible for postseason competition by an institution. All participants in NCAA championships are subject to drug testing, although testing is not conducted at all postseason events.

The accompanying charts provide drug-testing results for those postseason events at which drug testing was conducted.

Winter 1988-89 NCAA Drug Testing

Championship	No. of Tests	Positive Ineligible	Positive Eligible
Wrestling, I, II, III	120		1 pseudoephedrine
Rifle, NC	18

Winter Total	730	1 (.1%)	10 (1.4%)
Cum, 1988-89 Total	2,348	14 (.6%)*	69 (2.9%)**
* 12 student-athletes test	ed pos	itive for 14 b	anned substances.

** 67 student-athletes tested positive for 69 banned substances.

aspect of that report proposed a legislative timetable for use in the Association's new legislative calendar, which becomes effective next February. Later, the NCAA Legislative Review Committee proposed a different timetable, which appeared in the August 30 News. The Commission will consider both of those approaches.

Other items

Also on the agenda are reports from NCAA Executive Director Richard D. Schultz regarding the pending formation of a national "blue-ribbon panel" to review college athletics and the current status of planning for a certification/peerreview program for intercollegiate athletics.

The Commission also will make plans for determining roll-call votes for the 1990 Convention, as well as determining the placement of key proposals at certain places in the Convention agenda and eliciting support for any proposals sponsored by the Commission.

It also will receive the report of its Presidential Nominating Committee, which will meet in conjunction with the Commission gathering to determine a slate of candidates for vacancies occurring on the Commission in January.

On the agenda for the Division I subcommittee is a discussion of freshman eligibility. There also has been preliminary talk of a roundtable discussion on that issue at the 1990 Convention.

Chairs

The full Commission meeting will be chaired by Martin A. Massengale, chair of the Commission; chancellor of the University of Nebraska, Lincoln, and currently interim president of the University of Nebraska System.

Chairing the other portions of the meetings will be Lattie F. Coor, president, University of Vermont, Division I subcommittee; Thomas A. Bond, president, Eastern New Mexico University, Division II subcommittee; Rev. William J. Byron, president, Catholic University, Division III subcommittee, and Bernard F. Sliger, president, Florida State University, Presidential Nominating Committee.

Montclair State College is sponsoring women's varsity volleyball this season and has made plans to give varsity status to the women's soccer club team next year.

The two sports will increase the school's women's sports to nine teams.

Willie Rucker, who has coached softball for six seasons, also will coach the volleyball team. "Those who require a year to remediate underdeveloped academic skills are now being provided that year with Proposition 48 (officially NCAA Bylaw 14.3).

"Further," Walsh said, "the data from 1982-83 reflect conditions that prompted the passage of Proposition 48 and the satisfactory-progress requirements that became effective in 1986.

"These new academic requirements have not had a chance to affect these (reported) graduation rates, but their effect on the current student-athlete population is being carefully followed."

activities.

Open-ended answers

The A1R report emphasizes that the comments in Report No. 6 are individual responses and are not to be considered "nationally representative." However, the report says, "The comments are interesting because they tell us what was on the minds of almost half of the national sample when they were given the opportunity to say anything they wanted about college or intercollegiate athletics."

AIR grouped those responses into 10 topic areas: participation in athletics, time demands and use of personal time, finances at college, relationships with coaches, use of

Comment

Initial-eligibility legislation has proved beneficial

By Wilford S. Bailey

The need for integrity in intercollegiate athletics has been thrust into the national media spotlight. Unfortunately, much of the discussion has failed to address the full and true meaning of integrity, which is not only adherence to a code of ethical behavior, but also include the concept of wholeness.

Honesty, truthfulness and promise-keeping are of utmost importance in all areas of human activity, and the failure to adhere to these basic values of ethical behavior is so widespread as to evoke increasing concern about the future of our nation. This concern is indeed justified, for these are principles on which civilized society depends, and they must characterize intercollegiate athletics if higher education is to retain its credibility.

Integrity in college sports requires

"In 20 years with the NCAA, if there's one principle

Blackie Sherrod, columnist

NCAA

more than just adherence to these basic values; it requires a wholeness in the relationship of athletics and education. Adoption, by Division I member institutions of the NCAA, of Proposition 48 in 1983 (and its implementation in 1986) was a major step in achieving that wholeness, which, for far too many institutions, had been fractured for more than a decade.

Problems are institutional, not national

The marked decline in the number of football players not meeting the freshman eligibility requirements of Proposition 48 signed by 22 Southern universities is encouraging. Only 30 of 505 football players signed by these schools this year have failed to meet the NCAA's academic requirements for freshman eligibility, compared to 52 of 539 last year.

This is precisely the effect that had been anticipated when Proposition 48 was adopted, and the data from this survey provide objective evidence in support of the general perception across the nation that the higher standards for freshman eligibility are having a positive impact on the quality of education of student-athletes in high school.

A recent report by the Educational Testing Service titled "What Americans Study" shows that today's high school students are taking more core-curriculum courseswhich constitute the heart of the requirements of Proposition 48 than their predecessors were five years ago. The NCAA action to strengthen the freshman eligibility requirements has contributed to this progress.

Encouraging as these reports are, they must not lead to complacency. Progress that has been made is slight, compared to the need for enhanced quality of education if our nation is to remain competitive in a global economy and the health and welfare of our citizenry are to be improved.

Two additional points must be emphasized.

First, the NCAA regulation established only a minimum standard for eligibility for practice and competition in the freshman year. It is not an admissions standard. Any university that admits a studentathlete who does not have a reasonable chance of academic success not only risks erosion of institutional credibility, but also does a disservice to the student.

It is important to note that the level of academic preparation of students entering all research universities has increased significantly during the last decade and should increase even more in the coming one if their graduates are prepared to meet the challenges of the 21st

Consequently, the freshman eligibility requirements and also the minimum requirements of an institution for "special admit" students must be reevaluated when the data from the NCAA's 10-year research project now under way can provide guidance for more meaningful and

The concept of "special admission" for marginally qualified students with outstanding talents, whether in art, music or athletics, is defensible, but this practice must be

Basketball as game of skill loses by allowing six fouls

By Pete Strickland

To me, allowing basketball players to accrue six fouls rather than five so that the fans get to see the great players they came to watch is analogous to a school teacher wanting to discipline a child but never really following through on it. Also, while the fans' interest should be at heart in legislative and procedural decisions, I do not think they should

monitored carefully and not abused, as it has been too frequently in recent years.

Second, admissions and eligibility requirements constitute only the first stop in assuring wholeness in the relationship between athletics and academics. There must be careful oversight of the academic progress of each student-athlete, and academic support must be provided to assure that the student is able to achieve his or her potential in the classroom as well as on the playing field or court.

Because they devote so much time to practice and competition, from which the institution, as well as the individual, derives benefits, student-athletes are entitled to the quantity and quality of academic support necessary to achieve this objective. Most Division I institutions have been sensitive to this need and have recently improved their programs, but progress must continue.

Excellence in athletics and academics can be mutually reinforcing. If a university is to fulfill its primary mission of education, a wholeness must exist there in the relationship between athletics and academics, and the athletics program must be monitored carefully to assure compliance with all institutional, conference and NCAA policies and regulations.

Only then can we have integrity in intercollegiate athletics and credibility for an institution that justifies its support, from public or private funds, as a part of the higher education community entrusted by society with the responsibility for the preparation of the future leaders of our nation.

Bailey is a former president of the NCAA and former faculty athletics representative at Auburn University. This column first appeared in The Atlanta Constitution.

Baseball draws 14 million again

Baseball attendance at four-year and junior colleges fell just short of setting a new record for the 1989 season, according to Collegiate Baseball newspaper.

During the past season, 14.28 million watched the nation's college teams, just under the all-time high mark of 14.38 million of 1987.

This is the second time since Collegiate Baseball started compiling national figures in 1979 that total attendance reached 14 million. The increase of 1989 attendance

was 934,379 above last year's mark of 13,348,168.

"Dick is an outstanding leader

who sincerely represents Division

I-A concerns," said Milo R. Lude, chair of the Division I-A Directors

Assocition and director of athletics

at the University of Washington.

'We couldn't have chosen a more

deserving recipient for the inaugural

award."

Attendance figures are compiled from questionnaires sent to fouryear and junior colleges. Figures include regular-season home attendance, postseason play-offs, and various College World Series and championship finals.

Mississippi State University, which drew 143,241 for the season, including regional play-offs, averaged 4,476 at home to top the nation in this category. Mississippi State also drew a record 14,991 for a new single-game record.

California State University, Fresno, reported it drew 147,147 to lead in overall attendance. The Bulldogs averaged 4,328 per home game. The NCAA Division I play-offs drew a record 132,865 at Omaha.

Schultz to get ADs' award

Richard D. Schultz, executive post at Cornell. director of the NCAA, has been selected by the Division I-A Directors Association to receive the inaugural Division I-A Directors Award.

Schultz will be honored during the annual Division I-A fall meetings at the Delta Scholar-Athlete Awards Luncheon October 10 in Tucson, Arizona.

The Division I-A Directors Award will be presented annually to a past or present Division I-A director of athletics or conference commissioner who has contributed exemplary service to intercollegiate athletics in general and Division I-A concerns in particular.

Schultz served as director of athletics at the University of Virginia from 1981 to 1987. He also held the same position at Cornell University (1976 to 1981).

