## More revenue distribution recommendations made

Additional recommendations regarding the distribution of revenue from the NCAA's \$1 billion contract with CBS are being forwarded to the Association's Executive Committee for its December 3 meeting in Kansas City, Missouri.

More recommendations were developed by a special advisory committee during an October 17 meeting in Chicago.

A memorandum outlining the recommendations has been mailed to all NCAA Division I conferences and directors of athletics for their review and comment before the Executive Committee meeting.

The revised recommendations are

a result of nine months of study by the Special NCAA Advisory Committee Regarding Distribution of Revenues, which is chaired by Judith M. Sweet, director of athletics at the University of California, San Diego, and NCAA secretary-treasurer.

The special committee also incorporated numerous suggestions from the membership in its recommendations to arrive at a plan that includes distribution of funds from basketball and broad-based pools.

A series of regional hearings was conducted in June, and the distribution plan was explained at several meetings, including the National

Association of Collegiate Directors of Athletics convention last summer and a meeting of conference commissioners in October.

The Executive Committee approved a revenue-distribution plan at its August meeting, with the proviso that additional suggestions from the membership would be solicited.

Representatives of Divisions I-AA and I-AAA met in Chicago in September to discuss the revenue-distribution plan, and the special committee studied suggestions made at that meeting.

A formula for distribution of funds based on a school's performance in the Division I Men's Basket-

ball Championship over a rolling six-year period was announced in August. The special committee has made some adjustments in that plan and has announced a formula for the distribution of funds from the broad-based pool in its memorandum.

In the memorandum, Sweet says that the figures provided in the tables on page 6 of this issue of The NCAA News are tentative and that adjustments can be made as more information becomes available when institutions provide information necessary for certification and participation in the distribution plan.

Sweet said her committee is seek-

ing additional comments from the membership on the distribution plan before the Executive Committee meeting in December.

The memorandum to conferences and directors of athletics follows.

To commissioners of NCAA Division I conferences and directors of athletics at Division I member institutions:

The Special NCAA Advisory Committee to Review Recommendations Regarding Distribution of Revenues, meeting October 17 in Chicago, developed additional recommendations regarding the distribution of revenues to the

### Sports Buffs

**Members of the University of Colorado football team were given a preview of the NCAA Visitors Center October 19 during an overnight stay in Overland Park, Kansas, prior to their October 20 game at the University of Kansas. The Visitors Center will be open to the public October 27.**

## Convention proposals reach 183

The total number of proposals for action at the 1991 NCAA Convention climbed to 183 when 71 amendments-to-amendments and resolutions were received by the October 15 deadline.

And more than half of that total will be voted upon by roll call, based on decisions made by the officers of the NCAA Presidents Commission in an October 18 meeting in Chicago.

The Association is introducing a new, electronic voting system at the '91 Convention that should reduce markedly the time necessary to complete a roll-call vote. The Commission officers are counting on that system working.

In the special Presidents Commission Grouping - consisting of proposals identified by the Com-

mission officers as being of particular importance to chief executive officers - there will be 40 proposals, and 39 of those 40 were identified for roll-call votes. Most of the 40 are the "reform agenda" proposals recommended by the "Conference of Conferences," the Special Committee on Cost Reduction and the Special Committee to Review the NCAA Membership Structure.

Of the 71 amendments-to-amendments and resolutions submitted by the October 15 deadline, 56 deal with proposals in the "reform agenda." And because NCAA legislation requires that there be a roll-call vote on any amendment-to-amendment to a proposal already identified for roll call, that adds up to at least 95 roll calls. Any other motion to dispose of a roll-call

proposal, such as tabling or postponing, also must be by roll call, so that total could increase.

The 183 proposals represent an increase over the 168 handled at last year's Convention. There were 167 in 1989 and 200 in 1988. The all-time high was 257 at the 1976 annual Convention.

Unless the Council decides to sponsor one or more "emergency" amendments-to-amendments at the Convention itself, there can be no additions to the legislative agenda for the 1991 Convention.

All 183 proposals will be printed, in the groupings in which they will be considered, in the Official Notice of the Convention, which will be mailed from the national office November 15.

## Visitors Center to open October 27

The NCAA Visitors Center, a photographic and video salute to intercollegiate athletics, will open to the public October 27.

In the past few weeks, receptions have been held in the Visitors Center for a number of groups, including the NCAA Presidents Commission, the NCAA Council, the Collegiate Commissioners Association, the University Commissioners Association, members of the board of the NCAA Foundation, and various Kansas City-area civic and business groups.

The center will be open year-round, except on three holidays. Various displays depict the action of all 21 NCAA sports and 76 national championships.

Additional features offer tributes to student-athletes and past winners of the Association's Theodore Roosevelt Award, Silver Anniversary awards and Today's Top Six awards.

Many of the personalities in college athletics also are honored throughout the 12,000-square-foot center. Past and present champions are pictured in their respective sports

groupings.

A 96-foot mural painted by nationally known sports artist John Martin highlights the center's entry area. The mural depicts the history of the NCAA from its beginning in 1906.

The major portion of the center is taken up with photographs of NCAA championships. These areas include two 360-degree, backlit rooms in the football and basketball sections.

A multimedia room with a 26-foot screen will feature multiimage and video presentations. The theater can accommodate relatively large groups.

A multipurpose room is available for timely displays that will include traveling exhibits, exhibitions on loan, sports equipment and other special projects.

The Visitors Center also will include a public merchandise sales area featuring NCAA championships souvenirs. Also, videotapes, posters, books and championships

## Some athletes can get disability insurance

Student-athletes who are likely to be chosen in the first round of the National Basketball Association draft or the first two rounds of the National Football League draft may purchase disability coverage through an insurance program just announced by the NCAA.

The program, which was approved by the Executive Committee in December 1989, also makes low-interest loans available to all eligible student-athletes to finance the policy premium.

"I'm pleased that the Association has been able to move ahead with the disability-insurance program," said NCAA Executive Director Richard D. Schultz. "It fills a need for elite athletes in football and basketball. They

now can insure themselves against a disabling injury that would prevent future earnings."

Football players at NCAA member institutions can purchase up to \$1.8 million in coverage, and basketball players can insure themselves for up to \$2.7 million. They would receive benefits if an injury temporarily or permanently prevents them from participating in the normal activities of their sport.

Insured athletes would begin receiving benefits in monthly installments after the season that would have been their first as a professional. Payments would continue for up to 36 months as long as the athlete remained dis-

## Another title bid

**Tamie Batista, an all-tournament selection last year in the Division I Women's Soccer Championship, returns with her second-ranked Santa Clara teammates for another try at the title. Last year's bid ended in the semifinals. The Broncos are ranked No. 2 in the nation. Story on page 12.**

## More leagues offer multisport programs

The trend toward more conferences offering multisport programs for both men and women continued in 1989-90, according to data prepared for the Committee on Review and Planning.

Of the 108 conferences holding NCAA membership in 1989-90, a total of 67 offered multiple sports for both men and women. That 62 percent figure was slightly higher than the 60.6 percent in 1988-89.

In 1983-84, the first year that NCAA committees reviewed such data, only 44.4 percent of all NCAA conferences (44 of 99) were multisport groupings for both men's and women's programs. The former Long Range Planning Committee, forerunner of the Committee on Review and Planning, began the

annual study when it expressed the opinion that a common conference structure for both men's and women's athletics was preferable to separate structures, in most instances.

Of the 108 NCAA conferences in 1989-90, 84 offered competition in more than one sport. The other 24 conferences operate in only one sport each, 22 for men and two for women.

When only the multisport conferences are evaluated, 67 of the 84 were for both men and women, or 79.8 percent. That percentage was up from 78.6 percent a year earlier and 55.7 percent in 1983-84.

By division 30 of the 38 multisport conferences in Division I are for both men and women. In Division II, 16 of 17 are common for both, as are 21 of 29 in Division III.

## Legislative Assistance

1990 Column No. 37

### NCAA Bylaw 14.3.1.1.1—work-curriculum requirements/remedial courses

Divisions I and II member institutions should note that for purposes of meeting the core-curriculum requirements to establish eligibility, courses that are taught at a level below the high school's regular academic instructional level (e.g., remedial, special education or compensatory courses) may not be considered core courses regardless of course content. In this regard, during its April 1990 meeting, the NCAA Council considered the implementation of an interpretation recommended by the NCAA Academic Requirements Committee that courses labeled as remedial by a state agency may not be considered core courses for purposes of satisfying the core-curriculum requirements set forth in Bylaw 14.3, regardless of documentation received from the high school principal indicating that the course is not remedial as taught at that high school. The Council confirmed the interpretation but determined that only courses taken during the 1990-91 academic year and thereafter will be subject to this interpretation.

### Continuation of modeling and other nonathletically related promotional activities after enrollment

In accordance with Bylaw 12.5.2.1, subsequent to becoming a student-athlete, an individual is not eligible for participation in intercollegiate athletics if the individual: (1) accepts any remuneration for or permits the use of his or her name or picture to advertise, recommend or promote directly the sale or use of a commercial product or service of any kind, or (2) receives remuneration for endorsing a commercial product or service through the individual's use of such product or service. The individual's eligibility will not be affected if the individual participated in such activities prior to enrollment and the individual: (1) takes appropriate steps upon becoming a student-athlete to retract permission for the use of his or her name or picture and ceases receipt of any remuneration for such an arrangement, or (2) meets the conditions set forth in Bylaw 12.5.1.2 that would permit the continuation of such activities.

Bylaw 12.5.1.2 permits a student-athlete who has accepted remuneration for or permitted the use of his or her name or picture to advertise or promote the sale or use of a commercial product or service prior to enrollment in a collegiate institution to continue to receive remuneration for the use of the individual's name or picture after enrollment without jeopardizing his or her eligibility to participate in intercollegiate athletics only if all of the following conditions apply: (1) The individual's involvement in this type of activity was initiated prior to his or her enrollment in a member institution; (2) the individual became involved in such activities for reasons independent of athletics ability; (3) no reference is made in these activities to the individual's name or involvement in intercollegiate athletics; (4) the individual does not endorse the commercial product; (5) any compensation received by the individual is consistent with applicable

## Some athletes

*Continued from page 1*  
abled.

Many collegiate athletes attempt to purchase similar coverage on their own but find it difficult to afford because local banks are reluctant to loan them money to pay the expensive premiums. This opens the door for agents to lure potential top draft choices by promising to pay for disability coverage.

"Agents have been using disability and catastrophic medical insurance to get a handle on top athletes," Schultz said. "This program guarantees that all those who qualify for coverage can get a loan for the full premium with just their signature. We believe this will help athletes and coaches deal with unscrupulous agents."

Through an agreement between the NCAA and United Missouri Bank of Kansas City, student-athletes approved for coverage automatically will qualify for a loan to pay the premium. The loan, which will be issued at below-market rates, must be repaid when the athlete signs a professional contract.

The NCAA Exceptional Athlete Disability Insurance Program also includes a \$10,000 accidental-death benefit for both football and basketball players. Additional amounts of this coverage are available at an additional cost.

The program is administered by National Sports Underwriters of Overland Park, Kansas, which also administers the NCAA's membership insurance programs. The Federal Insurance Company, a member of the Chubb Insurance Group, is the insurer of the program.

According to NCAA Director of Operations Michael S. McNeely, National Sports Underwriters will

be responsible for determining which athletes qualify for the insurance.

"The NCAA endorses the disability-insurance program, but the national office does not play any role in determining which athletes have the potential to be first-round or, in the case of football players, second-round draft picks," McNeely said. "As the underwriter of the program, NSU has the full responsibility for determining who will qualify for coverage."

National Sports Underwriters will accept inquiries about coverage for specific student-athletes only from a parent or legal guardian, a representative of the school the athlete attends, or the student-athlete himself. Information about the entire program or specific coverage proposals is available from Richard D. Hunter, executive vice-president, National Sports Underwriters, 9300 Metcalf Avenue, Suite 350, Overland Park, Kansas 66212; the toll-free telephone number is 800/621-2116.

## Game canceled

The "British Bowl" between Miami (Florida) and Arkansas has been scrapped.

Their 1991 opener won't be played as scheduled in Manchester, England, because the promoter couldn't come up with a \$1 million guarantee for each school, the Associated Press reported.

"We feel betrayed by the people who put together this game," said Sam Jankovich, Miami's athletics director.

The schools now hope to play the August 31 game at a neutral site in the United States.

## Visitors

*Continued from page 1*

game products will be available, along with NCAA-licensed products and official guides and records books.

In the photographic display, past champions Buster Crabbe and Jesse Owens are featured, along with modern-day athletes Cheryl Miller, Matt Biondi and many others.

The student-athlete displays also include such notable performers as U.S. Sen. Bill Bradley (Princeton University), Olympic gold-medalist Jackie Joyner-Kersey (University of California, Los Angeles), and former President Gerald Ford (University of Michigan).

Other former student-athletes include U.S. Supreme Court Justice Byron "Whizzer" White, O. J. Simpson, Jack Nicklaus, Jimmy Connors and Tracy Caulkins.

The center will be open from 10 a.m. to 7 p.m. weekdays, from 10 a.m. to 6 p.m. Saturdays and from noon to 5 p.m. Sundays. The center will be closed New Year's Day, Thanksgiving and Christmas.

"We are excited about opening the Visitors Center and hope the membership will take advantage of this new facility as we salute intercollegiate athletics," said Will J. Rudd, director of the Visitors Center.

limitations on a student-athlete's maximum amount of financial aid, and (6) the individual's remuneration under such circumstances is at a rate commensurate with the individual's skills and experience as a model or performer and is not based in way upon the individual's athletics ability or reputation.

During its September 13, 1990, conference, the NCAA Interpretations Committee reviewed the provisions of Bylaws 12.5.1.2 and 12.5.2.1 and determined that a student-athlete pursuing a career in singing could be involved in making a record album, provided such activity meets the above-mentioned requirements of Bylaw 12.5.1.2. The committee noted that it would not be permissible for the student-athlete's name or picture to appear on the album cover, inasmuch as such an appearance would constitute an endorsement or promotion of a commercial product (i.e., the album).

Finally, per Bylaw 12.5.2.2, if the student-athlete's name or picture appears on a commercial item (e.g., T-shirts, sweat shirts, playing cards, posters, photographs) sold by an individual or agency without the student-athlete's knowledge or permission, the student-athlete (or the institution acting on the student-athlete's behalf) is required to take steps to stop such an activity in order to retain his or her eligibility for intercollegiate athletics.

During its October 26, 1989, conference, the Interpretations Committee reviewed the provisions of Bylaw 12.5.2.2 and agreed that if an outside agency uses a student-athlete's name or picture to promote its product or service, the student-athlete (or the institution acting on the student-athlete's behalf) would satisfy the provisions of Bylaw 12.5.2.2 by initiating a letter to the outside agency requesting that it cease utilizing the name or picture of the student-athlete contrary to the provisions of Bylaw 12.5.2.1.

### Athletics events outside of the contact or evaluation period, held on a member institution's campus

Division I member institutions should note that in accordance with the provisions of Bylaw 13.1.5.2.2, in the sports of football and basketball, it is not permissible to make in-person contact with the prospect at the site of practice or competition for any athletics event in which the prospect participates outside of the permissible contact period (even if the event is conducted on the member institution's campus). Also, per Bylaw 13.1.6, in Division I football and basketball, evaluation activities are not permissible at the site of an athletics event conducted on a member institution's campus outside of the evaluation period unless the prospect is participating in a sport other than football or basketball.

*This material was provided by the NCAA legislative services department as an aid to member institutions. If an institution has a question it would like to have answered in this column, the question should be directed to William B. Hunt, assistant executive director for legislative services, at the NCAA national office.*

# Steady growth expected for women's sports in '90s

By David D. Smale  
The NCAA News staff

What does the next decade hold for women's athletics? Will a Women's Final Four ticket be as hard to get as the men's championship ticket is now?

Will schools be turning away spectators because their facilities will not hold any more, as happened at a recent Nebraska volleyball game? Just what will be the status of women's athletics as we enter the new millennium?

Ask a dozen people involved in women's athletics, and you likely will get different responses, but all will probably agree that women's athletics will continue to gain national attention.

"In 1970, Walter Byers went to CBS and told them that if they would televise five other NCAA championships, he would give them the rights to the Final Four at no cost," NCAA Executive Director Richard D. Schultz said. "They turned him down. That just shows the growth that has taken place in the men's championship that is possible in women's athletics."

"No one really knows whether women's basketball will grow to the level of men's college basketball, but it will grow. It will grow through exposure. If the product continues to improve as it has, I think it will continue to grow."

There are a number of reasons for the projected growth of women's athletics. The "bandwagon" phenomenon is a big one. "People want to be where everybody else is," Schultz said. "It's amazing how that impacts interest."

Not just interest among the fans, but interest among new participants. "I see sports, especially basketball, softball and volleyball, with participants starting out a lot younger," said Tracy Ellis, a two-time all-Big Eight Conference center in basketball at the University of Missouri, Columbia. "I started playing basketball in the seventh grade. Now, there are teams for second- and third-graders."

"That will improve the level of play. You won't see as many superstars—not because they won't be there, but because they will be harder to pick out."

The kids will start sooner and will be better coached at an earlier age.

Virginia Stahr, a former all-America volleyball player at the University of Nebraska, Lincoln, says the game is definitely getting more advanced. "Even in high school, the coaches are former players who understand the techniques much better. No matter what sport you're talking about, the game is going to get better."

As the level of competition gets better, more female athletes will appear because "society has endorsed this kind of behavior," according to Phyllis L. Howlett, coordinator of women's sports for the Big Ten Conference and chair of the NCAA Committee on Women's Athletics.

"The visibility that the NCAA has provided has helped young women become more aware that it is OK to be competitive." It's a positive cycle. As women become more competitive, the game gets better. As the game gets better, it will attract more competitive female athletes.

But when does the mantle switch from the athletes themselves to administrators? Stahr thinks the game will promote itself; but for it to thrive, the administration has to get behind it. "Administration has to push for acceptance," she said. "Our

Phyllis L.  
Howlett

Donna  
A.  
Lopiano

Judith  
R.  
Holland

administrators got us into the public eye. They got us on television. They gave us a pep band and cheerleaders.

"As a player, you don't care about those things. But they are there for the fans. It is the coaches' job to coach. It is the job of the administration to protect."

Ellis agrees. "It all depends on how it is marketed. At Missouri, women's basketball will never reach the level of men's basketball because of the support base behind the men's team. At Texas, they'll always have support."

But Donna Lopiano, director of women's athletics at the University of Texas, Austin, doesn't buy the idea that women's athletics can't receive the same public support that men's athletics does.

"Nobody is saying that you can do it all at once," she said. "You have to do it one sport at a time. But you must put the same energies and talents toward making women's programs successful as you do with the men's. When you finish one, move on to the next one. Give it six or seven years, and it can be done."

The key is patience, says Schultz. "I think it will grow," he said. "People who think it will be a rapid growth will be frustrated. It will be a steady, year-by-year growth. At the end of the 10-year cycle, we will have a lot of former participants who will be fans. Some will have children competing. It's a kind of grass-roots thing. That is why it takes time."

"There are so many more former male athletes because they have been there so long. A lot of women's

*But do women want to grow to become like the men (in the status of their athletics programs)? Growth is OK, but not at the expense of ethics.*

advocates feel that women should be there right now. It just doesn't work that way. We need to make the commitment to improve programs, publicize them, upgrade them; then, we will see that growth. You can grab them (fans) with a one-time gimmick; but when you grab them, you have to be able to turn them on. Promotion gives you exposure, but people have to like it for the promotion to work."

But do the women want to grow to become like the men? Growth is

OK, but not at the expense of ethics. Whatever growth does occur will be monitored to make sure it is growth in the right direction. And the women have the advantage of seeing the areas in which the men's programs have gone awry.

"I think there will be a lot of changes in men's programs," Stahr said. "And women's programs won't take the same direction as the men. They will learn from the men's missteps."

Those misapprehensions have given rise to some reform movements in the NCAA. The Executive Committee passed a new format for distribution of revenue of the television contract from the Men's Division I Basketball Championship—a seven-year deal worth \$1 billion. No longer will there be a "\$300,000 free throw." Schools will be rewarded on the basis of various criteria related to broad-based programs. Conferences will be rewarded on the basis of how their schools have fared in the championships over a rolling six-year period, rather than one year.

"Women's programs and other nonrevenue sports should be great beneficiaries of this, because some of the programs that have been cut back should have more funding," Schultz said. "There is an incentive to fund better."

And the result of that funding is that more athletes get to experience the thrill of playing for a championship. "In the last three years, we've been seeing that pay dividends," Schultz continued. "With more exposure to championships, there has been a growth in public interest and in television viewership for women's basketball. There is tremendous interest in women's volleyball, track and field, and other sports. We have been able to expose the best athletes by making sure they get to the championships, and that has helped generate interest by the general public."

It's back to that positive cycle.

Beyond the advantages on the playing field, there is hope that these efforts will advance the cause of women in athletics to the administrative level.

"I am hopeful that the 1990s will provide for a strong and sincere effort by university presidents to provide meaningful leadership opportunities for both women and minorities," said Judith M. Sweet, athletics director at the University of California, San Diego, and secretary-treasurer of the NCAA. "I think it will take the collective effort of everyone to meet the challenges of the '90s."

That effort no doubt will be helped by the corporate partnership program.

In September, the NCAA entered into a new agreement with Sara Lee to commit \$4 to \$6 million a year for promotion of women's athletics. The program will institute a "Woman of the Year" award, along the lines of the Heisman Trophy in college football. "It will be a tremendous shot in the arm for wom-

en's athletics," Schultz said.

So has the question been answered? Where will women's intercollegiate athletics be in 1999? Judith R. Holland, chair of the NCAA Division I Women's Basketball Committee, is already looking hard at 1997, when the newest basketball television contract expires.

"I said to the committee that we needed to develop for ourselves a mission for the '90s," she said. "Not a purpose; we already know what our purpose is. But we needed to develop a mission that says, 'This is what we want to accomplish in the 1990s.'"

"During the '90s, we would like to see us progress so that when the current TV contracts expire, we would be able to have a contract solely for the women's basketball tournament."

"Now there is something you can measure. There is something that tells you that you have gone to the next level. It is real and it is measurable. And there are intermediate steps so you can find out where you are with it."

Schultz thinks it is a realistic goal. "I've long been an advocate of women's basketball developing on

its own merits," he said. "Don't piggy-back on the men's program. Do what's right for women's basketball and focus on what will cause women's basketball to grow on its own. It's an achievable goal."

"The ratings have improved. If they don't strive for that, it will never happen. I think it is the responsibility of that committee to pick places like Knoxville where they know that there is that built-in interest and they can show that sellout crowd."

If women's athletics is successful in generating that growth, fun times are ahead, according to Howlett.

"There is no question about it," she said. "I am now on the 'back-nine' of my career. To be a part of this evolution/revolution is about the most satisfying thing in my career. I have had an opportunity to do things that could affect young people's lives in a very profound way."

Sweet thinks the competition will help women as they progress through life. "I believe that female athletes in the next decade will be more successful in the workplace as a result of their collegiate experiences and the interaction that they have had with other athletes, both male and female," she said.

Where will women's athletics be in 1999? Just ask someone who was there in the 1980s and expects to be there in the '90s.

"I think it will be great," Stahr said. "The (men's and women's) games will be entirely different. As long as you know the games, you can enjoy both."

"It is impossible to predict what they will be like. Just observe them and enjoy the results."

## Young admirers

Two young sports fans and perhaps future athletes, the daughters of NCAA Director of Operations Michael McNeely, admire the Women's Final Four display in the NCAA Visitors Center, which will be open to the public October 27.

# Comment

## Instant replay doesn't deserve a second glance

By Hal Bock

Can we have another look at that?

Not in college football.

The NFL has a replay rule, allowing close calls to be reviewed. There were 31 NFL replays on one recent Sunday, with four calls reversed.

In college, the call is the call. No review. No appeal.

And that's fine with Dave Nelson, commissioner of the Yankee Conference and secretary-editor of the NCAA Football Rules Committee.

"I speak of instant replay from the experience of being an aerial photo interpreter in World War II," he said. "The camera is 75 to 80 yards away, with immense distortion. The official is five yards (away) or closer. With a camera, it's not an absolute. People believe it's the final answer. It's not."

There are fewer cameras for routine college football games, making definitive replays more difficult to achieve.

Frank Broyles, director of athletics at the University of Arkansas, Fayetteville, wants no part of replays. "The human element is still vital to college athletics," he said. "The pros are best served by replays, but I don't think, with the delays

Frank Broyles

and all, the colleges would be."

How about appeals for reversing wrongs like Colorado's fifth down against Missouri? "It would be cumbersome," Broyles said. "To have a game reversed weeks later, I don't think that would be good. In that game, the Colorado quarterback looked at the down marker, saw what he saw and reacted. You can't blame him."

Homer Rice, director of athletics at Georgia Institute of Technology, said "I'm for progress, but I'm not in favor of instant replay. The longer I think about it, I think it would be a mistake to bring it in. The officials are right most of the time."

"You always make every attempt to improve officiating. It will never

Homer Rice

be perfect. Mistakes shouldn't happen, but they will. When they happen to me, I'm for changing everything."

Football did not always operate with hard and fast, no-appeal rules. In the game's formative years, calls routinely were appealed, and the result was near chaos. "It was a debating society, and the game was

Dave Nelson

nearly banned because of it," Nelson said.

Len Czarnecki, executive director of the Collegiate Athletic Officials Association, considered the instant-replay suggestion. "That might not be a bad idea," he said. "It would convince people that 95 to 98 percent of the calls are correct."

Czarnecki officiated for 39 years.

Charles McClen-don

He knows the emotions involved. "Nobody feels worse about a bad call than the official," he said. "Every official goes out there intending to give 110 percent. It's pride. Everyone wants a perfect grade."

Czarnecki was less than sympathetic over the plight of Michigan, beaten in the final seconds by Mich-

## College football games are lasting too long, whether on television or not

**George Welsh, head football coach**  
**University of Virginia**

*Richmond Times-Dispatch*

"They've gotten too long (college football games), and we're going to have to address that."

"We're playing three-hour, 10-minute games, and they're not even on television."

"As far as the number of plays (are concerned), the NFL is averaging in the 50s (per team). That's what I read, anyway. I'll bet we're averaging in the 80s. You don't need 160 plays to entertain people."

"We've got to look into saving 10 to 15 minutes in a game. Maybe we could cut half time to 15 minutes, (and) we should start the clock sooner. Don't stop it on first downs. If (the ball carrier) goes out of bounds, start the clock again when the referee signals ready. The NFL is doing that now."

**Richard D. Schultz, executive director**  
**NCAA**

*The Associated Press*

"Sometimes, you have a conference that has a great rivalry because of a geographical arrangement. If you break that up and add some type of new ingredient to it, you may be destroying the one thing that has made that conference good in the first place."

"Whatever you (conference commissioners and school presidents) do, do it ethically. Let's not turn this into a back-alley fight."

**Bill Bradshaw, director of athletics**  
**DePaul University**

*Chicago Tribune*

"Institutional control has become the foremost issue in terms of compliance. It permeates the tone and attitude of what an institution is doing.... College presidents are getting involved for that reason. It used to be that they would say, 'That was the athletics department. I had no idea that was going on.' That attitude indicates a lack of institutional control."

"Presidents have more meetings now with their ADs. They no longer meet only at cocktail parties where the president says, 'Hi, how's it going?'"

"Those days are gone. It's not what presidents say anymore but what they do."

**Bernadette Locke, assistant men's basketball coach**  
**University of Kentucky**

*The Dallas Morning News*

"Any new coach coming into a program, it's going to take time. Once players understand that I care about them and I know the game, it will be fine."

"This is 1990. For so long, men have been involved in women's basketball, so it's only fitting that women are involved in men's basketball."

**Ed Fowler, columnist**  
*Houston Chronicle*

"Universities must have standards, however imperfect. They never were intended to be centers for remedial education."

"Perhaps we will hear again from civil rights advocates who will claim that the weight of the new

(Southwest Athletic Conference) policy, which permanently bans freshmen (from athletics participation) who don't qualify under Prop 48 (Bylaw 14.3) standards, falls disproportionately on minorities. Maybe it will, but the intent is to discriminate only against ignorance, no matter the color of the package in which it comes."

"Certainly, the SWC will put itself at a competitive disadvantage vis-a-vis the rest of college jockdom—at least until the other conferences, which should be red-

## Letters to the Editor

### CEO says he was misrepresented

To the Editor:

Having just read the extensive report by The NCAA News on the meeting in Chicago of Divisions I-AA and I-AAA institutions, I want to correct an erroneous position attributed to me.

I did not and do not advocate absolute equality in revenue sharing among all Division I schools. However, I do believe that the formula adopted by the Executive Committee is so inequitable that it ought to be rejected. What a more equitable distribution might be is certainly debatable, but surely worth the time to explore alternatives.

Whatever the distribution, it ought not to end up with the same proportional distribution as in previous years.

Samuel Magill  
President  
Monmouth College (New Jersey)

### NCAA souvenirs are priced fairly

To the Editor:

I read with much interest the letter of David Noble, men's track coach at Angelo State University, in the October 8 issue of The NCAA News.

Please allow me to share some thoughts regarding souvenir merchandising at the 1990 NCAA Division II Outdoor Track and Field Championships at Hampton University.

The NCAA and its official concessionaire for championships, Collegiate Sports Design (CSD), are very sensitive about the prices consumers and student-athletes are charged for souvenir products at NCAA championships. High-quality products at reasonable prices is the goal of the Association and CSD.

Our records indicate that a \$12 basic T-shirt (made of 100-percent cotton) and a \$12 cap (made of cotton twill) were the least expensive items available for sale at the Division II track championships.

Mr. Noble's concerns (\$18 T-shirt and \$15 baseball-style cap) also are concerns of the NCAA because, to the best of our knowledge, a basic T-shirt and cap were available for \$12 each. We would be interested in knowing from whom Mr. Noble purchased an \$18 T-shirt and a \$15 cap. CSD offered officially licensed products for the aforementioned prices.

He may have paid \$18 and \$15, respectively, for a T-shirt and cap to an unauthorized vendor of NCAA championships souvenir products. The NCAA, traditionally, tries to police the sale of unlicensed products at championships. This may be an instance in which the circumstance was not reported in time for appropriate action to be taken.

In our opinion, the prices charged for souvenir products at NCAA championships are very competitive with, and often better than, the prices charged at other major sporting events.

We thank Mr. Noble for taking the time to share his thoughts about this activity at NCAA championships.

# Some people reluctant to let athletes be students

A five-year study of a nationally ranked basketball team by two Colorado sociologists has found that lives of athletes at big-time college programs often are different from the illusion that many people hold.

Sociologists Patricia and Peter Adler found that athletes experienced isolation, frustration, exhaustion and overwhelming pressure from professors, coaches, boosters and the media. The athletes entered the university with idealistic expectations about achieving academic and social goals, in addition to playing their sport, but the demands of athletics usually overwhelmed all other pursuits.

The findings are part of "Backboards and Blackboards: College Athletes and Role Engulfment," to be published November 20 by Columbia University Press. Patricia Adler is an assistant professor of sociology at the University of Colorado, and Peter Adler, her husband,

is an associate professor and chair of the University of Denver sociology department.

"Most of the people we studied came to college interested in more than just athletics," Peter Adler said. "But the structure of college athletics changed their expectations and hopes."

The professors recommend a number of changes, including the elimination of separate dormitories, compensation for athletes in exchange for their work, coverage for injuries under worker's compensation, and the establishment of official minor leagues for football and basketball. They also urge that institutions pay for a fifth year of study for all athletes who wish to stay in school and finish their degrees.

The Adlers studied a Division I NCAA men's basketball team at a private, 6,000-student university in the southwestern United States in the early 1980s. The names of the

university, the 39 players and seven coaches are not revealed in the book but are referred to by generic terms and pseudonyms.

The Adlers said the sociological patterns they found are "remarkably similar" to the experiences of other athletes at schools of similar or larger size. The team reached the nation's top 20 during their study.