Schultz received a bachelor's degree in physical education from Central College (Iowa) and a master's from the University of Iowa.

Schultz taught and coached in the high school ranks for 10 years. The Iowa native then moved on to the University of Iowa to coach basketball. After serving as head coach for five years (1970 to 1974), Schultz became assistant to the president before assuming the AD Basketball Continued from page 4 games that involve teams winning

in grand style without their superstar who, as a direct result of playing poorly and awkwardly, has fouled out, or teams methodically attacking with precision and discipline a player's defensive weakness and fouling him out, thereby allowing the team that has demonstrated such patience and concentrated effort to prevail where it otherwise might not have.

A third example also pops to mind. The example of a player who previously has played a minimal role in a team's fortunes rising to excellence (however brief) in an extended role when his teammate was in foul trouble. That is what helps teach youngsters that hard work plus opportunity can spell success, and it is one of the continuics.

If we are to institute the six-foul rule, heck, why not take all the variables of a 15-man team out of the game? Let no one foul out and if any one of the top 10 players gets tired, let him call one of his three allotted timeouts to rest. That way the public gets to see just those top 10 players it supposedly clamors so much to see.

I think the public really comes to see teams that embody, through a 15-man effort, what is right about unselfishness, togetherness and sacrifice for common goals.

Strickland is assistant men's basketball coach at Virginia Military Institute

Coordinator

Jon Bible, a practicing attorney and a professor at Southwest Texas State University, has been selected as the NCAA's national baseball umpiring coordinator. The part-time position was established for umpire development and improvement. Bible has been a top college baseball umpire since 1974.

News Quiz

The following questions relate to information that appeared in August issues of The NCAA News. How many can you answer?

1. True or False: Partial qualifiers are bound by a signed national letter of intent, but institutions are not.

2. Who chaired the Presidents Commission Advisory Committee? (a) Wilford S. Bailey; (b) John W. Ryan; (c) Otis A. Singletary; (d) John L. Toner.

3. How much must University of Virginia officials raise in private money toward construction of a new basketball arena? (a) \$25 million; (b) \$36 million; (c) \$20 million; (d) \$40 million.

4. True or False: Women accupy two of the three positions on the NCAA Memorial Resolutions Committee for the 1990 Convention.

5. What is Montclair State University's new nickname for sports teams? (a) Cardinals; (b) Golden Eagles; (c) Red Hawks; (d) Sparrow Hawks.

6. Before recently being named NCAA director of compliance services, where was Kevin C. Lennon employed? (a) University of Notre Dame; (b) Southwest Athletic Conference; (c) Southeastern Conference; (d) NCAA legislative services department.

7. Which national cable network will show 14 high school football games this season? (a) SportsChannel America; (b) ESPN; (c) TNT; (d) FNN/ Score

8. What is the total of the recently approved NCAA budget for 1989-90? (a) \$78.9 million; (b) \$79.8 million; (c) \$87.9 million; (d) \$89.7 million.

9. True or False: During the 1980s, the cost of college education has risen at a rate well below the rate of inflation.

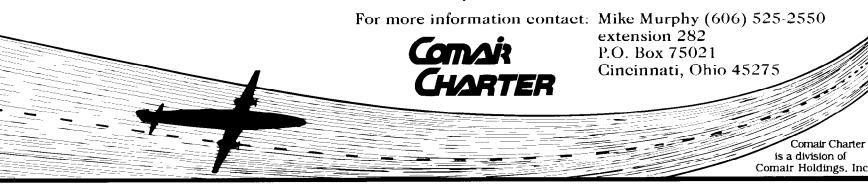

10. What was women's national college basketball attendance during 1988-89? (a) 3.58 million; (b) 3.85 million; (c) 2.91 million; (d) 1.29 million. Answers appear on page 20.

Show features athletics at black schools

"Black College Sports Today," a 30-minute weekly program focusing on the NCAA's predominantly black schools, is being aired by ESPN on Wednesdays at 2:30 p.m. EDT. The 26-show series, which will follow ESPN's "Coach's Corner" series, will continue through the 1989-90 basketball season.

Each show will highlight football, basketball and other sports action from the more than 40 black colleges and universities. Four conferences will be represented: the Mid-Eastern Athletic Conference (MEAC), the Central Intercollegiate Athletic Association (CIAA), the Southern Intercollegiate Athletic Conference (SIAC) and the Southwestern Athletic Conference (SWAC).

Don Johnson, who most recently served as a producer at WFLD-TV in Chicago, will host each show. Feature reports will be filed by Stephen Lipscomb, who formerly anchored "MEAC Today" and served as sports director at WKZL-FM in Winston-Salem, North Carolina. The program will be produced by Focus Marketing, Inc., Greensboro, North Carolina, in association with ESPN.

Tax ruling appealed by Association

NCAA attorneys told the Kansas Supreme Court September 14 that the Association was "no more than the sum of its parts" and, as a result, should be exempt from paying state sales tax because it is an educational institution.

State Supreme Court justices heard arguments in an Association appeal of a ruling by the Kansas Board of Taxing Appeals that the NCAA is not exempt from paying sales tax because it does not qualify as an educational institution under Kansas law. Under a Kansas Department of Revenue ruling, the NCAA must pay Kansas' 4.25 percent sales tax on all items purchased by the national office (e.g., office supplies and furniture).

The Associated Press reported September 15 that NCAA legal counsel contended before the Kansas Supreme Court that since the Association consists of more than 800 colleges and universities, it should be considered an educational institution and exempt from paying sales tax.

"We're no more than the sum of our parts," said C. W. Crumpecker, an attorney with Swanson, Midgley, Gangwere, Clarke and Kitchin, the Association's Kansas City legal counsel. "(The NCAA) is not a separate entity," he told the court. "It is a voluntary association of 800 colleges

Committee chairs

11 Idaho .

By James M. Van Valkenburg NCAA Director of Statistics

Coaching stability is the dominant theme in a study of the top winning teams in NCAA football in the 1980s in all four divisions.

Three of the four divisional leaders have had the same head coach throughout the decade. In Division I-A, Nebraska's Tom Osborne succeeded his boss, Bob Devaney, in 1973. In I-AA, Eastern Kentucky's Roy Kidd is in his 26th season on the job. In III, Bob Reade took over at Augustana (Illinois) in 1979.

North Dakota State seems to be the exception, with three head coaches in the 1980s, but each won at least one Division II national championship; two moved up to higher divisions, and each had been an assistant there, so staff stability is a reality. Rocky Hager is the latest in the line of succession. The stability factor goes much deeper than just the divisional leaders. In fact, 20 top-10 teams in the four divisions have had the same head coach all during the 1980s and often, much longer. Five other top-10 teams have had the same head coach all but one year in the decade. A two-way street

Cynics will say it's easy to have stability when you win, since at most colleges, if you do not win, you are gone. But it is a two-way street. Coaches like Kidd, Reade and many others have had many chances to move up to higher divisions but chose to stay put. And North Dakota State is far from being the only college that has promoted from within when the head man moved along. The point is, colleges and coaches opting for stability often are rewarded with consistent winning programs.

Division I-A

The Devaney-Osborne regime at Nebraska started in 1962 and has a 259-56-4 record (.818 percentage) in that span. Its 27 straight winning seasons is the longest current I-A streak. Devaney, now athletics director, was 101-20-2 (.829) the first 11 seasons. Osborne is 158-36-2 (.811) the past 16.

Stability is everywhere in I-A. LaVell Edwards has been at Brigham Young since 1972, Joe Paterno at Penn State since 1966, Terry Donahuc at UCLA since 1976, Danny Ford at Clemson since 1978 and Bo Schembechler at Michigan since 1969. Just below the top 10, Bobby Bowden has been at Florida State since 1976 and Don James at Washington since 1975.

Just missing are Auburn (Pat Dye since 1981), Georgia (200-game winner Vince Dooley retired last year) and Oklahoma (Barry Switzer, on the job since 1973, resigned this summer). The only exceptions in the top 13 are Miami (Florida), winner of two national titles in the

Ohio State junior Greg Frey leads Division I-A in passing efficiency

* Ties computed as half won, half lost. No team in 1987 and 1988.

Division I-AA

1988

At Eastern Kentucky, winner of the 1982 I-AA national championship and second in 1980 and 1981. Kidd has been head man since 1964. At Georgia Southern, the I-AA champion in 1985 and 1986 and second to Furman last year, Erk Russell started the football program from scratch in 1982 and fielded his first varsity team in 1984. W. C. Gorden has been at Tackson State since 1976, Chris Ault at Nevada-Reno since 1976, Harold "Tubby' Raymond at Delaware since 1966 and Jim Donnelly at Middle Tennessee State since 1979. Dick Sheridan established Furman from 1978 to 1985, finishing second his last year, then Jimmy Satterfield won it in

But the king of stability and the game's all-time top winner is 70year-old Eddie Robinson, who started at Grambling August 31, 1941. To put 1941 in perspective, Franklin Roosevelt was starting his third term as president; Pearl Harbor did not come until December 7, and in college football, the first official scoring rules (needed for accurate statistics) were devised by a coaches' subcommittee headed by former Michigan coach Fielding "Hurry Up" Yost, then 78.