Peter Adler shared in the most confidential information about the team, sat on the team bench, traveled to road games and recruiting visits, and eventually became an assistant coach for academics. Patricia, meanwhile, sat directly behind the team bench and talked to players' girlfriends, coaches' wives and boosters.

The Adlers became close friends with the players, and the book contains dozens of direct quotes from the athletes about their college experiences. The players were of mixed economic background. Two-thirds of the players were black, many of them from the inner city.

The Adlers found that athletes were treated differently and isolated from the general student population. They were housed in an athletics dorm, ate at a training table and maintained a rigorous practice schedule that was a barrier to social interactions with other students. Even their class enrollment was handled by somebody else.

They entered the university with the intent of earning a degree, playing their sport and having a great

social life—but few of them did, the Adlers say. The demands of athletics—in a pattern that repeats itself at big-time programs across the nation—were just too great.

The head coach, a Black, had the best intentions for his players and urged them to study, go to class and get tutoring if they needed help. But "in the heat of the season," something

**"... the players' self-identity as athletes was thrust on them from all sides by students, professors, coaches, the media and boosters."**

had to give and that something often was academics, said Patricia Adler.

"The bottom line is, if the coach doesn't win, he loses his job," she said. "For all that he cares about these athletes as people, if the team isn't winning, it all starts to go."

Off the court, the players expected to hold the same high social position among other students as they did in their high schools. In college, they felt more like outcasts, the professors report.

Many students resented what they perceived as special treatment for the athletes, the Adlers said, and

rarely approached them to talk. Many professors shared an antiathletics bias, believing that athletes didn't belong on campus, and they took pride in making sure the players didn't get any special breaks in their classes.

Each of the players, even the lowliest benchwarmer, all shared "The Dream," as the Adlers call it, which was to play professional sports after college. Sports usually dominated discussions among athletes in the dormitories, and coaches and boosters contributed to "The Dream" by using it as a carrot to keep the team at an emotional peak, they said.

Thus, the players' self-identity as athletes was thrust on them from all sides by students, professors, coaches, the media and boosters, the Adlers said. Despite their initial desire to be more than just athletes, other parts of their lives began to shrink in importance.

The study illustrates a larger pattern of society that expects people to specialize and identify with one particular social role to the exclusion of all others, they said.

"College athletes are just a more vivid, extreme example of a pattern that has become pervasive in American society," Peter Adler said.

A recent study conducted by the American Institutes for Research for the NCAA Presidents Commission reported findings similar to those in the Adler study of student-athlete life.

## Miami (Fla.) will close its dorms for athletes

The University of Miami (Florida) has announced it will abolish athletics dormitories in an effort to integrate athletes more fully into campus life.

Most athletes said they opposed mandatory "mainstreaming," and most coaches said they preferred the athletics dorm system because it makes it easier to monitor their teams and players' study habits.

However, school president Edward T. Foote II reversed an earlier decision to stay with the status quo, saying the athletes would benefit from interaction with their classmates.

"Although it is true that student-athletes shoulder the burden of special demands on their time and energies, it is also true that all students, whatever their extracurricular activities, benefit enormously from interaction with each other," Foote said October 16.

Current athletes have the option of remaining in athletics dorms or moving into residential colleges or campus apartments, the Associated Press reported.

But next fall, the university plans to house all freshman athletes in the five residential colleges—dorms supervised by masters, usually professors, who live in the building with their families.

The decision came after a petition last year from faculty members on the Student Integration Project urging Foote to eliminate athletics dorms.

With the move, Miami (Florida) joins a nationwide trend and schools such as the University of Notre Dame, Pennsylvania State University, the University of Michigan and Ivy League members, which do not have separate housing for athletes.

"It's beneficial for everybody to get to know their peers," said Jane Connolly, an assistant professor of Spanish who was part of the integration project. "The perceptions of nonathletes are way off-base—that athletes are all rowdy and stupid. We also want to prepare students for the postcollege environment, and not all athletes are going to join the pros."

But some athletes have reservations.

"I don't think it's realistic, and they should have first done a trial semester with one team," basketball player Sherry Eyer said. "As far as integration is concerned, athletes are more involved with campus activities than nonathletes."

Said football player Charles Pharms: "We get home after a big win, and sometimes it's late. We could be laughing, whooping and hollering and disturb the students who have midterms or something like that."

Basketball player Brandon Adams said it would reduce "bonding" among athletes.

"I like it the way it was before, but we'll do whatever they want us to do," football coach Dennis Erickson said.

## Robinson wants bowl for black teams

College football's winningest coach says it's time for someone to put together a bowl game for historically black colleges.

Edward G. Robinson, head football coach and director of athletics at Grambling State University, made that comment during the Circle City Classic Coaches Luncheon earlier this month in Indianapolis. The Circle City Classic drew a Hoosier Dome record crowd of 61,929 to see Grambling State play Alabama State.

"Our schools need a bowl game," Robinson stated. "This game would put the two top teams among our schools in the game, and if we promote it right, it could be a real draw. I really want this to happen before I get out of coaching."

Robinson feels the play-off system is not serving the black conferences well, especially financially. He feels with the kind of crowds these schools are drawing, it would be a feasible venue.

This year, Grambling has put 54,986 in the Cotton Bowl, 36,759

Edward G. Robinson

in Independence Stadium in Shreveport and 28,954 in Giants Stadium. Grambling's game with Southern-Baton Rouge in the Bayou Classic is expected to draw a sellout crowd of more than 75,000 to the Superdome.

"We have been in the play-off, but we need a bowl," Robinson said. "This is something I've wanted all along."

Robinson also suggested Indianapolis as a possible site.

"If there's one place that can make it work, it's Indianapolis," Robinson said. "This city has done a lot for youths, and this could be the sports capital of the world."

According to Robinson's plan, the game would be played the weekend in December at a major city. The top two major black colleges would play.

He wants the game early so that it would not take away Christmas or New Year's vacation from the athletes and would not take them away from final exams.

## Instant replay

*Continued from page 4*

igan State by a controversial non-call. "Everybody thinks Michigan is out of No. 1 because of one call," he said. "They (the Wolverines) had 60 minutes before that."

"Everybody makes mistakes. We don't have perfect games. If anybody wants that, we may as well quit, because we can't promise that. All we can promise is to do the best we can do."

Not all the promises are always kept.

When Charlie McClendon, executive director of the American Football Coaches Association, was coaching at Louisiana State, his team met Nebraska in the 1970 Orange Bowl.

"Before the game, the referee said, 'If there are any problems, take a timeout, and I'll come over,'" McClendon said.

Sure enough, a problem came up. McClendon signaled for timeout and sent the side judge after the referee. "He said, 'I delivered your message,' but the referee never came over. Instead of my ball, it was

Nebraska's. They scored, and it turned out to be the difference in the game."

McClendon can chuckle over it now. He wasn't laughing then, though. "Any game you lose because of an official stays with you longer," he said.

Still, he does not lobby for instant replay.

"You like to believe and hope they're doing their very best," he said. "The feeling of the coaches is let's just go ahead and play the games."

Nelson thinks that's a good idea. "The game has changed drastically with the advent of game films and TV," he said. "I was at a meeting of officials when somebody said it must have been great to referee when they kept the game time on the field and there was no TV and no film."

"Somebody else said, 'Yeah, that's why a lot of those guys are in the Hall of Fame.'"

*Bock writes for the Associated Press.*

## Opinions

*Continued from page 4*

that. It's frightening to think we can make a total of six visits—three to a kid's home and three to his school—and signing day counts as one; so you really have only five visits.

"That means there's not much time for chit-chat with the kid, and you used to learn a lot about a kid through chit-chat. Look, NFL teams miss on college players whom they've seen at a more mature age, 18 to 22. So you know you're going to miss on a few at this level, with those restrictions. Put it all together, and you're going to have more upsets."

**John Shumate, head men's basketball coach  
Southern Methodist University**

*The Dallas Times Herald*

"We are wrong in accepting kids into our universities who are not being prepared to do the work. They come and they're kind of hidden from the regular students; they're put in classes just to be eligible, and then, when their eligibility is up, they're sent back to the streets, back to the ghettos.... When the kid is used up, he's

the loser.

"I look at college football players, for example, and I see these guys with notebooks going to skull sessions, going to film review, having meetings. And these kids—it's obvious on the football field that they are prepared. They can read offensive routes, defensive routes, when to play a zone defense, and they know when to release the guy. And that's because the parents, the society, community, everybody is giving the support and giving the emphasis to this kid's succeeding and excelling as an athlete."

"I'm tired of accepting mediocrity and saying, 'Well, I don't test well.' Or, 'It's a biased test.'"

**Linn Dunn, head women's basketball coach  
Purdue University**

*Gold & Black Illustrated*

"I don't think you can arbitrarily tell kids they can play or not. Some freshmen are more mature than some seniors. I think it's more of a person-by-person thing. I think it (freshman eligibility) should be an individual judgment."

### An explanation of the basketball, broad-based and academic enhancement pools

The three payment pools are basketball, academic enhancement and broad-based, and the total amount to be distributed is \$69.9 million. Table No. 1 shows the projected aggregate amount to be sent to the members of the various conferences from all the pools.

The basketball distribution checks will be mailed to conference offices in April 1991, the academic-enhancement moneys will be mailed to member institutions in June 1991 and the broad-based pool will be distributed to member institutions in August 1991.

Table Nos. 2 and 3 are attached to assist member institutions in estimating the amount they might receive from the broad-based pool, which is made up of two components: sports sponsorship and grants-in-aid.

Sports sponsorship composes one-third of the pool, or \$10,416,667. Inasmuch as Division I members are required to sponsor a minimum of 12 sports, the pool is designed to reward institutions that exceed that number.

According to current information, an institution should receive about \$6,800 for each sport it sponsors above 12.

Two-thirds of the broad-based pool, or \$20,883,333, will be apportioned according to the number of full-time equivalency grants-in-aid awarded by a member institution.

The formula for payment is as follows:

- Grant Nos. 1 through 50—\$87 each
- Grant Nos. 51 through 100—\$174 each
- Grant Nos. 101 through 150—\$870 each
- Grant Nos. 151 through 200—\$1,740 each
- Grant Nos. 201 through 250—\$2,610 each
- Grant Nos. 251 and above—\$3,480 each

The above formula has been used to develop Table No. 3 for ease of reference in determining the approximate amount an institution might receive.

It should be noted that the grants-in-aid table was developed based on unofficial information submitted to the NCAA national office in 1989 indicating that Division I member institutions award 37,675 full-time equivalency grants. If, when the official forms are submitted in the spring of 1991, it is determined that the actual number is more or less than the above figure, the table will be adjusted so as not to exceed \$20,833,333.

Questions concerning the basketball and broad-based pools can be directed to Louis J. Spry, associate executive director, at the national office.

## More revenue

*Continued from page 1*

membership from the 1991-97 television contract.

These recommendations will be submitted to the NCAA Executive Committee for review at its December 3 meeting. They are being sent to commissioners of all NCAA Division I member conferences and Division I directors of athletics in order to provide an opportunity for the membership to comment prior to that date.

### Background

In late August, all Division I conference commissioners and directors of athletics received a memorandum outlining the distribution plan for the \$32 million basketball

pool, whereby in April 1991 conference offices will receive checks based on their teams' participation in the NCAA Division I Men's Basketball Championship over a rolling six-year period, beginning with 1985-1990. The memorandum also indicated that moneys from the \$32

# Four remaining I-A perfect teams to face tough tests

By James M. Van Valkenburg  
NCAA Director of Statistics

Top-ranked Virginia, Nebraska, Houston and Wyoming are the only remaining undefeated-untied teams in Division I-A. And not surprisingly, all four have the toughest parts of their schedules yet to come, in terms of combined won-lost records.

Auburn and Georgia Tech are unbeaten but once tied. Auburn, too, has its toughest games yet to come, but Georgia Tech's I-A foes so far have a 19-8 record when not playing Tech, for a .704 percentage—second nationally to Miami's (Florida) .726.

Virginia's I-A opponents to date are only 12-17-1 vs. I-A foes when

So, Virginia's remaining schedule is .614—second among the unbeaten to Auburn's .625. Here is the schedule chart for all I-A unbeaten:

Perfect	Schedule Percentage:		
	Past	Future	Season
Houston .....	.516	.565	.537
Nebraska .....	.471	.554	.508
Virginia .....	.417	.614	.509
Wyoming .....	.424	.520	.466
<b>Once Tied</b>			
Auburn .....	.517	.625	.573
Georgia Tech .....	.704	.500	.593

Auburn has three winners left—6-1 Florida, 6-2 Southern Mississippi and 4-3 Georgia. Nebraska has 6-1-1 Colorado and 5-2 Oklahoma. Houston has 5-1 Texas Christian and 4-1 Texas. Wyoming has 5-3 Colorado State and 5-1 Brigham Young. Virginia is the only winner left for Georgia Tech.

Several times in that span, there were no perfects left after the bowls—1989, 1985, 1983, 1982, 1978 and 1977, to name the most recent.

Putting it another way, the 21 perfect-record teams in Division I-A since the 1979 regular season are 7-13-1 in bowls.

## Three Perfects in I-AA

Eastern Kentucky, Nevada-Reno and Youngstown State are the undefeated-untied teams in Division I-AA with Massachusetts and New Hampshire both once-tied.

The last two play each other November 17 in their final regular-season game. The three perfects may finish the regular season that way.

Eastern Kentucky plays only one winning team down the stretch—5-2 Tennessee Tech October 27. Nevada-Reno plays two—5-2 Montana and 5-2 Boise State. Youngstown State plays none. In fact, its last three foes have a combined record of 2-18-1.

So far, Eastern Kentucky's foes have the best winning percentage at .548 when not playing Eastern. Here is the schedule chart:

Perfect	Schedule Percentage:		
	Past	Future	Season
Eastern Ky. ....	.548	.320	.447

See Four, page 17

Northern Illinois quarterback Stacey Robinson leads Division I-A in scoring and is No. 6 in rushing

## Football notes

not playing the Cavaliers, for a .417 percentage. But on the first three Saturdays in November, Virginia plays 5-0-1 Georgia Tech, 4-2-1 North Carolina and 5-3 Maryland before finishing with 3-4 Virginia Tech.

## U-U history

If all four remaining perfects lose or are tied before the bowls, it would be the first regular season with no undefeated-untied teams in more than a half century—since way back in 1936.

# More revenue

Continued from page 6

million broad-based pool would be distributed to each institution in August 1991 based on the number of varsity men's and women's sports sponsored and number of grants-in-aid awarded by each institution. Finally, it anticipated that a supplement for academic support for athletics would be provided each institution.

At its October 17 meeting, the special committee gave careful consideration to numerous comments, questions and suggestions from the membership related to the distribution plan. While some minor adjustments are being recommended in the basketball pool, the majority of the special committee's recommendations developed at that meeting deal with the broad-based plan and the administration of the needy student-athlete fund.

## Principles

At its initial meetings in January and February, the committee developed a set of guiding principles for distribution of the revenues, based largely on comments and recommendations received from the membership. These guidelines served as the basis for the committee's deliberations over the next nine months. Among them:

1. That the committee remain open-minded and flexible, and that it explore each proposal or recommendation submitted by the membership and other interested entities;
2. That the distribution formula eventually developed provide a mechanism for sharing the revenue equitably, though not equally, among all member institutions;
3. That consideration be given to distributing some portion of the revenue based on the breadth of an institution's athletics program;
4. That care be taken to avoid funding special interests of various segments of the membership or items that may be more an institution's responsibility than that of the Association;

5. That a common distribution formula be applied to revenue from all NCAA championships, and that an institution's expenses for participating in any NCAA championship be more fully funded;

6. That the committee's recommendations address the image of the NCAA and intercollegiate athletics in general, and that the welfare of individual student-athletes (not solely that of the institution) be considered, and

7. That the committee be cognizant of the fact that it may not be possible to develop a distribution plan that would fully satisfy the financial concerns of all institutions or programs.

The committee believes that the proposed distribution plan for 1990-91 reflects these principles to the greatest extent possible, given the significant diversity of athletics programs and interests and the information available to it to date.