This is Robinson's 47th season (no team two years during World War II; he coached the city's high school team). The record is 57 by the late Amos Alonzo Stagg, whose 313 wins was second, 36 behind Robinson entering this season. Texas Christian coach, in 1979. Two years later, they met in the national finals, and Wacker, then at Southwest Texas State, won the title. Morton won the 1983 national crown and finished second in 1984, losing to Troy State, 18-17, on a final-play, 50-yard field goal. Earle Solomonson, now Montana State coach, then moved up and won two straight national crowns in 1985 and 1986.

Hager was next and won it all last year. And the tradition goes back before Wacker to men like 200game winner Darrell Mudra and Ron Erhardt, with national wircservice titles in 1965, 1968 and 1969. Over the past 23 seasons, State's record including play-offs is an amazing 204-47-3 (.809).

Division III

Reade's incredible run at Augustana started in 1982 with second place in the Division III play-offs. Then came four straight national crowns. His .918 percentage for the decade is the best in football.

Ron Schipper, at Central (lowa) since 1961, was second in 1984 and 1988 and won the title in 1974. He is one of football's 200-game winners [as is John Gagliardi, at St. John's (Minnesota) since 1953, the 1976 champion]. Schipper is going for his 29th straight winning season. That would tie the all-time, alldivisions coaching record set by John Merritt (last 21 at Tennessee State ending with his death in 1983; first eight at Jackson State starting in 1955). Paul "Bear" Bryant also had 28 (last 25 at Alabama through 1982; Texas A&M prior), and Robinson had 27 through 1986 at Grambling.

Getting back to the 1980s top 10, Jim Butterfield has been at Ithaca since 1969. He got his second national crown last year and was second twice.

Widener's Bill Manlovc, winner of the 1977 and 1981 national titles, started there in 1972. Three more in the top 10 have had the same coach since 1981 Dayton (Mike Kelly), Wagner (Walt Hameline) and Baldwin-Wallace (Bob Packard). Hameline's team beat Kelly's in the 1987 national finals.

Wittenberg has had 34 straight winning scasons, longest in any division.

Here are the decade's top 20 winners:

Aurora's Brian Fetterolf leads Division III defenders in interceptions

6,053 to the all-time-high 833,285 of October 22, 1983. The schedule provided the correct combination of sites to break the record, but the crowd at Penn State was 5,370 below capacity, and that at Louisiana State was 4,626 below. Michigan led the list at 105,912, followed by Tennessee at 93,659 and Ohio State at 88,670.

Close to record pace

The nation's Division I-A fieldgoal kickers fell off a bit September 16 but remain close to a record accuracy pace without the tee, with 68 percent accuracy so far this season vs. the record of 68.2 for the entire 1984 season. From at least 40 yards, kickers are 53.3 percent accurate so far this season vs. the record 52.3 for all of 1984.

Quotes of the week

It was career victory No. 70 for Erk Russell September 9, but that had escaped the veteran Georgia Southern coach: "When somebody handed me a football with a 70 on it, I thought it was my age." When asked what brand of cigar he smokes in victory, Russell said: "O.P.'s." O.P.? "Yeah, O.P.," Russell said. "Other people's." (Matt Rogers, Georgia Southern SID)

Brigham Young coach LaVell Edwards visited the New Mexico locker room before his own after his team beat the Lobos. "I'm proud of you," Edwards said. "You've just got to keep it up. You can play this way every week if you use the same effort you used to get ready for us." When Edwards was finished, reported Doug Robinson of the Salt Lake City Deseret News, the Lobos were on their feet applauding and thanking him. (The Lobos then whipped New Mexico State, 45-13, and nearly upset Texas Tech before losing, 27-20.) (Ralph Zobell, Brigham Young associate SID)

Stephen F. Austin's Larry Centers, top returning rusher in the Southland Conference, on his veteran offensive line: "With the offensive line we've got, I could go to China and talk democracy." (Lisa Grider, Southland Conference assistant commissioner)

"I'm just going to play it year by year," Robinson told Mal Florence of the Los Angeles Times. "My wife, Doris, hints that she wants me to give it up, but she never lets a trip pass her by. She always has her bags packed. In earlier years, we didn't have enough money to afford her to go with me."

Robinson recalls that he was awed when he met Stagg at a 1956 coaches convention. "I waited in a line that seemed like a mile long, and I was so impressed, I wondered if he had three eyes and three ears," Robinson said, adding that he was overcome emotionally when he was standing in front of Stagg. "Another coach behind me said, 'Eddie, just kiss him and move on.""

Here are the top 20 teams in I-

Jim Sochor has been at secondplace UC Davis ever since 1970. His 1982 team was second to Wacker's in 1982.

Dick Lowry has been at Hillsdale since 1980, Jim Malosky at Minnesota-Duluth since 1958, Gene Carpenter at Millersville since 1970 and Douglas Porter at Fort Valley State since 1979. Minnesota-Duluth's 19 straight winning seasons leads the division. Here are the top 20:

* Ties computed as half won, half lost.

827,232 is No. 2

The nation's top 10 attendance games September 16 totaled 827,232 spectators, second highest by a scant

At Wagner, the new overwhelmed the familiar at the season opener. Retired were the veteran announcer, veteran trainer and original scoreboard, all after about a quarter century. And there were 18 new starters and seven new assistant coaches. Only coach Walt Hameline and the final score (Wagner won) seemed familiar. When asked before the game whether he wanted the offense or the defense announced to the crowd, Hameline joked: "How about announcing the coaching staff?" (John Stallings, Wagner SID)

University of Hawaii women's volleyball coach Dave Shoji addresses the media during the September 6 NCAA Accent on Women's Volleyball press conference in Honolulu. Also featured were (from left) Andy Banachowski, head coach at the University of California, Los Angeles; University of Texas, Austin, coach Mick Haley, and Colorado State University coach Rich Feller. The Division I Women's Volleyball Champlonship will be hosted by Hawaii December 14 and 16 at the Blaisdell Center in Honolulu.

Grants available to tennis programs

Volvo North America Corporation will provide \$80,000 in grants to be divided among 120 varsity tennis programs across the nation for their continued promotion of college tennis. The program will continue through 1990.

"The unique Volvo Tennis/ Collegiate Series Varsity Awards Program is a national push to induce college tennis coaches to become more focused on community service and actively promote their teams to the public," said Bill Mergler, director of corporate promotions for Volvo. "Interest in collegiate tennis has greatly increased in the past five years in which Volvo has been involved."

To qualify for the varsity awards

program, a college tennis coach must provide a minimum of 10 hours in community service. Types of services conducted are clinics for local underprivileged youth, raising money for local and national charities, and speaking out against drugs and alcohol. In addition, the coach must document at least five newspaper features generated by his or her tennis program.

Once qualifications have been met, the top five teams participating in each region or division will be awarded the grants in order of their position on the Volvo Tennis/Collegiate Rankings.

Five men's and five women's Division I teams in each of the Intercollegiate Tennis Coaches Association's eight regions will earn the grants. In each of the small-college divisions, five men's and women's teams will be awarded grants. This includes Divisions II and III, NAIA, and junior college. A Division I team could be awarded as much as a 1,500 grant for its school's tennis program. The 120 recipients will be announced in June 1990 by the ITCA and Volvo Tennis.

"We are pleased with Volvo's continuous support of collegiate tennis and believe that the varsity awards program will generate even more coaches' community service efforts and facilitate additional public awareness for the 30,000 intercollegiate tennis programs nationally," said David Benjamin, executive director of the ITCA.

Ohio Wesleyan record best in men's soccer

Editor's note: This is the first of two articles on men's soccer. A look at the most successful team in NCAA championships competition will appear next week.

Ohio Wesleyan University has produced the best winning percentage in men's soccer since 1980, according to a survey conducted by the University of North Carolina, Greensboro.

The Battling Bishops have compiled a 152-31-13 overall record during the 1980-1988 seasons for an .8087 winning percentage edging Division III rival Salem State College, which has a 136-25-19 record (.8083).

But Salem State, coached by Nick Padovani, has the distinction of fewest losses (25) among the teams surveyed.

Winning percentages were computed by dividing the number of wins and one-half the number of ties by the total number of contests.

Indiana University, Bloomington, a three-time Division I champion (1982, 1983 and 1988), was third in the overall listing and led all teams in its division. The Hoosiers are 164-35-13 overall (.8042) and have more victories than any other program since 1980.

The 1981 Division III champion, Glassboro State College, ranks slightly behind Indiana with a 149-31-14 record (.8041).

North Carolina-Greensboro, which has five Division III titles (1982, 1983, 1985, 1986 and 1987), is fifth with a 155-36-8 record (.79899). The Spartans, now competing in Division II, edged neighboring Duke University in the listing. Duke, the 1986 Division I champion, has a 145-32-12 record (.79894).

Rounding out the top 10 are the University of Scranton of Division III (.794); the University of California, Los Angeles, the 1985 Division I champion (.789); Clemson University, Division I titlist in 1984 and 1987 (.787), and 1987 Division II champion Southern Connecticut State University (.784).

Judge's ruling on NCAA motion is pending

Nevada Supreme Court Chief Justice Cliff Young says a ruling could come in a month on the latest motion in continuing litigation involving the NCAA and Jerry Tarkanian, head men's basketball coach at the University of Nevada, Las Vegas.

In a published report, Young was quoted as saying the state Supreme Court will rule "in a month, barring some unforeseen catastrophe.