## Recommendations

Following are the special committee's recommendations regarding the needy student-athlete fund, the broad-based and basketball pools, and the academic-enhancement component:

## Needy Student-Athlete Fund

A total of \$1.5 million currently is earmarked in the Association's 1990-91 general operating budget to assist student-athletes in Division I with special financial needs, to be administered by conference offices. The committee is recommending that this amount be increased to \$3 million, with \$750,000 from both the basketball and broad-based pools supplying this additional funding.

The amount sent to each conference would be determined by dividing \$3 million by the total number of student-athletes in Division I who received coaching during the previous academic year in a sport in which the NCAA conducts championships, and multiplying that

amount by the number of student-athletes participating at each member institution in the conference. A needy student-athlete would be defined as one who qualifies for a Pell Grant.

Each conference would serve as administrator of the fund for its member institutions (independent institutions would be assigned to a conference for this purpose). Unused funds would accrue to the conference for use by any of its member institutions, at its discretion.

It is anticipated that these moneys would be distributed in August 1991 and each August thereafter, through August 1997. Specific permissible uses of the moneys and details of the administration of the fund will be distributed to conferences subsequent to the Executive Committee's consideration.

## Broad-Based Pool

The committee will recommend that the broad-based pool be distributed among all Division I institutions on the basis of the number of varsity sports sponsored (weighted one-third) and the number of grants-in-aid awarded (weighted two-thirds) in 1990-91.

An institution would receive a unit for each sport sponsored in excess of 12 (the minimum requirement for Division I membership). Only sports in which the NCAA conducts championships competition and which meet the minimum contests and participants requirements of Bylaw 20.9.3.3 would be counted.

During the 1990-91 academic year, the units earned by an institution in the grants-in-aid category would be based on the number of countable financial aid awards given (based upon full-time equivalencies), beginning with one grant and progressing in increments of 50. After 1990-91, the units would be based on the number of athletics-related grants-in-aid. As is the case with sports sponsorship, grants would be

counted only in sports in which the NCAA conducts championships competition and which meet the minimum contests and participants requirements of Bylaw 20.9.3.3.

[Note: Even though the Association does not conduct a Division I-A football championship, that sport and grants awarded in it will be counted.]

Under this two-part broad-based distribution formula, every Division I institution would receive moneys from the broad-based pool.

The committee discussed at length ways in which the formula might address the wide range of costs of attendance among member institutions, but it determined that there was not a satisfactory and equitable method of doing so with the information available to it at this point. It has suggested that this aspect be given further consideration subsequent to 1990-91.

## Basketball Pool

As noted earlier, the committee addressed questions related to the basketball pool that will be distributed to conference offices. It will recommend that independent institutions receive a full unit share based on their tournament participation over the rolling six-year period. An independent institution that joins a conference would retain the unit(s) it earned as an independent prior to the date it elected to join the conference; any units the institution earns subsequent to that date would accrue to the conference.

The committee also reaffirmed its earlier position that in the event an institution leaves a conference and realigns with another, the units it earned will remain with the conference that it left.

The committee took no formal position on the question of whether a conference would be required to distribute moneys from the basketball pool among all its member institutions, instead referring that topic to the Executive Committee

for consideration. Its expectation, however, is that a conference would share those moneys equally among its members.

## Academic Enhancement

The committee will recommend that a flat, equal payment of \$25,000 be provided each Division I institution to enhance academic-support programs for student-athletes.

The enclosed Table No. 1 summarizes the approximate amount that each conference can expect to receive from the basketball and broad-based pools and the academic-enhancement component; the accompanying cover page explains the formula used to determine the allocations. Table Nos. 2 and 3 will assist institutions in determining the individual amounts they might expect to receive from the broad-based pool.

It cannot be overemphasized that these figures are tentative; they are based on the latest available information, which, prior to payment, will be adjusted based on sports sponsorship and grants-in-aid information that institutions will be asked to certify for this purpose.

It also should be noted that these recommendations, if approved by the Executive Committee, put in place a distribution plan for 1990-91. The committee is fully cognizant of the importance of evaluating the plan subsequent to the first year in order to ensure that the guiding principles continue to be appropriate and that the plan reflects those principles.

On behalf of the committee, we appreciate the recommendations received from the membership and invite additional comment prior to the Executive Committee's December 3 meeting.

## DIRECTORS OF ATHLETICS

Lynn King succeeds Curtis Blake, who resigned June 1 at Drake. King was the first full-time athletics director at Wisconsin-Oshkosh... Alan Cummings appointed Interim AD at Stanford replacing Andy Geiger, who became AD at Maryland... Former Louisiana State football coach Jerry Stovall named AD at Louisiana Tech, effective November 1. Stovall replaces current athletics director Paul Miller, who will become athletics assistant to the president... After over 20 years of service at Clarion, Frank Lignelli retired, and associate AD Bob Carlson will become interim AD, effectively immediately.

## ASSOCIATE DIRECTOR OF ATHLETICS

Eric Hyman named at North Carolina State after six years as director of athletics at Virginia Military. Prior to that, he spent 11 years at Furman as an assistant football coach and associate AD.

## ASSISTANT DIRECTORS OF ATHLETICS

Jon McBride named assistant AD for external affairs at Florida after serving as associate AD at St. Louis... Dowling assistant baseball coach Chris McKnight given additional duties as assistant AD... Cary Benedict appointed at Mount Holyoke... Sports information director Ian McCaw promoted to assistant athletics director for external affairs... Robert A. Ceplikas, associate director of admissions at Dartmouth from 1987-1989, appointed special assistant to the director of athletics.

## COACHES

**Baseball**—Bob Borowicz named at Stony Brook. He has been a high school social studies teacher for the past 18 years and was head coach at Hofstra for four years.

**Men's basketball**—Ron Carr named head coach at Longwood after serving as assistant at Virginia Tech for the past three years... Stan Lewter appointed at Livingstone. Lewter has served as assistant at North Carolina State and East Carolina.

**Men's basketball assistants**—Jim Christian, former graduate assistant, promoted, and Greg Horn named graduate assistant at Western Kentucky... Michael Lunney appointed at Roger Williams. Lunney is a 1990 graduate of New Hampshire, where he earned four varsity letters... Noel Phillips, a four-year letterman at Lawrence, named at his alma mater. He replaces Brad Garvey.

**Women's basketball**—Gerald Govan replaces Phyllis Harker, who resigned in August as interim head coach at Jersey City State. Govan finished a nine year career in the American Basketball Association as the second all-time leading rebounder.

**Women's basketball assistants**—Mike Dutton named at Mount Holyoke after serving as an intern at San Diego... Former Florida Atlantic graduate assistant Kathy Bonollo named full-time assistant as result of recent department restructuring... Joe Gurala, in part-time capacity, and Tobette Pleasant, as graduate assistant, have been added to Dayton's coaching staff. Pleasant returns to her alma mater and home town after a playing career in Germany... Robyn Adams, a Slippery Rock graduate, joins Juniata as assistant. She coached at Susquehanna and various high school teams... New York native Allison Rowe named at Jersey City State. She was a standout player at Massachusetts-Boston.

**Women's field hockey**—Julie Handzel named at Rochester Institute of Technology. She replaces Jon Poulakis, who will remain head coach of women's soccer.

**Women's gymnastics**—Beth Evangelista, a graduate of William and Mary, hired at Longwood.

**Men's golf**—Tom Robinson appointed head coach at Rhodes, where he also will assist in men's basketball.

**Women's lacrosse**—Sandra Bridgeman selected to head lacrosse and field hockey at Longwood. She was a member of the 1988 Olympic field hockey team.

**Women's lacrosse assistant**—Sarah Feyerherm named at Holyoke, where she also will assist in field hockey.

**Women's soccer**—Tracey Marullo hired at Wells, where she also will assist with women's lacrosse.

**Women's swimming and diving**—Brian Machemer named head coach at Wells.

Drake selected  
Lynn King as  
director of athletics

Julie Handzel  
named field hockey  
coach at RIT

Florida appointed  
Jon McBride as  
assistant AD

**Women's softball**—Anita L. Kubicka named at Montclair State. She was all-America at second base for Trenton State in 1984. Kubicka replaces Willie Rucker who left to head the program at Western Oregon this summer.

**Men's tennis assistant**—Gary Donnelly joins Drake's staff. As a professional, Donnelly ranked as high as sixth in the world in doubles and 42nd in singles, before retiring.

**Women's volleyball**—Kevin Lynch promoted at Roger Williams after serving as assistant for the past two years. He replaces Jeanne Gansburg, who left to pursue graduate studies at Pennsylvania... Anita L. Kubicka succeeds interim coaches Jill Jeffrey and Holly Gera at Montclair State.

**Wrestling**—Brad Gintert named interim coach at Wesleyan replacing Frank Vektri, who moved to Wisconsin-Platteville as wrestling and assistant football coach.

## STAFF

**Sports information director**—Janice Savitz, head basketball coach at Mount Holyoke, has taken on additional duties as SID... Matt Bourque will take over sport-specific duties at Maine for Ian McCaw, who was promoted.

**Sports information assistant**—Joe Roberts appointed at Maine. Roberts recently served as assistant sports information director at Central Connecticut State.

**Assistant trainer**—George Mitrolka named at Mount Holyoke.

## CONFERENCES

David Siroy named assistant commissioner for public relations of the Northeast Conference. He replaces Ray Cella, who took a similar post with the Atlantic 10 Conference... Northeast associate commissioner Robert Steitz also resigned to accept a similar position with the Atlantic 10.

## NOTABLES

Hank Steinbrecher, sports marketing executive with the Quaker Oats Company, has been named executive director/general secretary of the U.S. Soccer Federation, effective immediately... Iowa women's basketball coach Vivian Stringer was selected head coach of 1991 USA women's Pan American Games team... Tara VanDerveer will head the 1991 USA women's World University Games team... the U.S. Olympic Committee has several new appointments, including: Rick Mack as director of executive services, Tawna Miller as graphics manager, and Antoinette Rodriguez as a member of the USOC management development program staff. Also, Joan Bonvincini named 1991 USA women's junior basketball coach, Fred Sturm chosen as USA men's volleyball team coach, and Theresa Grentz named 1992 USA Olympic women's basketball coach... Jane F. Swiggett appointed manager of personnel administration by the United States Golf Association. She left the pharmaceutical company of Schering Plough in Kenilworth, New Jersey.

## DEATHS

Tom Frederick, who served on the staff of the National Federation of State High School Associations for 22 years, died October 10 in Liberty, Missouri. He was one of the country's leaders in interscholastic athletics for over 40 years. He was 66... Charles Donald "Don" Clawson, 70, a former all-America halfback at Northwestern, died October 9 in Hilton Head, South Carolina. He played from 1939 to 1942 and also lettered in basketball and track... Tom Barry, cross country coach at St. Norbert, died after participating in a local run October 7 in Green Bay, Wisconsin... Ken Spain, a 1968 Olympic gold medalist and former all-America basketball player at Houston,

died of cancer October 11. He was 44.

## POLLS

### Division I Men's Cross Country

The top 20 NCAA Division I men's cross country teams as selected by the Division I Cross Country Coaches Association through October 16, with points:

1. Iowa State, 333; 2. Arkansas, 327; 3. Wisconsin, 306; 4. Tennessee, 289; 5. Arizona, 261; 6. Notre Dame, 252; 7. Oregon, 228; 8. Brigham Young, 224; 9. Wake Forest, 212; 10. Michigan, 183; 11. Texas, 156; 12. Washington, 131; 13. Kentucky, 109; 14. Connecticut, 106; 15. South Alabama, 100; 16. Alabama, 79; 17. Dartmouth, 63; 18. (tie) Kansas and Weber State, 54; 20. Northern Arizona, 24.

### Division I Women's Cross Country

The top 25 NCAA Division I women's cross country teams as selected by the Division I Cross Country Coaches Association through October 17, with points:

1. Villanova, 200; 2. Providence, 186; 3. Indiana, 183; 4. Brigham Young, 177; 5. Georgetown, 170; 6. UC Irvine, 157; 7. Oregon, 149; 8. Tennessee, 148; 9. Clemson, 125; 10. Arkansas, 119; 11. Nebraska, 112; 12. Michigan, 107; 13. Wisconsin, 97; 14. North Carolina State, 91; 15. Iowa, 81; 16. Northern Arizona, 73; 17. Baylor, 65; 18. Washington State, 56; 19. Iowa State, 55; 20. Kansas State, 54; 21. Pennsylvania, 48; 22. Yale, 39; 23. William and Mary, 20; 24. (tie) Auburn and Weber State, 16.

### Division II Men's Cross Country

The top 20 NCAA Division II men's cross country teams as selected by the Division II Cross Country Coaches Association through October 15:

1. Edinboro, 2. Shippensburg, 3. Cal Poly San Luis Obispo, 4. Humboldt State, 5. South Dakota State, 6. Cal Poly Pomona, 7. Southeast Missouri State, 8. North Dakota State, 9. Mankato State, 10. Sonoma State, 11. UC Riverside, 12. Augustana (South Dakota), 13. Northwest Missouri State, 14. Southern Connecticut State, 15. Southern Indiana, 16. Lowell, 17. Ashland, 18. Slippery Rock, 19. Kearney State, 20. Lewis.

### Division II Women's Cross Country

The top 20 NCAA Division II women's cross country teams as selected by the Division II Cross Country Coaches Association through October 15:

1. Cal Poly San Luis Obispo, 2. South Dakota State, 3. Air Force, 4. UC Davis, 5. Navy, 6. Southeast Missouri State, 7. North Dakota State, 8. Edinboro, 9. Cal State Los Angeles, 10. Millersville, 11. Northeast Missouri State, 12. Augustana (South Dakota), 13. Indiana (Pennsylvania), 14. Cal State Stanislaus, 15. Northern Michigan, 16. Cal State Hayward, 17. Springfield, 18. Seattle Pacific, 19. Pittsburg State, 20. Grand Valley State.

### Division III Men's Cross Country

The top 20 NCAA Division III men's cross country teams as selected by the Division III Cross Country Coaches Association through October 15, with points:

1. Wisconsin-Oshkosh, 160; 2. Calvin, 148; 3. Rochester, 139; 4. Augustana (Illinois), 136; 5. Brandeis, 126; 6. St. Thomas (Minnesota), 115; 7. Haverford, 106; 8. North Central, 102; 9. Ithaca, 99; 10. Wisconsin-LaCrosse, 85; 11. Southeastern Massachusetts, 80; 12. St. John's (Minnesota), 64; 13. Wisconsin-Stevens Point, 61; 14. Rochester Institute of Technology, 56; 15. Occidental, 52; 16. American (Puerto Rico), 40; 17. Cortland State, 29; 18. (tie) Otterbein and Wabash, 15; 20. (tie) Alma and Bates, 13.

### Division III Women's Cross Country

The top 20 NCAA Division III women's cross country teams as selected by the Division III Cross Country Coaches Association through October 15, with points:

1. Wisconsin-Oshkosh, 158; 2. Cortland State, 154; 3. Ithaca, 144; 4. Allegheny, 131; 5. Williams, 127; 6. St. Thomas (Minnesota), 120; 7. Wisconsin-LaCrosse, 109; 8. Simpson, 108; 9. Calvin, 82; 10. Mary Washington, 78; 11. St. Olaf, 74; 12. Trenton State, 65; 13. Washington (Missouri), 60; 14. (tie) Carleton and Smith, 52; 16. Bowdoin, 44; 17. Wisconsin-Whitewater, 30; 18. Occidental, 28; 19. Mount Union, 20; 20. Alma, 15.

### Division I Field Hockey

The top 20 Division I field hockey teams through October 16, with records in parentheses and points:

1. North Caro. (12-2) ..... 120
2. Old Dominion (13-2-1) ..... 114
3. Penn St. (12-2) ..... 108

# Soccer showdown looms for Virginia, Santa Clara women

If success really does breed success, there is a good explanation for the top two teams in the most recent Intercollegiate Soccer Association of America (ISAA) Division I women's poll.

Last fall, Virginia's and Santa Clara's men's teams played to a 1-1 tie in the NCAA championship game and were declared conational champions. This fall, Virginia's

women are No. 1 and Santa Clara's No. 2.