"We're coming toward the wire," he added. "We're waiting for more research."

Filed in mid-May, the Association's motion seeks to dissolve a district court injunction against the NCAA that prevented Tarkanian's suspension when UNLV's men's basketball program was placed on probation more than 10 years ago, and to vacate the awarding of attorney's fees in favor of Tarkanian. The motion also suggested that the court consider whether the injunction against UNLV should continue. In response, Tarkanian filed a countermotion seeking payment by the NCAA of the attorney's fees he has incurred as a result of the litigation and arguing that the injunction against UNLV be continued. Last December, the U.S. Supreme Court, on appeal by the NCAA, ruled that the Association had not violated Tarkanian's right to due process during its investigation, be-

cause the NCAA, as a private organization, is not bound by the dueprocess protection afforded in the U.S. Constitution.

The NCAA contends, however, that it observes due-process procedures during its investigation.

The U.S. Supreme Court remanded the case to the Nevada Supreme Court for review with a mandate to handle the case in accordance with the U.S. court's findings. The Nevada district court in 1984

enjoined both UNLV and the NCAA from suspending Tarkanian from his head-coaching position for two years. In 1987, the Nevada Supreme Court upheld the injunctions.

Executive summary of AIR Report No. 5

Executive Summary

This report, the fifth in a series describing results from the 1987-88 National Study of Intercollegiate Athletes, presents the results from preliminary analyses of the academic transcripts of intercollegiate athletes at NCAA Division I institutions. The study was conducted by the American Institutes for Research (AIR) for the Presidents Commission of the National Collegiate Athletic Association (NCAA). It was designed to answer four broad sets of questions posed by the Presidents Commission as part of its National Forum on the proper role of intercollegiate athletics within higher education.

The data from academic transcripts obtained for the 1987-88 National Study of Intercollegiate Athletes begin to describe the progress being made by students in pursuit of their college degrees. These transcripts were collected in the spring of 1988 from all students participating in the national study, For the most part, the transcripts include course and grade information for all courses taken at the

In terms of academic performance, we find that football and basketball players earn lower GPAs on average in the prime study areas than either studentathletes in other sports or extracurricular students

institutions through the 1987-88 fall semester or the 1987-88 fall and winter quarters. In a few instances, the transcripts were received from the institution early in the summer of 1988 and thus included course and grade information for all the courses taken during 1987-88 fall, winter and spring terms.

A stratified random subsample of 21 institutions was selected from the 42 institutions in the national study. In all, 2,077 transcripts were coded. The coding procedures were both comprehensive and laborious; every item of information on every transcript in the subsample was entered into the data base for subsequent

analysis. Data for a total of 49,729 courses were entered: an average of 24 courses for each of the 2,077 students.

Tables included in the full report show the academic units, or credit hours, and grade-point averages (GPAs) earned by football and basketball players, student-athletes in other sports, and extracurricular students in 17 areas of study. The numbers of units that are presented refer to quarter units; i.e., semester units have been converted into quarter units. GPAs are reported on a four-point scale, where 4.000 equals A, 3.000 equals B and so on. The 17 study areas include such general categories as business, social sciences, physical sciences, and arts and humanities. Also included are four study areas that relate specifically to physical education and sports (e.g., physical education activity courses, physical therapy and sports medicine), and one area that relates specifically to participation in extracurricular activities-visual and performing arts.

Other tables in the full report describe performance in these 17 areas for football and basketball players in more or less successfully competitive intercollegiate athletics programs. Our measure of success in competition was the win-loss records and quality of opponents of football and men's basketball teams over time (Sagarin ratings, USA Today, average of 1985-86 and 1987-88 ratings for football and average of 1984-85 and 1987-88 ratings for men's basketball).

The results described in this report may be grouped into two areas-those relating to academic progress and those relating to academic performance. Generally in terms of academic progress, we find that student-athletes earn their credits in study areas that are similar to those of extracurricular students and that football and basketball players in more successfully competitive athletics programs earn their credits in study areas that are similar to those of their counterparts in less successfully competitive athletics programs. For all of these students, six areas-arts and humanities, biological sciences, business, physical sciences, social sciences, and visual and performing arts---account for the majority of units carned. We use the term prime study areas to describe these six areas for ease of reference.

In terms of academic performance, we find that football and basketball players earn lower GPAs on average in the prime study areas than either student-athletes in other sports or extracurricular students. Similarly, football and basketball players in more successfully competitive athletics programs earn lower GPAs in the prime study areas than football and basketball players in less successfully competitive programs. Football and basketball players earn their highest GPAs

Football and basketball players earn their highest GPAs in physical education courses

in study areas related to physical education. More specific findings are presented below.

Academic progress **Key findings:**

• Student-athletes in all classes earn total numbers of units that are comparable to those that extracurricular students earn. Freshman student-athletes earn slightly fewer units: Football and basketball players earn a total of 31 units on the average, and student-athletes in other sports earn an average of 27 units, as compared to 35 units for extracurricular students. By their senior year, football and basketball players carn an average of 145 total units and student-athletes in other sports earn an average of 153 total units, as compared to 143 units for extracurricular students.

 Student-athletes carn the majority of their units in the prime study areas of arts and humanities, biological sciences, business, physical sciences, social sciences, and visual and performing arts, just as extracurricular students do. For example, freshman football and basketball players earn 28 percent of their total units in the arts and humanities, 25 percent in the social sciences, and 17 percent in the physical sciences. These percentages may be compared to those for freshman extracurricular students, who earn 25 percent, 23 percent and 14 percent, respectively, of their total units in these areas. Freshman student-athletes in other sports earn 27 percent, 27 percent and 19 percent, respectively, of their total units in these three areas.

• Student-athletes, at any point

in their college careers from freshmen to seniors, earn fewer than eight percent of their total units (since enrollment) in physical education and physical education-related courses (e.g., sports medicine, sports management). This can be compared to extracurricular students, who, at any point in their college careers, earn at least 12 percent of their total units in visual and performing arts courses. [Thirtyseven percent of the extracurricular students in the national sample were drawn from the performing arts (c.g., band.)]

 Football and basketball players have not earned significantly more units away from their Division 1 institutions-i.e., at two-year colleges or other colleges and universities --- than extracurricular students have: There are no differences between the groups in the mean numbers of credits transferred from one or more other postsecondary education institutions (transfer units). Football and basketball players at Division I institutions with more successfully competitive athletics

Despite evidence of lower GPAs in prime study areas, football and basketball players are no more likely to be placed on academic probation by their institutions than are student-athletes in other sports or extracurricular students

programs are not credited with more transfer units than football and basketball players at less successfully competitive institutions.

• Eight percent of football and basketball players have been credited with 26 or more transfer units by their Division 1 institutions, as compared to eight percent of the student-athletes in other sports and six percent of extracurricular students. Looking only at football and basketball players, eight percent of those enrolled in more successfully

competitive athletics programs have 26 or more transfer units credited on their transcripts, as compared to four percent of those enrolled in less successfully competitive athletics programs.

Academic performance Key findings:

• For the most part, football and basketball players appear to earn lower GPAs than student-athletes in other sports and extracurricular students in the prime study areas of arts and humanities, biological sciences, business, physical sciences, social sciences, and visual and performing arts as freshmen, sophomores, juniors and seniors. For example, among seniors, football and basketball players appear to carn average GPAs in each of these areas that are about one-half grade point lower than those earned by either student-athletes in other sports or extracurricular students.

 Football and basketball players carn their highest GPAs in physcial education courses. Among seniors, for example, the average GPA earned by football and basketball players in physical education activity and physical education theory and coaching courses is slightly more than one-half grade point higher than their highest average grade in any of the prime study areas (i.e., about 3.240 for physical education activity and physical education theory and coaching courses versus 2.610 for visual and performing arts courses).

• Among the prime study areas, extracurricular students earn their highest grades in visual and performing arts courses. As seniors, these students earn an average GPA of 3.270 in visual and performing arts; the next highest GPA they carn in one of the (remaining) prime study areas is 2.970, which they earn in arts and humanities courses.

• For the most part, football and basketball players in more successfully competitive athletics programs appear to earn lower GPAs than their counterparts in less successfully competitive programs in each of the prime study areas. As freshmen, football and basketball players in the more successfully competitive programs appear to earn GPAs that are about .41 grade points lower in these areas; as sophomores their GPAs appear to be about .11 grade points lower; as juniors, their GPAs appear to be about .22 grade points lower, and as seniors, their GPAs in these areas appear to be about .90 lower on the average.

• Freshman, sophomore, junior and senior football and basketball players in more successfully competitive athletics programs earn GPAs in physical education activity courses and physical education theory and coaching courses that average from .79 to 1.81 grade points higher than their GPAs in any of the prime study areas.

Three schools get grants to start men's volleyball

Three new NCAA varsity men's I feel very strongly about support- move to varsity status. This grant sport in our area."

volleyball programs will be introduced during the 1990 season through a grants program offered by the U.S. Volleyball Association in cooperation with the Sporting Goods Manufacturers Association, the Educational Foundation of the USVBA and a select committee chaired by businessman Rick Moos.

Juniata College, Long Island University/C. W. Post campus and Jersey City State College each will receive a start-up grant for the 1990 season in return for their commitment to sponsor an NCAA varsity men's volleyball program, USVBA Executive Director Cliff McPeak said.

"It's great that the USVBA can play a role in the continued expansion of the sport. It's something that ing, and it reflects our commitment to the growth of men's volleyball," McPeak said.

The colleges are enthusiastic about the establishment of men's varsity volleyball at their school. The schools had strong men's club programs and cited that as a major impetus for establishing the sport at the varsity level.

'We're extremely happy. Volleyball is one of the sports we've been thinking about expanding. We've had a strong club program. That's one of my criteria for establishing a varsity sport," Juniata athletics director William F. Berrier said. "Usually, I require that a club program be in existence and be strong for at least three years before we make a

allowed us to proceed ahead of that schedule by one year.

> "It's been casy to put together a schedule," Berrier said. "Every school I've called that's in the area and has a program has agreed to play us in our first season."

At Long Island-C. W. Post, athletics director Mary Topping said, "By offering volleyball, LIU will be attractive to many who want to keep playing. The high schools are playing more boys' volleyball, and the boys will want to continue to play in college. We're very grateful to have the opportunity to start the program. This is a great thing that the USVBA is doing. This is a really grass-roots campaign, and the results should be very positive for the

Jersey City State athletics director Lawrence R. Schiner explained that the grant money enables his school to get the program off in a "fine manner. With the grant money, we will be able to attract the type of coach we want and to buy the quality equipment we want," he said. "We felt that if we were going to do it (the program), we wanted to do it right. The grant affords us the opportunity to do that." The USVBA will continue the grants program in coming seasons. Donations to the men's varsity vol-

leyball grants program should be sent to the USVBA, attention Dick Powell, director, Recreational Programs and Services, 1750 E. Boulder Street, Colorado Springs, Colorado 80909

• Despite evidence of lower GPAs in the prime study areas, football and basketball players are no more likely to be placed on academic probation by their institutions than are student-athletes in other sports or extracurricular students. Football and basketball players in more successfully competitive athletics programs are also no more likely to be placed on academic probation by their institutions than are their counterparts in less successfully competitive institutions.

Executive summary of AIR Report No. 6

Executive Summary

This report, the sixth in a series presenting results from the 1987-88 National Study of Intercollegiate Athletes, describes the written answers to a question that asked students participating in the study if there was anything else they wanted to say about their lives at college. The study was conducted by the American Institutes for Research (AIR) for the Presidents Commission of the National Collegiate Athletic Association (NCAA). The study was designed to answer four broad sets of questions posed by the Presidents Commission as part of its National Forum on the proper role of intercollegiate athletics within higher education.

This report describes written answers from three groups of students to a questionnaire item that asked, "Are there things about your life at college you would like to tell us that we didn't ask about? If so, what are they?" The students were selected from a sample of 42 NCAA Division I colleges and universities. The three groups were: (1) students who participate in intercollegiate athletics, (2) students who participate extensively in other extracurricular activities, such as band or orchestra, drama or other performing arts, student newspaper or radio, or college work-study programs, and (3) a special sample of black students not participating in intercollegiate athletics or other extracurricular activities.

Of the 4,083 students who completed the questionnaires during the national study, 1,789 answered the write-in question. The 1,789 included 1,240 student-athletes (42 percent of all student-athletes who completed questionnaires), 391 extracurricular students (48 percent of those completing questionnaires), and 158 black students (47 percent of those completing questionnaires).

The 1,789 answers were coded according to the topics presented in Report No. 1: Summary Results from the 1987-88 National Study of Intercollegiate Athletes and were grouped by topic. Sufficient numbers of answers were obtained in 10 topic areas to warrant further examination. All the answers in

Physical and emotional stresses coupled with an overriding demand for winning at all costs were most often stated as pressures in intercollegiate athletics however, because they tell us what was on the minds of almost half the national sample when they were given the opportunity to say anything they wanted about college or intercollegiate athletics.

Descriptions of comments in 10 topic areas are presented in the following sections of this Executive Summary.

Participation in athletics

More than 100 student-athletes and other students wrote comments describing their general feelings

As a solution to their problems with coaches, some student-athletes suggested that counselors or other intermediaries should be available to ensure that communications between coaches and players were as open and effective as possible

about participation in intercollegiate athletics or other extracurricular activities. About equal numbers of student-athletes wrote of the benefits and of the pressures in intercollegiate athletics, with several focusing on the "big business" aspect of sports at the college level. The benefits included traveling, meeting new people, working with a team toward a common goal, learning how to manage time and to be more disciplined, and experiencing the thrill of game days. Physical and emotional stresses coupled with an overriding demand for winning at all costs were most often stated as pressures in intercollegiate athletics.

Some comments concerned the experiences of freshmen in intercollegiate athletics and described being on a team as a good way to meet people and to begin to feel at home away from home. Having others planning your schedules and telling you what to do, together with time demands, were reported as most bothersome to new students.

Some student-athletes who were not recruited but rather "walked on" in their sports commented that they felt less pressure and were participating to satisfy themselves rather than their coaches or the requirements of athletics grants. Other walk-ons commented, however, that coaches often overlooked them and generally made it more difficult for them to excel. curricular activities.

The comments indicate that the time required by intercollegiate athletics or other extracurricular activities impacts both academic performance and personal life. Many students-athletes wrote that they cannot do their best in their academic work because of lack of time. Other student-athletes described an inability to take the classes they need because of time conflicts. Still others commented that they had no social life at all because of lack of time. Many student-athletes suggested that a cap be placed on the amount of time that can be required by intercollegiate athletics. Several football players suggested that spring practice be reduced or eliminated to allow more time for other activities.

On the other hand, several student-athletes and extracurricular students noted that participation in athletics or other extracurricular activities helped them develop good time-management skills.

Finances at college

About 225 student-athletes and other students volunteered comments related to their financial situations at college. For football and men's and women's basketball players, the central theme concerned lack of funds for personal expenses—toiletries, telephone calls, dates and travel home. Many suggested that they should be paid for their participation in athletics in addition to their grants. Most felt that it would only be fair given that they "make so much money for the school."

Student-athletes in other sports often responded similarly, although almost an equal number praised their athletics grants or commented that their team needed additional funds, not they as individuals.

Among the specific problems

Several studentathletes complained that they were discriminated against by other students, athletics staff or professors merely because they were athletes

cited by grant athletes were the prohibition on working to carn moncy and their incligibility for Pell Grants or other financial aid. Several student-athletes described special financial problems because athletics grants do not provide extra allowances for those who are married, who have majors that require costly educational supplies or who attend school where the cost of living is particularly high. A few student-athletes offered specific suggestions for increasing funds, including building a personal fund, a standard rate of compensation and extra allowances in special circumstances.

A number of student-athletes pointed out that their coaches were unconcerned about their personal problems or the demands of their academic schedules. They also expressed concern over the number of rules imposed by coaches and unfair treatment by them.

As a solution to their problems with coaches, some student-athletes suggested that counselors or other intermediaries should be available to ensure that communications between coaches and players were as open and effective as possible. Others suggested that there should be a grace period after signing a letter of intent to allow students to escape from particularly stressful playercoach situations. Still others suggested that all freshman studentathletes be required to attend the same orientation programs as regular freshmen and that studentathletes be clearly informed of their rights.

The few positive comments volunteered by student-athletes focused on the clear benefits of constructive interpersonal relationships with their coaches.

Use of educational resources

The approximately 125 comments made about educational resources revealed that the three student groups in the national study share many concerns about the need for improved academic advising and assistance from college instructors. Student-athletes raised the question of why they cannot receive preference in scheduling classes because their athletics commitments place several constraints on them. They also noted that they need assistance in choosing courses from individuals who will take time to learn about their interests and keep in mind their athletics schedules.

Both student-athletes and other students noted that instructors were not understanding enough or willing enough to provide extra assistance. A number of student-athletes wrote that they feel that professors have poor images of what athletes can accomplish academically.

Among suggestions for changes were improvements in class scheduling, counseling and instructional assistance, and the provision of structured study periods and student study groups. Other suggestions were for the sharing of student schedules between athletics staff and college teachers and improved access to lecture materials missed due to travel or practice schedules. A final suggestion was for colleges to help more with job placement and to help potential employers take the demands of athletics participation into account when making about their choice of major. The students felt they received poor counseling or made poor choices on their own and were having to live with the consequences.

Health status and satisfaction with health care

More than 100 student-athletes and other students commented on some aspect of their health status or satisfaction with health care. The comments ranged from concerns about food and nutrition to pleasure for being in good physical shape. The subjects most often mentioned were food and nutrition, drug testing and drug use, injuries and exhaustion, and lack of sleep.

Concerns about food included complaints about the quality of the meals available and their nutritional

Many (studentathletes) suggested that they should be paid for their participation in athletics in addition to their grants. Most felt that it would be fair given that they "make so much money for the school."

value, as well as complaints that practice schedules interfere with meal times. Comments about drug testing concerned the feelings on the part of some that athletes were being singled out and their rights were being violated. Most comments about drugs, however, expressed the opinion that drugs and alcohol were used more by student-athletes than by other students.

Several student-athletes wrote about the physical strain that athletics places on their bodies, and some described particular injuries they received. Some of the studentathletes with injuries also described problems with the medical care they received. Some also described problems in paying the medical bills that resulted from athletics injuries. Many more comments, however, concerned fatigue and exhaustion due to being a student-athlete.