"There must be some kind of psychological advantage involved," said Jerry Smith, Santa Clara's head women's coach. "It's a winning attitude. The women could see the men being extremely successful, and they could paint the picture for themselves. The programs kind of feed off each other."

While the men's teams have slipped ever so slightly (Santa Clara is ranked fifth and Virginia fourth), the two women's teams have risen to the top. In fact, when the University of North Carolina's 103-game unbeaten streak was snapped by Connecticut, Santa Clara became the first school in NCAA history to have both its men's and women's soccer teams ranked first at the same time. The men's team subsequently lost at Portland and fell to fifth.

Both teams appear ready to try and dethrone four-time defending champion North Carolina, although neither will accept the favorite's label. The Tar Heels had not lost since the 1985 championship game against George Mason. They have won seven of the eight championships in the tournament's history.

"I think they have to be the favorite," Smith said. "It is unbelievable that they went that long. Come play-off time, they will be the team to beat."

"Certainly, we have respect for all of our opponents, but we are looking for an opportunity to play North Carolina. We are not intimidated. We are more excited about a chance to test ourselves against the best."

Virginia's Lauren Gregg shares Smith's respect for North Carolina. "I think all games at this level are important," Gregg said. "But this game (Virginia was scheduled to play North Carolina October 20) is bigger because we've never beaten them. For the first time, we feel capable of winning."

Both Santa Clara (12-0-0 through October 10) and Virginia (14-0-0) are armed with some pretty potent weapons. Brandi Chastain, Soccer America's 1986 freshman player of the year while at the University of California, Berkeley, has overcome reconstructive surgery to both knees and leads the nation in scoring through 12 games with 17 goals and five assists. Chastain scored twice each against California and Stanford, both times to help the Broncos turn 1-0 deficits into 2-1 victories.

Tamie Batista, an academic all-America last season, was named to the all-tournament team last year when the Broncos lost in the semifinals to Colorado College. She played midfield her first two years

Jerry Smith

Andrea Rubio

before moving back to sweeper last season.

The Cavaliers also are not without talent. Andrea Rubio leads the team with 12 goals and eight assists. "We are a very mobile, attack-oriented team," Gregg said. "Any one of our front six players is capable of scoring a goal. Our opponents cannot shut down just one or two people."

When opponents have the ball, they must contend with Andrea

Rippe, Virginia's senior goalie, who Gregg said is "having an outstanding year. We have recorded shutouts in seven of our last eight games."

When the tournament starts, North Carolina will have to share some of the spotlight. And Gregg says it may be time to spread around the hardware, as well. "We're a different team this year," she said. "Last year, our young kids didn't know what being in the tournament meant. We're more mature."

Brandi Chastain has rebounded from major surgery to both knees to lead the nation in scoring through 12 games this season

## Championship Profile

**Event:** Division I women's soccer

**Field:** This 12-team, single-elimination tournament will feature at least one team from each of five geographical regions, with the rest of the field selected at large.

**Automatic qualification:** No automatic qualification.

**Defending champion:** North Carolina defeated Colorado College, 2-0, to win its fourth consecutive championship. The Tar Heels did not give up a goal throughout the tournament, the second time (the first was 1987) that they have accomplished that.

**Schedule:** All games will be played on the campuses of competing institutions. The first round is to be completed by November 4. The second round is to be completed by November 11. The semifinals and final, on the site of one of the participating institutions, will be November 17-18.

**The NCAA News coverage:** Scores and pairings will be published in the November 5 and 12 issues of the News. Results of the semifinals and championship will appear in the November 19 issue of The NCAA News.

**Contenders:** Virginia, Santa Clara and North Carolina.

**Play-off notes:** North Carolina has compiled a 23-1 record in the championship... The September 24 polls reflected the first time since 1985 that a team other than North Carolina received the top ranking... The Tar Heels have hosted two championship finals... Virginia enters the tournament never having won a game. The Cavaliers have an 0-3 record, including a first-round loss to Central Florida in 1989. Santa Clara had never been in the tournament before last year's semifinal appearance. The Broncos' record is 1-1.

## Bombers coming back

Ithaca College is hoping to stage a comeback in the 1990 Division III Field Hockey Championship.

The Bombers competed in every championship between 1982 and 1987, winning the 1982 title and finishing second in 1983. Now, they hope to return to postseason play after a two-year absence.

Doris Kostrinsky, who is in her 22nd year as head coach at Ithaca, has some definite ideas about the ingredients that must be blended together to stir up a successful season. Skill and the ability to execute consistently under pressure are prime factors.

In addition, a team must be competitive—and that means playing hard for the entire game and refusing to quit no matter what obstacle presents itself.

Conditioning is critical because a lack of it can lead to errors or injuries. Disciplined athletes, those who show up for the first day of practice ready to play and focus on what they are doing because they want to improve, are other key elements.

"If anyone of those ingredients is missing, that can be the difference between winning and losing," Kostrinsky said.

This year, Kostrinsky's team is

composed of "a strong nucleus of seniors playing their best hockey" and a good mix of underclassmen. Through 14 games, the top three scorers were senior Molly Melchior, sophomore Sue Bender and junior Rachael Greener. Sophomore Wynne Lobel has been a mainstay in the net.

"It means a great deal to the seniors to get back into postseason play," Kostrinsky said.

Unlike some championships, this one has not really been dominated by a single team. No team has won back-to-back championships, although three teams, including Ithaca, have had the opportunity to do so.

"I've actually been surprised by that," Kostrinsky said. "There's not just one totally dominant team but there is a group of teams that always seems to be there."

In addition, the title games have been highly competitive, demonstrated by the fact that every championship game except the first one has been decided by only one goal.

"The final game will be a showcase for two of the top teams," Kostrinsky said. "The competition is very keen. The team that can do it a little better that day and make the best of its opportunities will win."

## Championship Profile

**Event:** Division III field hockey

**Field:** The 16-team field will include at least two teams from each of five regions and six at-large selections.

**Automatic qualification:** None.

**Defending champion:** Missy Carman scored what proved to be the game-winning goal with just over 12 minutes remaining in the first half as Lock Haven defeated Trenton State, 2-1.

**Schedule:** Regional competition is scheduled for November 2-3. The semifinals, third-place game and championship will be played November 9-10. All games will be played at on-campus sites.

**The NCAA News coverage:** Regional scores and semifinal pairings will be published November 5. Championship results will appear in the November 12 issue.

**Contenders:** Bloomsburg, Ithaca, Messiah, Trenton State, Lock Haven.

**Play-off notes:** Trenton State is the only team to compete in all nine previous championships. The Lions have played for the title six times and won four... They have reached the semifinals eight times... Kenyon, Lock Haven (competing in Division III for the first time), Muhlenberg and Worcester Tech played in the championship for the first time last year... Ithaca graduate assistant Barbara Wachowiak played on the 1982 title team.

In her 22nd year as Ithaca's head coach, Doris Kostrinsky (center) knows what her team needs to be successful

# Defeat helps Methodist women's soccer program

It is highly unusual for a coach, especially the coach of a top-ranked team, to refer to a 1-0, double-overtime loss as "a terrific game for us." But that is exactly what Joe Pereira of Methodist College recently did.

Methodist, 12-2-0 through October 10, is the No. 1-ranked team in the Intercollegiate Soccer Association of America's latest Division III women's poll. On October 9, the Lady Monarchs squared off against No. 8 North Carolina State. That's No. 8 in Division I.

The teams battled through 90 minutes of scoreless regulation play and one 15-minute overtime. Then, with two minutes remaining in the second overtime, the Wolfpack scored and escaped with

Joseph Pereira

the victory.

"It was an unbelievable team effort for us," Pereira said. "We had five shots on goal, compared to 16 for them. We wanted to be patient and get our shot at a goal to get out of town with a win. We weren't able

to do that, but this was like a win for us.

"Maybe this will help us turn the corner."

Methodist currently is the unanimous choice as the number one team in Division III. The Lady Monarchs hold down the top spot by 21 points over William Smith and by 33 over last year's champion, UC San Diego.

With five seniors, all with two years of experience in the semifinals, and three returning all-Americans, the Lady Monarchs are loaded. Add to that potent lineup a freshman goalkeeper who has allowed four goals in 14 games, and you have a tough team to beat.

"We are playing with a lot of confidence right now," Pereira said. "We are trying to do all we can to prepare for the tournament."

Anne Thorpe leads Methodist in scoring. The three-time all-America and two-time academic all-America has 11 goals and nine assists through 14 games. Tricia Criswell has been named all-America the past two seasons and holds down the midfield position as "a very hard-nosed worker," according to Pereira. Catherine Byrne was the Lady Monarchs' third all-America at sweeper last season.

Tammy Murphy, a converted defender, "kept us in the game at North Carolina State," Pereira said. "She came out of the goal real well. The goal that was scored was questionable. She has done an outstanding job for us."

If the Lady Monarchs hold their top position throughout the tournament and bring the championship trophy back to Fayetteville, North

Three-time all-America Anne Thorpe, who also is a two-time academic all-America, leads Methodist in scoring this season

Carolina, they will be the fourth straight first-time winner in Division III.

"I believe the turnover in champions is caused by parity more than anything else," Pereira said. "But

when you reach the semifinals, the home team has a tremendous advantage. Anything can happen in two games. But you sure hope to be the host team for the championship game."

## Championship Profile

**Event:** Division III women's soccer.

**Field:** This 16-team, single-elimination tournament will feature at least two teams from each of five geographical regions.

**Automatic qualification:** Independent College Athletic Conference.

**Defending champion:** UC San Diego became the third straight different champion and the third straight team to win on its home field with a 3-2 overtime victory over Ithaca.

**Schedule:** All games will be played at on-campus sites. First-round games will be played November 3, and second-round games will be played November 4. Semifinals and the final will be played on the campus of one of the competing institutions November 10-11.

**The NCAA News coverage:** Scores and pairings will be published in the November 5 issue of The NCAA News. Results from the semifinals and championship will appear in the November 12 issue of the News.

**Contenders:** Methodist, William Smith, UC San Diego, Cortland State, Kalamazoo and Rochester.

**Play-off notes:** Methodist has appeared in all four tournaments, including reaching the semifinals the past two years... Cortland State, Hartwick, Methodist, Plymouth State, Rochester, St. Mary's (Minnesota) and UC San Diego have appeared in all four Division III tournaments... Of those teams, Rochester has won two championships and has the best winning percentage (.778)... William Smith (8-2 in three years) has the best percentage overall.

# Swimming power Kenyon strong in men's soccer

If one were to play a word association game with followers of Division III athletics and say the word "Kenyon," the automatic response would be, "swimming." And justifiably so.

Coach Jim Steen's Lords have won 11 straight Division III swimming championships. The school's 78 individual titles, all coming in the pool, lead the entire division. Kenyon's women swimmers also have won seven straight team titles.

But Mike Pilger would like that response altered just slightly. "Hopefully, now people will say, 'swimming and soccer,'" said the coach of Kenyon's second-ranked men's soccer team. "We never had been ranked in

Kevin Mills

the top 20, and now we're second. We finished 12-4 last year and lost just one senior. The guys came in in better shape this year. We knew we

would be good, but..."

Pilger is one reason the Lords had reason to believe they would be successful. He played collegiately at Boston University, where he helped turn the Terriers into a perennial power. After graduating, he played professionally for six years, including in the North American Soccer League.

In his third season at Kenyon, Pilger has the Lords on the brink of perfection. At 12-0-0 (through October 8), they are the only Division III team in the nation that is unbeaten and untied. They knew they had a chance for an outstanding season after a 2-1 victory at Wheaton (Illinois) in the season's third game, Pilger said. "We went up there in front of that big crowd," he said. "We scored first and held the lead through the first half. They tied the score with about 15 minutes remaining, but we came back two minutes later and scored again. That really catapulted us into the spotlight."

With only two seniors and two juniors, the Lords rely on youth. Sophomore Mike Donovan is leading the North Central Athletic Conference in scoring with 12 goals and nine assists. Junior Kevin Mills, from Langley, England, was all-Mideast last season and is the team captain. Both should be considered for all-America honors, according to Pilger.

The Lords also start four or five freshmen each game. But the lack of experience apparently hasn't hurt. They have outscored their opponents, 47-7, through 12 games this year, after turning in a 36-19 ratio last season.

Still, since this the first time the

Kenyon's Mike Donovan leads the North Central Athletic Conference in scoring

Lords ever have been ranked, it seems logical that Pilger might have some questions about how to react. It is there, he says, but having Steen just down the hall has helped.

"I talk to coach Steen a lot about

motivation," Pilger said. "It has never been a negative situation (being in the swimming team's shadow). It has been a positive factor in our success. He understands what to do with success, and he's helped us."

## Championship Profile

**Event:** Division III men's soccer.

**Field:** This 32-team, single-elimination tournament will feature no more than five teams from each of eight geographical regions.

**Automatic qualification:** Dixie Intercollegiate Athletic Conference, Independent College Athletic Conference, Massachusetts State College Athletic Association, New Jersey Athletic Conference, North Coast Athletic Conference, State University of New York Athletic Conference and University Athletic Association.

**Defending champion:** Elizabethtown defeated Greensboro, 2-0, on the strength of two Mark Pratzner second-half goals. It was the Blue Jays' first championship. Elizabethtown had been in the tournament 13 previous times and advanced as far as the semifinals just once.

**Schedule:** All games will be played at on-campus sites. First- and second-round games will be played by November 4. The third round will be completed by November 11. Semifinals and the final will be played on the campus of one of the participants November 16-17 or 17-18.

**The NCAA News coverage:** Scores and pairings will be published in the November 5 and 12 issues of the News. Results of the semifinals and championship will appear in the November 20 issue of The NCAA News.

**Contenders:** Elizabethtown, Kenyon, Ithaca, Babson, Ohio Wesleyan.

**Play-off notes:** Elizabethtown (12-0-1) has been ranked first all year... The Blue Jays will be trying to become the first repeat champion since North Carolina-Greensboro in 1986 and 1987... Kenyon (12-0-0) is the only undefeated, untied team. The Lords never have been ranked before this season... Ohio Wesleyan may be 11-3-0, but with one of those losses coming to Division II power Oakland, the Battling Bisons appear strong. "They are the team to beat as far as I'm concerned," said Kenyon coach Mike Pilger.

# Florida student-athlete tutors local first graders

When he's not stopping opponents as a University of Florida linebacker or working toward earning a degree in education/exercise and sports sciences, **Jerry Odom** tutors firstgraders at J. J. Finley Elementary School in Gainesville, Florida.

"I really enjoy being around kids," Odom said. "When you are helping them with something they don't understand and all of a sudden they get it, it is a great feeling to see their accomplishment and to know that maybe you had something to do with that."

**Peggy Zant**, who teaches the 23 children that Odom tutors, said the kids love him. "They are excited about having a member of the Gator football team coming to their class. Jerry works well with the kids."

"The kids appreciate the fact that he is coming in and tutoring," she added. "They realize that it is something that he is doing for them—since he is still taking classes and has such a busy schedule."

The Tampa, Florida, area has a big stake in the 1990 World Series, and the city—and its major university—is in a kind of no-lose situation.

Tampa natives **Tony LaRussa** and **Lou Pinella** are coaching the Oakland Athletics and Cincinnati Reds, respectively. Both attended the University of Tampa and actually were on campus together during the fall of 1962.

When she takes the floor in a few weeks for the season-opening game, California State University, Fullerton, sophomore **Anna Abramova** will become the first Russian national to play Division I women's basketball, according to the Fullerton State sports information office. Abramova, 18, is a 6-1 forward who hails from Leningrad.

"She still has to learn a lot of our ways and style," said her coach, **Maryalyce Jeremiah**. "But she could help us down the road. Any time you have a tall forward who can play outside, it's a plus."

Chris turns a lot of heads these days at Calvin College women's volleyball practice—seven, to be exact. Actually, only assistant coach **Kristina Speidel** goes by Kris.

Others whose ears perk up when they hear that name, however, include players **Christine Lise**, **Christine Male**, **Christine Keen**, **Christen Veltman**, **Kristiana Riemersma** and **Kristin DeJong**.

"It can get a little confusing at times," admitted coach **Janna Ter-**

**Anna Abramova**

**Molen**, "especially since Christy Keen and Christie Veltman both start and play beside each other. Sometimes, when I give one instructions, the other one will respond."

October 6, 1990, has become a special date in California State University, Northridge, football history. Not only did the Matadors upset Portland State University, 19-18, but the game provided two milestones.

Senior **Albert Fann** became the school's all-time rushing leader, and

**Bob Burt**

ABCA Hall of Fame Coach of the Year Banquet, during which he also will be inducted into the association's hall of fame. His all-time record is 1,229-622.

King's College (Pennsylvania) cross country and assistant baseball coach **Jerry Greeley** teaches emotionally disturbed youngsters in the morning and early afternoon—before switching hats to coach student-athletes.

"I work with fifth, sixth and seventh grade boys and girls who are

**Albert Fann**

agement, facility management, financial management and academic support programs.

Nominations now are open for the awards. Deadline for nominations is December 15. Details on the program and a nomination form were published in the September issue of *College Athletic Management*.

More information and additional nomination forms are available by contacting the magazine at 438 West State Street, Ithaca, New York 14850 (telephone 607/272-0265).

**Jerry Greeley**

1937, but their seasons are chronicled in the *Ronald Encyclopedia of Football*, according to Hibner.

If you don't mind low-scoring games, you can argue—based on Hibner's research—that the University of Southern California's 1902 campaign was among the most interesting in all of college football. In '02, the Trojans finished 2-0-2—but never surrendered a point. Yep, they played two scoreless ties!

Illinois State University student-athletes **Thomas Duffy** (baseball), **Greg Gardner** (wrestling), **Kevin Gockel** (baseball), **Antoine Hicks** (basketball) and **Sam Skarich** (basketball) have been awarded endowed scholarships for the 1990-91 school year, officials announced October 10.

## Briefly in the News

head coach **Bob Burt** became the school's all-time leader in coaching victories.

Springfield College field hockey coach **Dottie Zenaty** earned career victory No. 200 October 9 when her 1990 Maroons defeated the University of Connecticut, 2-0. The triumph was Springfield's first over Connecticut since 1982.

Western Athletic Conference officials have announced that Colorado State University will host the league's 1992 men's basketball tournament. The University of Wyoming will host the 1991 play-offs.

Wichita State University has been selected by Missouri Valley Conference athletics directors to host the league's 1991 baseball play-offs. The Shockers, perennial MVC and College World Series contenders, have hosted the league tournament five times in the past six years.

**Gordon Gillespie**, veteran coach at the College of St. Francis in Joliet, Illinois, has been named recipient of the American Baseball Coaches Association's 1991 Lefty Gomez Award.

Gillespie will receive the award January 5 in New Orleans at the

emotionally disturbed... kids no one else wants," he explained. "People label them as bad kids, but there are a lot of factors contributing to their behavior."

"Maybe they come from a bad environment," he added. "Every youngster has a good side, and it's my job to discover it. But first, you have to understand why the boys and girls act the way they do."

The nation's newest postseason football bowl game already has changed names.

Known previously as the Sunshine Football Classic, the game now will be known as the Blockbuster Bowl—thanks to a sponsorship agreement reached by bowl officials with Blockbuster Entertainment Corporation, which owns Blockbuster Video stores.

Although exact figures were not announced, Blockbuster's financial commitment is expected to make this new kid on the bowl block one of the top six in the country.

College Athletic Management magazine has announced the development of an awards-of-excellence program that will recognize accomplishment in six areas—equipment management, athletics training innovations, athletics training man-

Californian **John C. Hibner** has discovered a number of college football teams that completed seasons unscored upon. Many of them accomplished this before the start of official NCAA records keeping in

## ECAC adds 263rd member

Eastern College Athletic Conference Commissioner Clayton W. Chapman and new ECAC President C. Donald Cook of the University of Hartford announced October 5 that Albertus Magnus College has been selected as the 263rd member of the league in a unanimous vote of the ECAC executive council.

Other major announcements from the ECAC fall convention in Hyannis, Massachusetts, which attracted over 500 athletics administrators, staff and vendors, included the formation of an ECAC Division II women's lacrosse tournament; expansion of the ECAC Division III football championships from two to four separate regionals or bowls beginning in 1991, and the election of president-elect Robert C. Deming of Ithaca College and vice-president Rita Castagna of Assumption College.

Elected new members of the ECAC Executive Council were John W. Kaiser of St. John's University (New York), Robert Hartwell of

Adelphi University, Joyce Wong of the University of Rochester, Bridget Belgiovine of Springfield College and Bill Marshall of Franklin and Marshall College.

Eugene Doris of Marist College and Paul J. Dudzick of State University of New York, Stony Brook, were elected to the ECAC eligibility and infractions committees, respectively.

## Binders available for keeping News

Readers of *The NCAA News* are reminded that binders, which provide permanent, convenient storage of back issues of the paper, are available from the publishing department.

Each of the rugged, vinyl-covered binders holds 23 issues of the *News*. They may be purchased for \$10 each, or two for \$19. Orders should be directed to the circulation office at the NCAA (913/339-1900).

## Administrative Committee minutes

### 1. Acting for the Council, the Administrative Committee:

a. Appointed the following to serve as the Council Subcommittee to Review the NCAA Official Information and Sports Sponsorship Form, as recommended by the Committee on Women's Athletics and approved by the Council in August: B. J. Skelton, Clemson University; Charlotte West, Southern Illinois University, Carbondale; J. Dudley Pewitt, University of Alabama at Birmingham; Marjorie A. Irout, Millersville University of Pennsylvania, chair, and Arthur Eason, William Paterson College.

b. Added John C. Parry, Butler University, as an additional consultant to the Council Subcommittee to Develop a Division I-AAA Football Classification.

c. Received a report by the executive director on the September meeting of the Knight Commission on Intercollegiate Athletics.

d. Reviewed the schedule and agendas for the meetings of the Council and division steering committees.

### 2. Acting for the Executive Committee, the Administrative Committee:

a. Approved a recommendation by the Division II Women's Basketball Committee that the squad size for the Division II Women's Basketball Championship be increased from 12 to 14.

b. Approved the following recommendations by the Men's and Women's Tennis Committee:

(1) That the Big Sky Conference and Iowa State University be realigned from the West and Midwest regions, respectively, to the Central region for the Division I Women's Tennis Championships.

(2) That the University of California, Davis, serve as host institution for the 1991 Division II Women's Tennis Championships, May 3-9 at the Gold River Racquet Club, Sacramento, California.

3. Report of actions taken by the executive director per Constitution 4.3.2.

a. Acting for the Council:

(1) Granted waivers per Bylaw 14.8.6.1-(c) to permit student-athletes from six member institutions to participate in tryouts

or competition involving national teams in fencing, golf, softball, swimming and volleyball.

(2) Granted waivers per Bylaws 14.8.6.1-(d) and 14.8.6.2-(b) to permit student-athletes from various member institutions to participate in competition as part of the 1991 Big Sky State Games (Montana).

(3) Granted a waiver of the transfer residence requirement per Bylaw 14.9.2.2-(b) to

Conference No. 16  
October 7, 1990

permit a student-athlete to transfer from Auburn University after loss of eligibility at that institution due to violations of recruiting regulations in which he was innocently and inadvertently involved.

(4) Granted waivers per Bylaw 16.13 as

follows:

(a) University of Akron, to provide expenses to a student-athlete to attend a family member's funeral.

(b) Northeast Missouri State University, to provide expenses to members of its football team to attend a teammate's funeral.

(c) Oklahoma State University, to provide expenses to a student-athlete to attend his mother's funeral.

(d) University of Southern California, to provide expenses to a student-athlete to travel from the site of his mother's funeral to the institution's away-from-home contest.

(e) St. Francis College (Pennsylvania), to pay for flowers sent to the funeral of a family member of a student-athlete.

(f) University of Florida, to provide expenses to a student-athlete to attend his brother's funeral.

(g) University of Hawaii, to reimburse a student-athlete for transportation costs incurred while attending his grandmother's funeral.

(h) University of Maryland, College Park, to send flowers to the funeral of a student-

athlete's mother and to provide transportation to teammates to attend the funeral.

(i) Oklahoma State University, to provide expenses to a student-athlete and his spouse to attend his grandfather's funeral, including transportation for the student-athlete from the funeral to the institution's away-from-home contest.

(j) Virginia Military Institute, to transport a student-athlete to an airport to enable him to travel to the site of his grandfather's funeral.

b. Acting for the Executive Committee:

(1) Granted waivers for championships eligibility per Bylaw 31.2.1.3 to five institutions that failed to submit institutional compliance forms by the specified deadline: American University of Puerto Rico, Frostburg State University, Bellarmine College, Bradley University and Slippery Rock University of Pennsylvania.

(2) Approved a recommendation by the Men's and Women's Rifle Committee that the 1991 Men's and Women's Rifle Championships be conducted at the U.S. Military Academy, March 14-16.

# Volleyball student-athlete likes her role as a model

By Laura E. Bollig  
The NCAA News Staff

Gabrielle Reece is a young student-athlete who affects people in strikingly different ways.

Florida State University women's volleyball coach Cecile Reynaud says seeing middle hitter Reece's face above the net can be scary for her opponents. But fashion experts say seeing Reece's face on a magazine cover is anything but frightening.

There's Reece the volleyball player.

Then, there's Reece the international fashion model described by Elle magazine as one of the world's five most beautiful women.

Reece speaks candidly about her careers. Volleyball is fun, a sport at which she can excel because of her lanky 6-3 frame and natural talent. Modeling is work, a job at which she can excel because of her lanky 6-3 frame and natural beauty.

"I love volleyball," Reece says. "It's more me than work is me. It gives me a chance not to worry about work.... Work is based more on how other people look at me.

"Modeling has made me appreciate volleyball. I came in as a freshman, and I thought practice was a lot of work, a big adjustment. I started to model, and it was really a lot of work. But it's the real world."

## A divided life

For the past two years, Reece's life has been divided between Tallahassee, Florida, and destinations such as New York City, Paris and India. She attends classes and competes for the Lady Seminoles during the fall semester.

When final exams end in December, Reece ducks into a telephone booth, changes clothes and emerges as super model.

She spends the spring semester traveling the world. She once spent five days in Egypt on assignment for British Vogue. Her credits include appearances in Elle, Vogue and Cosmopolitan.

Reece has forfeited her volleyball scholarship to be able to work during the school year. She does not mind paying for her education. While modeling has enriched her life, Reece knows that a degree from Florida State will open even more doors. Modeling will not last forever.

## Three years, max

"Three years, max," she says. "That's why I'm getting my education. A lot of doors have been opened to me because of the combination of modeling and volleyball. Modeling is like a golden handcuff. You can earn a lot of money. It's been good to me, but in some ways

Gabrielle Reece at work...

it is very empty."

So what does it take to make a 20-year old student-athlete a success in the fashion industry?

"I think it's good that I'm not just a face model or a body model. I guess just being all-around helps," Reece says. "I'm relatively easy to work with, I think. I don't have an attitude. I've taken the time to learn about the business. You've got to pay attention and watch others. It's important to educate yourself. After all, it is my job."

And don't talent agents get just a little bit worried that an opponent's spiked volleyball might damage her appearance?

"At first, my agents asked me what I was doing. But I told them I have to do what I want to do. Then they calmed down. That took some time."

She does what she has to do. And she does it well.

Through 21 matches, Reece is her team's third-leading hitter with 194 kills. She paces the team in blocks with 31 solos and 63 block assists. She is the career leader in solo blocks and second in all-time total blocks at Florida State.

The Lady Seminoles are 14-7

overall, 4-1 in the Metropolitan Collegiate Athletic Conference. Florida State has won the Metro tournament and advanced to the NCAA Division I Volleyball Championship in each of Reece's first three years. The Lady Seminoles finished the 1989 season with a school-record 30 wins, losing to California in the first round of the NCAA tournament.

## A pleasant surprise

Reynaud, in her 15th season at Florida State, considers Reece a pleasant surprise.

"She can block and hit," Reynaud says. "She's had to do these things without a lot of training that players normally get in the spring. I feel like, with that training, she could be one of the best players in the country."

"She's an unusual type of person, especially this day in age in college athletics," Reynaud said. "She's given up a lot of financial benefits to stay in college. Not only is she sacrificing a lot of money, but she's also paying a lot of money to play here. Training, weightlifting, practice, she's paying for all of that. She's a walk-on. She doesn't like that, but that's what she is."

"She seems to handle the attention

and at play

very well," Reynaud says. "Gabby is so gracious. She realizes that looks are something you are born with. She's kept a level head about it."

"It's hard for us as a team to understand because we don't know what it's like in New York or Paris. We don't know what that life is like for her. We just know her as someone who comes to the gym every day in sweaty clothes and knee pads, wearing no makeup."

## A good release

Reece says playing volleyball has helped with her modeling not only because the sport keeps her in shape but also because it is an area of release.

"Volleyball is a good area for me to release my energy. If I've had a bad day at work, people touching my face and touching my hair all day, I go to the gym and work out."

Reece's honors extend past the volleyball court and magazine pages. In 1989 she was named the Most Inspirational Collegiate Athlete of the Year by Dodge and the March of Dimes Foundation. The award recognizes an athlete's dedication to her sport and other aspects of her

life.

"That award wasn't about being No. 1," Reece says. "It was more about recognizing that I am an example for other people."

While it may be easy for Reece to look ahead to life after college, right now her main concern is the Lady Seminole volleyball team.

"We are at the point now where we will have to make a decision. Do we want to go on from here, or are we going to settle for what's happened already this season?"

"My goal for the team is to get through the Metro tournament, win it and go to the second round of the NCAA tournament. I have never left here with the team saying, 'Could we have done better?' I don't want that to happen."

Reece's long-term plans include a career in broadcast journalism.

"But it's going to take years," she says. "I've got so much to learn."

For Reece the short-term includes another spring semester of fashion modeling.

"Right now, I have to get back to work."

After all, it is her job.

# WAC rescinds moratorium, but no expansion expected soon

The Western Athletic Conference Presidents' Council has voted to lift a moratorium on expansion, but league officials said October 11 that the move does not necessarily signal imminent expansion of the nine-team conference.

The action by the presidents' council came by mail vote and was a result of a recommendation made to it by the WAC's conference council after its July 1990 meeting. Further, a special committee chaired by Col. John J. Clune of the U.S. Air Force Academy and appointed by the conference council to study conference size and alignment reported its findings at the WAC's regular September meeting.

The report was endorsed and forwarded to a three-member pres-

idents' council committee formed in June 1990, which is chaired by University of Wyoming President Terry Roark. Other committee members are Rex E. Lee of Brigham Young University and Albert J. Simone of the University of Hawaii.

"Lifting the moratorium on expansion does not mean the expansion is imminent," said Diana S. Natalicio, president of the University of Texas, El Paso, and chair of the presidents' council. "It means an orderly process regarding the possibility of expansion has been mandated with a maximum of input and information required before any further steps are taken. The goal of the conference is to move in a studied, orderly and careful manner."

WAC Commissioner Joseph L.

Kearney said the league's expansion committee will gather further information and report its findings to the presidents' council.

"If it then is the desire of the conference to expand, the next step would be to develop a listing of qualifications for potential future members," said Kearney. "That would be followed by the identification of those potential future members that fit the qualifications, and then it would be determined who among the list of potential members would be interested in WAC membership."

The final step would be to appoint an on-site visitation team that would make recommendations to the presidents' council before the offering of any official invitation.

"The earliest a potential new member could be added would be for 1992-93," said Kearney, "but it would be more likely for 1993-94."

"Also, it may well be that the final

recommendation of the committee would be not to expand, and obviously the presidents have the option to reinstate the moratorium on expansion at any time."

## Duquesne will wrestle in Division I

Duquesne University will start an NCAA Division I wrestling team next year and has hired Gus DeAugustino, a former national high school coach of the year, as coach.

DeAugustino, 59, coached Pittsburgh's suburban North Allegheny High School for 34 years. North Allegheny won the past four Pennsylvania big-school state titles and was top-ranked nationally by Amateur Wrestling News twice in the past three seasons.

Duquesne now will have eight men's and seven women's Division I sports.