Psychological and

emotional well-being

Comments from about 220 students concerned their psychological and emotional well-being. Comments from student-athletes and extracurricular students fell into two areas: (1) discrimination because of athletics, gender or race, and (2) the consequences of the pressures of participating in athletics or other extracurricular activities. Comments from black students not participating in athletics or extracurricular activities were concerned almost exclusively with racial discrimination. Several student-athletes complained that they were discriminated against by other students, athletics staff or professors merely because they were athletes. Many women athletes reported being upset by a lack of equity between men's and women's sports. Most of the comments concerning racial discrimination were about minorities not receiving fair treatment, but a few See Executive, page 17

each topic area were analyzed to identify the common themes that are described in this report.

The results presented in the first five reports from the 1987-88 National Study of Intercollegiate Athletes are nationally representative in scope and are presented as group averages.

The comments from students that are described in this report are not nationally representative — they are the individual comments of those students who chose to answer the question.

The comments are interesting,

The largest number of comments were volunteered by student-athletes in sports other than football and men's basketball, with the common theme of a lack of financial support and institutional recognition for their sports.

Time demands and use of personal time

More than 400 students in all made comments about time, with two themes emerging: (1) the effects of the time required by intercollegiate athletics or other extracurricular activities on academic performance and personal life, and (2) timemanagement skills developed while participating in athletics or extra-

Relationships with coaches

More than 150 student-athletes volunteered comments about their relationships with and perceptions of their coaches. The majority of these write-in comments were critical, noting that coaches exert too much pressure with too little understanding of what it is to be an intercollegiate athlete and a student.

hiring decisions.

Satisfaction with college and educational experiences

About 160 student-athletes and extracurricular students made comments concerning their satisfaction with college, or their satisfaction with their educational experiences and achievements. The majority of the comments were positive and indicated a high level of satisfaction with college life in general. Some student-athletes indicated that they were enjoying their college experiences in spite of dissatisfaction with their coaches or athletics programs. A substantial minority of the comments were negative and indicated regrets about choice of college or dissatisfaction with educational experiences. Some expressed regrets

NBA player's gift starts \$100,000 scholarship

John S. Newman Jr., better known to basketball fans as rising NBA star Johnny Newman, has provided a \$50,000 gift to the University of Richmond, his alma mater, for establishment of a permanent scholarship in his name.

An anonymous donor has committed to matching Newman's donation, bringing the scholarship to \$100,000.

"I think it is very important for young people to get the opportunity to go to a quality institution (like) the University of Richmond," New-

Briefly in the News

man said in announcing the scholarship. "I was fortunate enough to get that opportunity through basketball, and because of that, I learned valuable lessons that have helped make me a success today. Now, I would like to give something back.

Charles S. Boone, Richmond athletics director, said the scholarship will be awarded annually to a student-athlete under criteria that include outstanding moral values, exemplary citizenship, financial need, demographics and academic standing.

Members of Northwestern University's football team have dedicated their 1989 season to the memory of 1988 teammate Jeff Hiller, who drowned in Lake Michigan over the summer. A defensive tackle from Plainfield, Illinois, Hiller earned a varsity letter as a freshman last season.

A decal featuring Hiller's number, 72, is being worn on Northwestern helmets this season, and that number will not be reassigned until his class graduates following the 1991 season. Hiller's locker in Dyche Stadium will remain empty-except for his uniform and gear - for the same length of time.

Luther College's men's and women's cross country teams have acted to rename the school's annual invitational cross country meet in honor of alumnus Rochelle Swiggum, who was killed in the July crash of United

xecutive

Continued from page 15 concerned reverse discrimination.

Many comments concerned depression and isolation because of participation in intercollegiate athletics. Several student-athletes wrote about unpleasant treatment by administrators, faculty or athletics staff. A few comments described physical violence on the part of develop socially-to meet people and learn to get along with them and to make new friends. The next most frequent comment concerned the opportunity to develop overall maturity through participation in intercollegiate athletics or other extracurricular activities. Other opportunities frequently mentioned were those to develop independence and responsibility, time-management skills, self-discipline, leadership skills, and communication and teamwork skills. Opportunities to travel also were mentioned. Several student-athletes noted that participation in intercollegiate sports gave them the opportunity to relieve many of the stresses associated with going to college.

ular students volunteered a number of comments about the importance of relationships with girlfriends and boyfriends at college. Several black students not involved in either athletics or extracurricular activities mentioned problems with establishing relationships when relatively few black undergraduates are on the campuses.

tor of Springfield's continuing education program, and Bridget Belgiovine, assistant athletics director.

The appreciation day was sponsored by the City of Springfield, the Springfield Golden Agers and Springfield College.

Michelle Brennan, a sophomore member of the Pennsylvania State University field hockey team, took one of the most important tests of her life September 7. The Canadian native took her immigration test to become a U.S. citizen.

More Report Cards: Seventy student-athletes at Louisiana State University earned grade-point averages of at least 3.000 (4.000 scale) during the spring semester. Twentyone had GPAs of at least 3.500, and six earned 4.000s

Among the 45 student-athletes named to the Jersey Devils Student-Athlete Honor Roll for 1988-89 at Fairleigh Dickinson University, Madison, was football player Marc Stingone, whose 3.770 GPA was the highest of those honored.

West Germany is looking for a few good American college football teams. Specifically, those associated with one of the more than 125 American-rules teams in West Germany are interested in scheduling games against U.S. college teamsat their place or yours.

When the Entertainment and Sports Programming Network began in 1979, it had 2,000 hours of original programming, 1.4 million subscribers, 250 affiliates and 12 national advertisers. Its first live broadcast featured slow-pitch softball.

Now celebrating its 10th birthday, ESPN has 4,500 hours of original programming, approximately 52.5 million subscribers, 20,500 affiliates and 800 national advertisers.

"In the early days, I don't think people took us very seriously," ESPN President Roger Werner Jr. told Associated Press writer Roger Blum recently. "They thought we were an oddity, a novelty, something that was not quite for real.

"Now I think people look at us and expect us to be pretty ... good."

Trivia Answer: The first weekly issue of The NCAA News was published September 6, 1982. For the record, it was Issue No. 16 of Volume 19.

Vicki Huber

Elliott awards announced

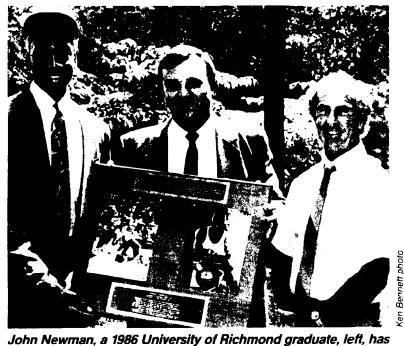

1988 Olympic 800 meter gold medalist Paul Ereng of the University of Virginia and Villanova University's Vicki Huber have been voted the recipients of the Jumbo Elliott Awards, which annually recognize the nation's most outstanding male and female collegiate track and field athletes. It was Huber's second consecutive Elliott award.

Ereng and Huber were selected on the basis of their outstanding performances during the 1988-89 collegiate indoor and outdoor track and field seasons by the ninemember selection committee.

As a sophomore at Virginia, Ereng, running for his native Kenya, started the 1988-89 season in top form, capturing the 1988 Olympic 800-meter title in a time of 1:43.45. Ereng went on to establish a world indoor record in the 800 meter of 1:44.84 at the World Indoor Championships in Budapest, Hungary (March, 1989); days later, he captured the NCAA indoor 800-meter championship in 1:47.50. Successfully defending his NCAA outdoor 800-meter title in June 1989, Ereng also won 10 of 11 races in Europe and recorded the year's two fastest 800-meter clockings: 1:43.16 in Zurich, Switzerland, and 1:43.22 in Nice, France. In his two seasons at Virginia, Ereng has captured three of three possible NCAA 800-meter titles. A psychology major, Ereng capped his outstanding year by receiving Virginia's best-male-athlete award.

meters at the 1988 Olympics in a collegiate record 8:37.25. Huber went on to capture her third consecutive NCAA 3,000-meter title, added a runner-up finish in the NCAA indoor mile and successfully defended her NCAA outdoor 3,000meter title for the third straight year. Huber captured seven NCAA titles over the past three years.

Holder of four American collegiate records (3,000 meters-8:37.35; outdoor mile - 4:28.77; indoor mile -- 4:28.3 and 1,500 meters 4:07.40), Huber in 1988-89 was selected as the Penn Relays' most outstanding female performer for her role on three Championship of America Relays and was the recipient of the Honda-Broderick Award for track. Also an outstanding student with a 3.380 cumulative grade-point average while majoring in psychology/premed, she was named the 1988-89 GTE/CoSIDA Academic All-America of the Year. She is a 1989 and 1988 first-team GTE/CoSIDA Academic All-America and the 1989 Big East Conference Scholar-Athlete of the Year. The Elliott awards are dedicated to the memory of Villanova's track and field coach for 47 years. Elliott's teams won eight NCAA team championships, three national AAU titles and 39 ICAAAA team crowns, while producing 32 track and field Olympians, 86 NCAA individual champions, 324 ICAAAA champs, 50 outdoor or indoor world recordholders and 476 American recordholders

announced a \$50,000 gift to establish a scholarship fund in his name. The gift was matched by an anonymous donor. With Newman are athletics director Charles S. Boone, center, and men's basketball coach Dick Tarrant. (plus \$3 postage and handling) from

Airlines flight 232 in Sioux City, Iowa.