Brian Colleary, director of athletics, said Duquesne will apply for membership in the Eastern Wrestling League in the fall of 1992. The league, considered one of the most successful in Division I, will lose a member when Pennsylvania State University joins the Big Ten Conference.

# Cass Corcoran hopes 'like mother, like daughter' applies

Philadelphia College of Textiles and Science cross-country/track runner Catherine "Cass" Corcoran hopes she can be like her mother, Theresa Kniele.

When Kniele was Cass's age, she was a year away from having her first child. She was 33 when she gave birth to daughter Theresa, and 11 months later, Cass was born. There would be nine children in 10 years.

Then, in 1971, Robert Kniele, a fireman, died of cancer at the age of 45. With that, the life of Cass and the other Kniele children changed. When Cass graduated from high school, work took precedence over college, but she kept running.

Now, Corcoran, who will be 32 October 24, not only is a 3.400 interior-design student (4.000 scale) at Philadelphia Textile, but the junior is the best cross country/track runner for the Lady Rams and has been married for 3½ years.

"When I got out of high school, I said, 'Mom, I want to go to college,'" said Corcoran. "She said 'I need help,' so I went to work. I had no idea what to do. I thought about going to Catharine Gibbs Business School because 15 years ago, that was the thing to do. One year, I filled out eight W-2 forms. I was a clinician, an EKG technician, a recruiter for a CPA firm, a legal secretary and in retail merchandising. During high school, there was Dunkin' Donuts."

Corcoran knew, though, that a college education would help her, as did her husband, Peter. She attended St. Joseph's University (Pennsylvania) at night for four years but decided a business career was not for her. In 1988, she enrolled at Philadelphia Textile. "I had the full support of my husband," she said. "He said, 'You have to make something of yourself.'"

She was training for the biathlon and working out in the weight room

when Joe Ryan, the coach at that time, spotted her and asked if she ever thought about running for Textile.

"I said, 'I don't think you want a 30-year old on the team,'" related Corcoran. "Then, I found out Division II doesn't have an age cap. I excitedly went home and asked my husband. He told me, 'You can only be a better runner.'"

"He was a runner, and that's something we shared. He really motivates me. Sometimes when I feel like throwing in the towel, he encourages me. He gets satisfaction seeing me do what he didn't. I run for both of us."

Corcoran has surprised herself. Last year, she was the cross country team MVP with a best time of 19:20 on the 3.1-mile Lehigh University course. During track season, she set the school records in the 3,000 and 5,000 meters and was the first Philadelphia Textile woman to run in an

open event—the 10,000 meters—at the Penn Relays. She clocked 19:53 and finished second at the September 22 Haverford Invitational, and her goal is to break 19 minutes.

"I like running because I operate better in an individual sport," she said. "I know I'm up against myself. In basketball, if you miss, you can be letting the team or entire school down. Running has always been fun and social for me."

Corcoran is a kind of elder statesman for her teammates, since she is as much as 14 years older than some of them. Corcoran says they learn from each other.

"The camaraderie, being with them, gave me an opportunity to realize how cohesive a team is," she said. "Through them, I keep my youth. We share a lot of stories on our long runs. Sometimes it's hard for me to keep my philosophies to myself. I have hindsight. There's a

Cass Corcoran

real special chemistry on our team, and it's probably the most important part of my college experience."

And what does her mother think of her 31-year-old daughter's college escapades?

"She thinks I'm nuts and shakes her head," she said. "She's really proud and tells me to be careful. She came to a meet last year and got all upset when she saw me cross the finish line and my face was red."

## Women's administrators discuss effects of reform proposals

By Jeff Rogers  
Special to The NCAA News

Learn the issues, be prepared and take care of business.

It was obvious from the outset that this was the mission of more than 100 women collegiate athletics administrators as they gathered in Lexington, Kentucky, October 14-16, for the Council of Collegiate Women Athletic Administrators' annual fall forum.

With sweeping reforms expected at the 1991 NCAA Convention in January, the focus of the forum was on the effects that those reforms will have on female student-athlete. Four panel discussions thoroughly examined the possible impact on anticipated academic reforms, fiscal reforms, guidelines for student life and the issue of equity for women.

The first panel discussion dealt with the issue of academic reform. Elayne Donahue, academic adviser at the University of Minnesota, Twin Cities, felt that the university faculty should play a stronger role in the education of student-athletes. "The faculty should be allowed to take a more active role outside of the classroom," said Donahue. "They need to be involved in the formation of athletics policies."

Drawing on a recent report of university presidents, she stressed the urgency to educate student-athletes rather than using them for their entertainment value.

G. Ann Uhler, faculty athletics representative from Texas Woman's University, addressed the concept of accreditation for athletics depart-

ments. This was viewed as a step in the right direction since it makes the department accountable for its actions. Accreditation would be a means to judge how athletics departments are meeting the needs of their student-athletes, she said.

"The primary task is to integrate the student-athlete into the student body, but that becomes very difficult because of the time constraints

*Administrators of women's programs were called upon to help educate the public about the role of women in college athletics*

placed on student-athletes," added Donahue.

"Athletes need access to the same computer labs and tutoring sessions that other students enjoy. That often is not possible because by the time a student-athlete gets out of practice, these academic amenities are closed. This is where the athletics department and faculty should work together."

Just as important as the academic issue, those at the forum were told, is the issue of fiscal reform. As

college athletics becomes more a business venture than an extracurricular activity, there are concerns among many about where it will all lead.

Merrily Dean Baker, NCAA assistant executive director for administration, provided the group with an overview of proposed legislation that would place strict limitations on recruiting, travel and financial aid, all in an attempt to curb increased expenses of athletics departments.

Once again, the concept of accreditation was brought up. Many feel that requiring athletics departments to report their financial statements would put integrity back into budgeting and allocating funds within the department.

Other discussions centered distribution of revenues generated by NCAA television contracts. A complete itemization of the proposed billion-dollar television package was outlined, as well as opportunities for women's athletics to capitalize on the growing interest in college athletics.

One problem common to nearly every institution is that of integrating the student-athletes into the general student body, the forum was told.

With student-athletes spending nearly all of their time with the team, it is hard for them to get the feel of a normal college life.

Linda Bruno, assistant commissioner of the Big East Conference, made that point when she illustrated the daily routine of a typical student-athlete.

7 a.m.-8 a.m.—breakfast with

the team at training table; 8:15 a.m.-9:15 a.m.—first class; 9:30 a.m.-10:30 a.m.—second class; 10:45 a.m.-12:15 p.m.—individual instruction with coach; 12:30 p.m.-1:30 p.m.—lunch with team at training table; 1:45 p.m.-2:45 p.m.—third class; 3 p.m.-6 p.m.—team practice; 6:30 p.m.-7:30 p.m.—dinner with team at training table; 8 p.m.-9:30 p.m.—study hall and tutors with team.

It is easy to see how a student-athlete could feel alienated from his or her college peers, she said.

This session that proved to be the most controversial was a panel discussion on legislation that would limit practice time, training-table meals, team travel and the length of seasons.

Equity in women's athletics also

was discussed.

Women administrators were called upon to help educate the public about the role of women in college athletics. Emphasis was placed on how Title IX has affected women's athletics and what can be done about institutions that are not in compliance.

As these women from across the country discussed many and varied topics, there was a sense of urgency as if they were preparing themselves for battle—an urgency to be knowledgeable in every topic relevant to their cause that might arise in January.

*Rogers, a graduate of Western Kentucky University, is an intern in the sports information office at the University of Kentucky.*

## Calendar

Readers are invited to submit questions to this column. Please direct any inquiries to The NCAA News at the NCAA national office.

**Q** What are the terms of office for service on general NCAA committees?

**A** Unless otherwise specified in NCAA legislation, committee members are appointed or elected to three-year terms. A member's term of service begins on the September 1 following election or appointment. Members may be reappointed or reelected for one additional term. A former member may be appointed or elected to an additional term after three years have elapsed. An individual who has served three terms on a committee may not serve further on that committee.

## Equipment managers can be certified

As soon as next year, members of the Athletic Equipment Managers Association will have an opportunity to complete requirements for certification under a program that has been in development for two years.

Testing for certification will begin soon after completion of a manual for equipment managers that AEMA officials said probably will be completed in the near future.

After completing research that began eight years ago, AEMA selected Columbia Assessment Services to establish a certification program. Columbia Assessment Services is responsible for the certification program used by the National Athletic Trainers Association.

The program is being designed to

assure that managers who pass the certification program have shown high degrees of knowledge in areas that include purchasing; clothing and equipment fitting; maintenance; administration and organization; management, professional relations and education, and equipment accountability.

According to the AEMA, completion of continuing-education programs will be required for managers to maintain active certification.

In a report on the certification program that appeared in the September 1990 issue of College Athletic Management magazine, it was noted that certification "is not a form of unionization to force recognition by the athletics community. Rather, (it) is an attempt to improve the profession of athletics-equip-

ment management through education."

AEMA was formed in 1974, and in 1980 became a member of the National Operating Committee on Standards for Athletic Equipment (NOCSE). The association publishes a newsletter and holds an annual convention, during which educational workshops regularly are held.

Membership in AEMA is open to "anyone actively engaged in handling and/or purchasing athletics equipment." Dues are \$35 annually, \$5 annually for student members.

More information on the association and its pending certification program is available from AEMA at 723 Keil Court, Bowling Green, Ohio 43402 (telephone 419/352-1207).

# College golf suits this pro-tour prospect to a 'T'

By David D. Smale  
The NCAA News Staff

By winning the NCAA Division I individual golf title last spring and the U.S. Amateur crown in August, Arizona State University's Phil Mickelson became just the second collegiate golfer in history to complete that double. The first? Ohio State's Jack Nicklaus, in 1961.

If Mickelson, a junior southpaw, repeats his victory at the NCAA championships next spring, he will become the second golfer to win three straight NCAA individual golf championships, and he could be-

Phil Mickelson

come the first to win all three outright. Texas' Ben Crenshaw did it first (1971-73), but Crenshaw tied for the 1972 title with teammate Tom Kite.

Mickelson's accomplishments earned him the 1990 Fred Haskins Award as the nation's top collegiate golfer. Voting is done by collegiate golfers and members of the Golf Writers Association and the Golf Coaches Association of America.

Additionally, Mickelson was named as the winner of the Nicklaus Trophy as the top male collegiate golfer. The winner is selected by the Golf Coaches Association of America in a national poll.

"It wasn't my goal last year to win three straight NCAA titles," Mickelson said. "But it is this year,

because I want to win this year's championship, and that would be the third straight. Just winning the NCAAAs is big enough by itself."

And Mickelson is not even thinking about winning four in a row. "Ultimately, that would be nice. But right now, that is impossible," he said. "You can't win four in a row until you win three in a row."

Mickelson is not an imposing figure. At 6-2, 190 pounds, he will not stand out on the Tempe campus of Arizona State. He looks like any other college student—collar up, nicely tanned. But get him on a golf course, and he takes over.

Consider his charge for his second straight NCAA title. After posting a three-over-par 75 on the opening round, he shot three straight subpar rounds, capped by a 66 on the final day to claim a four-stroke victory. That round also helped the Sun Devils claim their first team championship, overcoming an 11-stroke deficit heading into the final round.

At the U.S. Amateur, he set a qualifying round record of nine-under-par 135, which included a quadruple bogey on the second day when he carded a 71.

"He's very goal oriented," said Tom Brill, assistant golf coach at Arizona State. "He's never one to lay up. His goal at Cherry Hill (site of the U.S. Amateur) was to drive the No. 1 green because Arnold Palmer did it in the 1960 U.S. Open. That hole is 346 yards." Mickelson didn't reach the green in any of his three tries from the front tee. In fact, he came closer from the back tee, 401 yards away. "I ended up in the creek a lot," he said. "I guess I didn't approach that hole very intelligently."

"He won't rest on his laurels," Brill continued. "He knew the most important match to date was the U.S. Amateur, because it would make him eligible for the U.S. Open,

Arizona State's Mickelson could win a third consecutive Division I individual golf crown next spring, a feat previously accomplished only by Jack Nicklaus

the British Open and the Masters. "He wants to win more college tournaments than anyone ever has. The more he wins, the more aware of history he is. He knew that Nick-

laus was the only one to win both of those tournaments, and he wanted to join him."

Yet Mickelson is not caught up in the glory. "I try not to get caught up

in it. I'm just having too much fun," Mickelson said.

"He's a very nice, humble young man," added Brill.

And Mickelson's goals are not limited to breaking par and sinking 40-foot birdie putts. He plans to get his degree and has vowed to remain an amateur until he graduates. "I believe that it is important to finish a commitment," he said. "Once I start something, I want to finish it. Business people like to see that."

"Also, I don't feel I'm ready for the PGA tour. I'm not ready for the grind. I enjoy golf too much right now to have to play for money. When they tell me I can't play here anymore, I'll probably turn pro."

Despite his status as one of the country's top amateur golfers, Mickelson's is more content talking about his rivalry with former high school teammate Manny Zerman of the University of Arizona.

Mickelson beat him in the finals of the U.S. Amateur. "His caddie and girlfriend is the best friend of Tana, my girlfriend," Mickelson said. "We have played a lot together. It seemed like any other day, and we were playing for a Coke. Since we are from San Diego, we didn't get caught up as much in the Arizona-Arizona State thing as most 'Devils and 'Cats. But that's always a factor."

For the rest of the Sun Devils and Wildcats, it was a big match. "That victory (in the U.S. Amateur) was a very important day for Arizona State," Brill said. "Kids want to be associated with Phil. They want to play on his team. He is a good role model for our team."

"He puts the team first. We had our first aerobics workout the day he arrived back in town. He was tired, but he was there. He is taking 18 hours and is determined to graduate on time. He leads by example."

"He never quits. And he never thinks he's out of a match."

And come to think of it, he rarely.

### Play-offs pare list

The I-AA play-offs might stop all three perfects—if history is a guide. In the 12-year history of the division, only nine teams finished the regular season undefeated and untied. Four lost in the play-offs, three did not make the play-offs, and only two—Eastern Kentucky in 1982 and Georgia Southern last year—won the I-AA championship.

### The Virginia story

It is a little bit unbelievable. The Virginia Cavaliers, once a football dormat, are scoring so many points so quickly, writes Malcolm Moran of the New York Times, that the Virginia band can't play the school song—the "Good Old Song"—fast enough.

The song, which borrows its tune from "Auld Lang Syne," inspired a Duke player to say after a 59-0 defeat, "I heard Auld Lang Syne so many times today, I felt like I aged a couple of decades."

Amazingly, the school that perfected the philosophy that no football defeat ever can be painful enough to ruin the party is talking about a possible national championship if their No. 1-ranked team can get by unbeaten Georgia Tech November 3, then finish the regular season with a perfect record.

This at a college that never appeared in a bowl game in its history until 1984—George Welsh's third

season as head coach.

"I certainly didn't come here to win a national championship," Welsh told Moran. "...It's never been part of my makeup to think I felt like I had to win a national championship to feel like I've accomplished something."

Yet, it was Welsh himself who first mentioned those magic words last November after his team finished the regular season 10-2. He was asked how the program could improve. Reporters were shocked when he replied: "Go unbeaten, be 11-0 and play for the national championship."

The chances of Welsh making such a statement would seem to be as likely as Thomas Jefferson being arrested for ticket scalping.

Now the Cavaliers are 7-0 and could be the Colorado of 1989 or the West Virginia of 1988. Both overcame disappointing pasts and played for the national championship for the first time after 11-0 regular seasons (and lost both to Notre Dame).

After his team's first victory in history over Clemson earlier this fall, Welsh noticed his players were disinterested the following Wednesday. By the end of the day, they knew exactly how angry Welsh was about that.

"The most important thing for this football team," Welsh told Moran, "is to get things done in practice. You can't say 'I'll catch up.' You can't say 'We'll get 'em next week.' You have to get it done that day in practice, then the next day.... If we

don't get it done that way, we're going to get beat."

Welsh doesn't think NCAA scholarship limits are the reason for Virginia's success: "Virginia just had to have a coach who was going to stay and to start improving facilities."

A \$3 million locker room and dining facility attached to Scott Stadium was completed in 1985. A \$10 million facility to house offices, conference rooms, a weight training and conditioning center, and equipment rooms is scheduled for completion next spring.