Swiggum, 24, was a native of Utica, Minnesota, who was working as a psychiatric nurse in Denver. A top student-athlete at Luther, she has been recognized as one of the best runners in the school's cross country history.

"Aspire Higher: Careers in Sports for Women," is the title of a new video produced by the Women's Sports Foundation, with sponsorship assistance from Avia Athletic Footwear.

Among those appearing in the program, which features information on sports careers for women, are Merrily Dean Baker, NCAA assistant executive director for administration; Adrienne R. Lotson. NCAA enforcement representative; Regina L. McNeal, NCAA assistant director of communications; Cheryl L. Levick, assistant athletics director at Stanford University and a former NCAA staff member; basketball officials June Corteau and Patty Broderick; Donna A. Trivia Time: What was the date of the first weekly issue of The NCAA News? Answer later.

As part of a senior citizen appreciation day September 12, Edward R. Bilik, athletics director at Springfield College, presented complimentary passes to senior citizens that enable them to attend all Springfield athletics events free of charge during [989-90. Also speaking at the ceremony were Ronald Holstead, direc-

coaches. **Opportunities for** personal growth

More than 275 student-athletes and extracurricular students made comments about opportunities for personal growth that resulted from participating in their activities. Most of the comments were positive and gave recognition to the value of the opportunities. There were a few laments, however, from studentathletes about being pampered or isolated to the point that their opportunities were limited. Other negative comments concerned limited opportunities to participate fully in college life or to have a social life because of the time demands of athletics.

The most frequent positive comment concerned the opportunity to

Some of the students who commented that the time they spent in intercollegiate athletics limited their ability to participate fully in college life suggested cutting back on the time required by sports. In particular, some football players suggested that spring practice should be curtailed or eliminated.

Interactions with other students and friends

Student-athletes and extracurric-

The majority of the more than 100 comments having to do with friends focused on teammates or other participants in extracurricular activities. Some student-athletes noted that the team was the principal source of their interactions with others. For some student-athletes, participating in a team sport seemed to ease the transition from high school to college. For others, teammates became their closest friends on campus.

Several student-athletes indicated that they felt somewhat isolated from the general student body. Many also acknowledged that their relationships with teammates were only one part of their social life on campus.

Huber placed sixth and finished as the top U.S. finisher at 3,000

Legislation and Interpretations Committee minutes

Acting for the NCAA Council, the Legislation and Interpretations Committee took the following actions

Amateurism

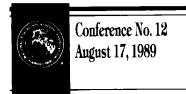

1. Student-athlete purchasing insurance against a disabling injury. Reviewed the provisions of NCAA Bylaw 12.1.2.1 and a proposal to develop through the national office a student-athlete disability insurance program that would be made available to all NCAA student-athletes, with the Association's role to include negotiating rates, identifying a commercial lending institution and guaranteeing the loans; agreed that since the NCAA represents all member institutions, the Association should not be considered a "third party" that would be prohibited from making these arrangements under the provisions of Bylaw 12.1.2.1: recommended that the NCAA Legislative Review Committee revise this legislation editorially to reflect this interpretation if an NCAA program is implemented, agreed that "illnesses" may be covered under the provisions of Bylaw 12.1.2.1; concluded that the determination of what constitutes a disabling injury or illness for purposes of this legislation should be left to the discretion of the insurance program underwriters

Recruiting

2. Activities constituting recruitment. Reviewed the provisions of Bylaws 13.02.8 and 13.02.9 and two previous staff interpretations, and confirmed that the following activities arranged by a member institution's department of athletics or representatives of

its athletics interests would constitute reruitment for purposes of determining whether a student-athlete's institutional financial aid would be countable a. The forwarding of correspondence to a

prospect, other than a generic letter providing or requesting general information, would constitute recruitment of the recipient per Bylaw 13.02.9; further, in order for such generic letters to be exempt from constituting recruitment, they must be forwarded generally to individuals considered by the institu-

tion to be prospects in that sport, and the letters may be personalized only in the address and salutation.

b. The arrangement (as permitted under applicable division legislation) of meals, housing, transportation and academic interviews during an unofficial visit would constitute recruitment per Bylaw 13.02.9.

Eligibility

3. Graduate student participating at second institution because of dropped sport. Reviewed the Council's reaction to a previous committee interpretation (reference: Item No. 10 of the minutes of the committee's June 29, 1989, conference) and received a report that the Council's approval of this

interpretation, which would permit a graduate student's participation at a member institution other than the one from which he graduated, was based on the following factors: (a) The original member institution (from which the student-athlete graduated) dropped his sport subsequent to his graduation and prior to the beginning of his final season of eligibility in the sport; (b) the student-athlete clearly would have been eligible immediately upon transfer if he were not a graduate; (c) the literal application of the graduate student eligibility rule and the transfer waiver provision were in conflict in this case; (d) resolving this issue in the student-athlete's favor was consistent with the intent of both rules and avoided a result that would be inconsistent with the Association's interest in encouraging progress toward a degree, and (e) the action in this case was not intended to create a precedent in situations involving different circumstances (e.g., a student-athlete whose institution never sponsored his sport would not benefit from this interpretation, since that circum stance was something he could have taken action to avoid).

Financial aid

4. Exception for multisport participant when sport is dropped (Divisions I and II). Reviewed the application of Bylaw 15.5.5.6 to a situation involving a student-athlete who participated at a member institution while receiving a track and field scholarship during his first year of attendance, but who was unable to continue his participation because the institution dropped the sport

prior to his second year of attendance; agreed that the student-athlete, now in his third year at the institution, may practice with the intercollegiate football team without being immediately countable, noting that the two-year exception provision would be applicable in his case since his second year of participation in the sport of track was made impossible by the institution's decision to drop the sport.

Printed recruiting aids

5. Sports periodical listing information regarding member institution's collegiate program (Divisions I and II). Confirmed

Southeast Missouri State to withdraw 1991, the conference said.

Southeast Missouri State University will drop out of the Missouri Intercollegiate Athletic Association and be replaced by Emporia State University, the conference announced September 15.

Southeast Missouri State asked to withdraw from the MIAA at the end of the 1990-91 school year to pursue affiliation with NCAA Division L

Emporia State is affiliated with the Central States Intercollegiate Athletic Conference, which is down to four members. Emporia State will join the MIAA effective July 1, that the provisions of Bylaw 13.3.3.1 permit a member institution to provide information to a sports periodical that includes recruiting information and also publishes general information concerning collegiate institutions and their athletics departments, if such a publication: (a) publishes the information at no cost to the institution; (b) includes no pictures in conjunction with the publication of the institutional information; (c) publishes only institutional information that is factual, rather than promotional; (d) is available to the general public, and (e) provides the same information for each school included in the guide.

The MIAA admitted Southwest Baptist University in 1986. Missouri Southern State College, Missouri Western State College, Pittsburg State University and Washburn University were added in 1987.

Other schools in the conference are Central Missouri State University; Lincoln University (Missouri); Northeast Missouri State University; Northwest Missouri State University; the University of Missouri, Rolla, and the University of Missouri, St. Louis.

The Market

Readers of The NCAA News are invited to use The Market to locate candidates for positions open at their institutions, to advertise open dates in their playing schedules or for other appropriate purposes.

Rates are 55 cents per word for general classified advertising (agate type) and \$27 per column inch for display classified advertising. Orders and copy are due by noon five days prior to the date of publication for general classified space and by noon seven days prior to the date of publication for display classified advertising. Orders and copy will be accepted by telephone.

For more information or to place an ad, call Susan Boyts at 913/384-3220 or write NCAA Publishing, P.O. Box 1906, Mission, Kansas 66201.

NCAA Special Committees

The Association currently has a number of special committees dealing with special topics. From time to time, The NCAA News will offer a summary of those committees and where they stand in their assignments

Special Committee to Review Amateurism Issues

Charge: To consider the broad range of issues related to amateurism, including circumstances under which student-athletes could receive expense payments related to training and competition, trust funds, etc

Current status: Committee has met five times, March 22, May 10, June 14, July 31 and September 12.

Report due: Committee provided interim report to NCAA Council in August. It will continue to report to the Council at future meetings

Committee chair: Joseph L. Kcarney, commissioner, Western Athletic Conference

NCAA staff liaisions: Stephen R. Mor gan, associate executive director, and David A. Knopp, legislative assistant.

Special Committee on Cost Reduction

Charge: To investigate means of reducing the costs of intercollegiate athletics without denying students access to higher education or significantly altering the competitive balance among member institutions; consider concept of restricting athletically related financial aid.

Current status: Committee met May 30-June 1 in Dallas and September 13-14 in Kansas City. It has a November 7-8 meeting scheduled for Kansas City.

Report due: Written and oral reports for 1990 Convention: legislative proposals for "future Conventions through 1991."

Committee chair: Eugene F. Corrigan commissioner, Atlantic Coast Conference. NCAA staff liaisons: Merrily Dean

Baker, assistant executive director for administration; John H. Leavens, assistant executive director for compliance services. and Stephen A. Mallonee, legislative assistant.

Special Planning Committee for Drug Testing

Charge: To formulate long-range plans for the development, certification, funding or sponsorship of drug-testing laboratories and for sharing drug-testing expertise between and among the NCAA and other organizations, member institutions and conferences; to develop and refine protocol and guidelines

Current status: Committee has conducted one meeting by telephone conference and has asked the NCAA executive director to confer with the U.S. Olympic Committee regarding appropriate directions in this matter. The committee will meet after that has been accomplished. Report due: No specific reporting date

to NCAA Executive Committee. Current laboratory contracts run through 1989-90 academic year.

Committee chair: Edward E. Bozik. director of athletics, University of Pittsburgh

NCAA staff liaison: Frank D. Uryasz, director of sports sciences

Presidents Commission Advisory Committee to Review the NCAA Governance Process

Charge: To review the Association's governance process, including the appropriate role of the CEO and ways of enhancing that role, the structure and nature of NCAA Conventions, and means of reducing legislative emphasis on minutiae and increasing attention to major policy issues

Current status: Committee met three times, February 1, March 15-16 and May 17-18. It has completed its report, which appeared in the August 2 issue of the

Report due: Committee has reported

its recommendations to the Commission for action in its October meeting

Committee chair: John W. Ryan, president emeritus, Indiana University

NCAA staff liaisons: Ted C. Tow, associate executive director, and Nancy L. Mitchell, director of legislative services

Special Committee to Review the NCAA Membership Structure

Charge: To study the various concerns regarding the Association's membership structure, including greater federation, steady growth of Division I, multidivision classification and the concept of a Division I-AAA football classification

Current status: Committee has met three times, November 20-December 1, 1988; February 8-9, 1989, and May 10-11, 1989. Its next meeting will be October 24-25 in Denver, when reports from other committees (including cost reduction) will be available.

Report due: Initially, Council specified a preliminary report in April 1989 and a final report by August. In April, Council approved an extension; committee will present its final report to Council in April 1990

Committee chair: Fred Jacoby, commissioner, Southwest Athletic Conference; chair pro tem: Judith M. Sweet, NCAA secretary-treasurer, athletics director, University of California, San Diego.

NCAA staff liaisons: Ted C. Tow, associate executive director, and Shirley Whitacre, membership coordinator.

Council Subcommittee to Review Minority Opportunities in Intercollegiate Athletics

Charge: To address the issue of opportunities for ethnic minorities, particularly Blacks, in intercollegiate athletics.

Current status: Committee has met nine times, November 20, 1987; December 13-14, 1987; February 7-8, 1988; April 3-4, 1988; June 21, 1988; July 17-18, 1988; September 11, 1988; January 5, 1989, and April 16, 1989. Its next meeting tentatively has been scheduled for October 14-15 in Indianapolis

Report due: Originally scheduled to complete its work by January 1989, the committee is now scheduled to submit its final report by January 1990.

THE UNIVERSITY OF COLORADO, BOULDER, has a strong institutional commitment to the principle of diversity. In that spirit, we are particularly interested in receiving applications from a broad spectrum of people, including women, ethnic minorities and disabled individuals.

Fitchburg State (0-32) gives it the old college try

By Trudy Tynan

The Fitchburg State College Falcons have lost everything except their love for football.

The Falcons have won only one game since beginning varsity play in 1984, and their 32-game losing streak is the worst in the nation. But their coach says "It's fun," and the student body, which raises the money to field the team, voted overwhelmingly to keep the Falcons playing.

"You have to love football to play at Fitchburg State," said starting center Dan Marrash, 24, a nursing student with a 3.200 grade-point

Five networks to share in Metro coverage

Television coverage of Metropolitan Collegiate Athletic Conference men's basketball will involve five networks in 1989-90, as the league moves into its 15th season.

Raycom again will serve as the league's syndicator, regionally televising 24 regular-season games and the two semifinal games from the Metro Conference tournament in Biloxi, Mississippi. ESPN will nationally broadcast five regular season games; CBS will televise the tournament championship game on a split-national basis, and ABC, CBS and NBC again will nationally televise eight of the University of Louisville's intersectional games.

"The Metro Conference will again receive outstanding exposure on television in 1989-90, and we are pleased to have such an extensive lineup of television games for our 15th season. Our relationships with all the networks have been positive, and this is reflected in the number of games and the quality of broadcasts we will enjoy this coming season," Metro Commissioner Ralph McFillen said.

Savannah State ruled ineligible for league title

Savannah State College, a preseason favorite for the Southern Intercollegiate Athletic Conference football championship, has been declared ineligible for the title. Morris Brown College also was declared ineligible by the conference office.

Savannah State, which has 21 returning starters from its 8-2 team last year, was notified that it is on probation for failing to meet NCAA Division 11 sports sponsorship requirements this year.

The school fielded enough sports teams to meet NCAA requirements but did not have the minimum five members on its women's tennis team or the minimum 14 on its men's track and field team. In addition, its average (4.000 scale). He concedes that it can get discouraging, even for a 6-foot-1, 260-pound ex-Marine, "but we keep after each other. And someday, somehow, we know we are going to win."

This is Division III football with no scholarships, part-time coaches, bouncing bus rides over New England hills and few rewards, except a chance to play the game.

"The only recruiting is, you go up to coach and say you want to play," sophomore quarterback Rich Le-Blanc said.

"Of course, everyone dreams of getting the game ball when we finally break the streak," LeBlanc said. "If I do, I'll give it to the coaches. They've worked so hard and tried so hard all these years without getting down that we can't.... And all

the guys who played for us and never got to win."

The only time the Falcons won in 44 games was September 21, 1985, when they defeated New York Maritime, 28-23. Although it since has resumed competition, New York Maritime did not field a team the following season.

But even after last year's 0-9 season, when the Falcons managed only 141 net yards rushing gaining 602 yards and losing 461 over the course of a season in which they scored 20 points and their opponents scored 239—the 3,200 students at the central Massachusetts school voted by an 88 percent margin to continue picking up the football budget of about \$30,000.

"They are young men of uncommon courage," school President Vincent J. Mara said. "The kids are determined to hang tough and grit it out. And if they are willing to make that kind of effort, we're not going to do anything to stop them."

"I don't know whether I'm a born optimist," said Dave Secino, the Falcons' only coach, who returned home to run the family tailor shops after playing offensive line for the University of Maine, Orono, and sometimes fixes rips in team uniforms. "But I don't get down on the kids. They are on a mission. They know that if they give up, football will disappear at Fitchburg State. And we all know it's not going to be this way forever."

"All I ask is that all 48 try their best, and I'm pleased if we can get them to play on a level above themselves, even if we lose," Secino said. Secino decided to try the wishbone offense this season, and in the season's opening game, fullback Gary Fountain, a 5-6, 170-pound senior, shattered Fitchburg State rushing records by scrambling for 129 yards, including a 60-yard touchdown.

For 10 glorious minutes, the Falcons held a 13-12 lead over the University of Lowell. Then Lowell scored 24 straight points and won, 36-13. Fountain broke a leg, and the Falcons moved closer to Columbia University's mark of 44 straight losses, which ended last year.

Division III Macalester still holds the all-time collegiate mark of 50 straight defeats.

Tynan writes for the Associated Press.

ONLY

\$549500

FOR THIS

SUPER-VHS

SYSTEM

Compare what this system comes with and you'll be amazed at what it goes for.

The MARK IV Action Monitor System includes rugged industrial/professional grade components that will give you studio quality Super-VHS tapes at a price far below any other recording system. Includes features not available anywhere else.

System Highlights

- Panasonic AG-450 Super-VHS Camera / Recorder with 10:0 zoom, pro quality S-VHS recording with 420+ lines resolution, auto focus.
- Quick Release so camera can quickly be removed for portable use.
- Five-Inch Color Monitor allows operator to follow the game better with less fatigue. Color makes it easier to tell teams apart — you can see exactly what's being recorded.
- Panasonic Stereo AM/FM Radio Cassette Player/Recorder for play by play recording of broadcast games directly to tape.
- Remote Pause Start/Stop Control, with LED indicator, on Tripod Arm keeps the action at your fingertips.
- Five-Hour Battery Pack This 12V 6.5 Amp/Hour unit will power you through two games. Rechargeable and conveniently hangs on custom tripod rack.
- Heavy Duty Fluidhead Bogen Professional Tripod strong and sturdy, this tripod helps keep the camera stable for smooth taping. The Bogen Dolly lets you coast through movements on smooth surfaces.
- This system is designed for high quality studio recording productions with maximum ease of set-up and take-down portability.
- Instant Replay play back your tapes right at the tripod on your color monitor, with audio-speaker or earphones. (Included)

Coach's Total Viewing System For Play by Play Analysis

Now, better than ever, you can edit tapes, make duplicates, create game highlights, dub in audio, and even create special effects. In addition to the MARK IV Action Monitor System above, the Coach's Total Viewing System includes:

baseball team did not play the minimum requirement of 24 games.

Morris Brown was put on probation for using senior quarterback Alij Tapp last season after the SIAC ruled him ineligible, the Associated Press reported.

Tapp transferred to the Wolverines from Southern University, Baton Rouge, but did not sit out a year as required by the NCAA. Because he played the entire season, the Wolverines forfeited five of their six victories.

News quiz answers: 1-False (both partial qualifiers and institutions are bound). 2-(b). 3-(c). 4-True. 5-(c). 6-(b). 7-(a). 8-(d). 9-False. 10-(a).