### Big year for ties

It probably comes as no surprise that this is a big season for ties in Division I-A football—the biggest, in fact, since 1963.

Two more ties October 20 brought the season total to 13—just two fewer than all last season.

In percentage terms, this fall's 3.32 percent (13 ties in 391 games) if maintained through the full regular season, would be the highest rate since 1963, when 4.13 percent of all games were ties.

The all-time record is 5.02 percent in 1956, or two years before two-point PATs came on the scene. Last year's full-season figure for 614 games was 2.44 percent. Here is this season's list:

<b>Teams</b>	
Akron vs. Central Mich.	14-14
Auburn vs. Tennessee	26-26
Bowling Green vs. Ohio	19-19
Colorado vs. Tennessee	31-31
Fresno St. vs. Utah St.	24-24
Indiana vs. Ohio St.	27-27

Iowa St. vs. Kansas	34-34
Louisville vs. San Jose St.	10-10
Memphis St. vs. Arkansas St.	24-24
Michigan St. vs. Syracuse	23-23
North Caro. vs. Ga. Tech.	13-13
Pittsburgh vs. Syracuse	20-20
Texas A&M vs. Baylor	20-20

### Quotes of the week

Louisville coach Howard Schnellenberger on Ray Buchanan's blocked punt that preserved his team's 19-17 victory over Memphis State: "He was on that kick like a chicken on a junebug." (Jeff Schneider, Louisville assistant SID)

Wofford punter Jud Heldreth is a perfect 3-3 in picking up first downs out of punt formation. Last year, he did it twice with a pair of 18-yard runs, and in a victory over Newberry October 13, he completed a 23-yard pass out of punt formation. After the game, head coach Mike Ayers said: "The big decision for most guys on our team is what to major in—physics, chemistry, mathematics, whatever. With Jud, it's whether to be Joe Montana or O.J. Simpson. He's got the freedom to try some things. The only stipulation is he'd better make it. Otherwise, he's got to answer to me." (Mark Cohen, Wofford SID)

### Womack nears Davis

Iona's Byron Womack got the fifth kickoff-return touchdown of his career with a 93-yarder vs. LIU-C.W. Post October 13. That tied the Division III record by Daryl Brown of Tufts (1974 to 1976) and puts him one away from the NCAA collegiate or all-divisions career record of six by Southern California's Anthony

Davis in 1972-74. (David Torromeo, Iona SID)

### Dillard sets two III records

Melvin Dillard, a senior defensive back at Ferrum, set two Division III records in punt-return yardage October 13. His 212 yards on six returns are a single-game record, breaking the 205 by Mike Schmitz of Monmouth (Illinois) vs. Olivet in 1978. His 649 punt-return yards in just six games so far this season break the full-season record of 599 by Matt Pekarske of Wisconsin-La Crosse in 1986. Already this fall, Dillard has three touchdowns on punt returns and one on an interception return. (Tom Rickard, Ferrum director of public relations)

### Love sets two III records

North Park senior John Love set Division III single-game records for passing yardage at 533 and total-offense yards at 596 October 13 in a 48-43 victory over Elmhurst. He passed for six touchdowns, the last one coming with 36 seconds left to snap his team's eight-game losing streak.

The former records were 527 total offense by Rob Shippy of Concordia (Illinois) vs. Concordia (Wisconsin) in 1985 and 532 passing by Knox's Bob Monroe vs. Cornell College in 1986.

A native of New Ulm, Minnesota, Love's older brothers, Scott and Todd, both excelled at North Park, on the field and in the classroom. Each made academic All-America. (Dennis Prikket, College Conference of Illinois and Wisconsin publicity director)

# West Virginia still seeking spot in all-sports conference

West Virginia University athletics director Ed Pastilong is tired of dancing the wallflower waltz.

West Virginia has been snubbed by the Atlantic Coast, Southeastern, Big East and Big Ten Conferences as they expanded.

The ACC, citing population, chose Florida State University over the Mountaineers; the Southeastern took the University of Arkansas, Fayetteville, and the University of South Carolina; the Big East added the University of Miami (Florida), and the Big Ten took Pennsylvania State University.

An official of the Big East Conference had only praise for West Virginia October 16 but skirted the issue of why Miami beat the Mountaineers out for a spot in the league. The commissioner of the Southeastern Conference also refused to comment.

"At this point, I would have liked to have closed the chapter on this conference situation and be seated in an all-sports conference," Pastilong told the Associated Press.

"I am concerned with our future and how this is going to come out with us, but I have confidence in this university and its athletics department that we will maintain stability," he said.

Ed Pastilong

West Virginia, an independent in football and an Atlantic 10 Conference member in basketball and most other sports, has heated up its search for a new conference alliance since traditional independent rival Penn State opted for the Big Ten.

"Penn State took itself out of the East and put itself in the Midwest," ACC Commissioner Eugene F. Corrigan said. "That was a big move."

"West Virginia has a lot to offer in the right situation. But we've made it clear we're not going to expand any further for the time being."

Florida State was an easy choice for the ACC because of the population base, Corrigan said.

"From every standpoint, being in

the state of Florida was significant for us," he said.

The Seminoles have strong sports programs, and the school is located in the third largest state. Florida is projected to have 20 million people by the year 2000, Corrigan said.

West Virginia has a population of 1.7 million. According to preliminary 1990 census figures, West Virginia lost more residents in the past 10 years than any other state.

Corrigan said the ACC was interested in a larger media market, adding that it currently has only four newspapers of 200,000 or more circulation in the region. Florida has seven newspapers with circulation over 200,000. West Virginia has none over 100,000.

Corrigan added that the Mountaineers do well in regional telecasts and have a good football program. He predicted West Virginia would seek a conference alignment in which it can continue to play traditional Eastern powers Pittsburgh, Syracuse and Boston College in football.

Those schools, all members of the Big East, are being mentioned for a new football league that also would include Miami (Florida); West Virginia; Rutgers University, New Brunswick; Temple University,

and Virginia Polytechnic Institute.

"We'll seriously consider it over missionary Michael Tranchese said. "I think there's a lot of interest" in the football alignment.

West Virginia football coach Don Nehlen said the idea sounds good.

"I'm hoping there's a move in the East to form a football alliance," he said. "The football coaches are in agreement, but as for the powers that be, I don't know."

Pastilong and university President Neil S. Bucklew, meanwhile, said they would prefer an all-sports conference affiliation but are seriously considering the football-only alignment with the Big East.

"My feeling from the beginning, and it's not changed, is the most advantageous thing would be for us to join a sound, stable all-sports conference with institutions of our type," Bucklew said.

West Virginia also hoped for invitations from the Big Ten and SEC, conferences that Bucklew said lead the way in academics and athletics.

"A family atmosphere, academics, and all-sports conference—this is what we would like," Pastilong said. "We may have to give serious consideration (to the fact) that we

may not be able to obtain that."

SEC commissioner Roy F. Kramer doesn't offer any promises.

The SEC expanded to 12 teams by adding Arkansas and South Carolina but plans no more additions any time soon, Kramer said.

Kramer declined to say why Arkansas and South Carolina beat out the Mountaineers for inclusion in the SEC.

Telephone messages to Big Ten Commissioner James E. Delany weren't immediately returned to the Associated Press.

Big Ten officials, however, have indicated no expansion plans beyond the addition of Penn State as its 11th member.

West Virginia's main options are joining the football-only Big East if invited or becoming an all-sports member of the Metropolitan Collegiate Athletic Conference, Pastilong said.

Under an earlier proposal for the Metro Conference, Miami (Florida), Florida State, Boston College, Syracuse University, Rutgers, Temple and West Virginia would have joined an expanded all-sports Metro. That proposal is all but scrapped, with Florida State and Miami (Florida) having signed on elsewhere.

## The Market

Readers of The NCAA News are invited to use The Market to locate candidates for positions open at their institutions, to advertise open dates in their playing schedules or for other appropriate purposes.

Rates are 55 cents per word for general classified advertising (agate type) and \$27 per column inch for display classified advertising. Orders and copy are due by noon five days prior to the date of publication for general classified space and by noon seven days prior to the date of publication for display classified advertising. Orders and copy will be accepted by mail, fax or telephone.

For more information or to place an ad, call Susan Boyts at 913/339-1906 or write NCAA Publishing, 6201 College Boulevard, Overland Park, Kansas 66211-2422, Attention: The Market.

### Positions Available

#### Commissioner

**Commissioners, Trans America Athletic Conference.** Confidential Search. The Trans America Athletic Conference invites applications for the position of commissioner. The commissioner is the chief executive officer of the conference. The conference office is located in Athens, Georgia. The TAAC membership includes Arkansas/Little Rock, Centenary, Florida International, Georgia Southern, Georgia State, Mercer, Samford, Stetson, and Texas, San Antonio. Candidates must possess a baccalaureate degree, understand and appreciate the academic missions of conference members, be current with NCAA rules, compliance services, and conference administration within the NCAA structure. Preferred candidates will have successful experiences in aggressive promotional activities related to basketball and will be experienced group leaders. Salary is commensurate with experience and qualifications. Application deadline is November 15, 1990. Applications and nominations should be sent to: Dr. David B. Wagner, Athletic Director, Georgia Southern University, Box 8115, Statesboro, GA 30460.

**Associate Commissioners, Compliance/Director of Championships, Northeast Conference.** The Northeast Conference is a Division I conference whose members are Fairleigh Dickinson University, Long Island University, Monmouth College, Monmouth College, Mount St. Mary's College, Robert Morris College, St. Francis College of New York, St. Francis College of Pennsylvania, and Wagner College. The Conference sponsors championships in eight men's and six women's sports. Responsibilities: The Associate Commissioner shall serve as the conference compliance officer. The person shall serve as the contact person for conference membership and liaison with the NCAA. The person's other primary duty will be as Director of the conference's 14 championships. Qualifications: Applicants should possess a minimum of three years of college administration experience and a thorough understanding of the NCAA Manual. A bachelor's degree is required, master's preferred. Salary: Commensurate with experience. Application: Please send letter of application, resume and three references. Review of applications will begin October 29. The position will remain open until a qualified candidate is found. Please send applications to: Chris Monasch, Commissioner, Northeast Conference, 900 Route 9, Woodbridge, NJ 07095.

#### Academic Adviser

Academic Advisor—University of Illinois at

### Athletics Trainer

**Assistant Athletic Trainer.** University of Wyoming. Full time, 10-month appointment, faculty non-tenure track in athletics. Dates of Appointment: August 1-May 31. Qualifications: Bachelor's Degree required. Master's Degree preferred. Certification by the NATA required. Combined R.P.T.—A.T.C. desirable. ## HOBART COLLEGE HEAD COACH OF FOOTBALL

### Description of Position:

Responsible for organizing and coordinating the football program at Hobart College. Duties include organization and management of a competitive Division III Football Program. Teaching physical education and coaching responsibilities in a second sport will be assigned by the Director of Athletics.

### Qualifications:

Advanced degree preferred. Proven abilities in the organizational and instructional aspects of coaching. Demonstrated effectiveness in the recruitment of student-athletes. Ability to work effectively with college students. A desire to work within the framework of the policies and requirements of the College, the conferences and the NCAA.

### Salary:

Commensurate with experience and qualifications. Full time, 10-month position with benefits.

### General Information:

Located in the Finger Lakes Region of New York State (midway between Rochester and Syracuse), Hobart College has a rich football and athletics tradition, excellent athletics facilities for its 12-sport program and a commitment to excellence in academics and in athletics.

### Appointment Date:

November 23, 1990, or as soon thereafter as possible.

### Application Procedure:

Screening of applicants will begin immediately. Send letter of application and resume to include the names, addresses and phone numbers of three (3) references to (do not send letters of reference):

Michael J. Hanna  
Director of Athletics  
Hobart College  
Geneva, NY 14456

Hobart and William Smith Colleges are Equal Opportunity and Affirmative Action Employers.

Hobart College competes in Division III of the NCAA, the ECAC and the Independent College Athletic Conference.

## WINTHROP COLLEGE Head Baseball Coach

Winthrop College invites applicants for the position of baseball coach. This is a full-time, 12-month appointment. Winthrop is an NCAA Division I member and competes as a member of the Big South Conference. The head coaching responsibilities include, but are not limited to, budget management, recruiting, effective on-field teaching and coaching, scheduling, contest management, monitoring of student-athlete development both athletically and academically, and public relations.

Coaches are responsible for adhering to the policies, procedures, and regulations of Winthrop College, the Big South Conference, and the NCAA. Qualifications include a bachelor's degree with a master's degree preferred; two years of successful baseball coaching experience with college coaching experience preferred. Credentials should reflect proven success and potential in coaching, recruiting, and working with student-athletes. Salary is dependent upon experience and qualifications. Position is available June 1, 1991. Application deadline is December 17, 1990. Application materials received after the deadline may be considered if an acceptable candidate has not been found. To apply, send letter of application, resume, supporting materials, addresses and phone numbers of three professional references to: Mr. Thomas Hickman, Associate Athletic Director, Winthrop Coliseum, Winthrop College, Rock Hill, SC 29733.

Winthrop College is an Equal Opportunity Institution and an Affirmative Action Employer. The College is governed by civil rights laws, including Title IX of the Education Amendments of 1972 and Section 504 of the Rehabilitation Act of 1973, as amended.

Nominations and applications are invited for the position of Commissioner of the Southland Conference, located in the Dallas, Texas, area.

**RESPONSIBILITIES:** The Commissioner is the chief administrative officer of the conference, composed of ten NCAA Division I universities located in Texas and Louisiana.

**QUALIFICATIONS:** Applicants should have proven ability to manage institutional athletic programs in either a university or conference setting; knowledge of and commitment to compliance with NCAA regulations; experience in fiscal management, personnel management and strategic planning; demonstrated experience and skill in the area of promotions; and excellent written and oral communication skills. A baccalaureate degree is required.

**COMPENSATION:** Salary will be commensurate with experience and qualifications.

The Search Committee will begin to review applications on November 5, 1990.

Nominations or applications containing current resumes should be sent to:

Dr. Michael Abbott  
Southland Conference President  
Commissioner Search  
200 J.C. Kellam  
San Marcos, TX 78666

An Affirmative Action/Equal Opportunity Employer

# As participation increases, NYSP adds projects

Data reviewed recently by the Association's National Youth Sports Program Committee indicates that the number of NYSP participants continues to increase and could do so dramatically next year with the possible addition of new projects.

During the summer of 1990, 57,595 youths participated in 139 NYSP projects, up from 55,851 participants during the summer of 1989. In addition, the extended NYSP, which is conducted from October 1 to April 30, had 9,937 participants, bringing the total number of participants for both programs to more than 67,000. More than 90 percent of the participants in each program meet Federal poverty guidelines.

For 1991, 15 new summer projects have been approved contingent upon Federal appropriations for next year.

Free medical examinations and referrals, if necessary, are part of the program, and the number of individuals that receive this service exceeds the number of participants. Last summer, 59,060 medical examinations were performed and 10,598 were given in conjunction with the extended program.

The NYSP Committee, which met October 12-14 in Kansas City, Missouri, also reviewed evaluations from 134 summer projects. Three projects were cited as outstanding, having met all Federal guidelines and reporting deadlines and offered programming beyond requirements.

Another 28 projects received special recognition, and an additional 66 projects were found to be in compliance with all guidelines. Three projects were recognized as most improved, and six new projects were cited for their quality.

The number of projects that failed to meet all guidelines continues to decline. Only 33 projects fell in that category this year, down from 38. The on-site technical assistance program provided by the national office has contributed to this decline and to the success of the first-year projects.

The committee reviewed an evaluation of the extended program by EMT Associates. The program was found to have some of the key elements of a preventative program, including a staff that is sensitive to the needs of the participants; sustained and generational contact (participants can attend for a number of years and siblings often attend); a good reputation in the community, which opens the door to other programs for the participants, and acceptance by the target community because of direct services that are provided.

Mary Ann Mackenzie, liaison to the committee from the Office of Community Services, said that the success of the NYSP as a preventative program is related to the strong mentoring program and trust factor.

"The program is not just providing information. It is providing a model for a positive way of living," Mackenzie said.

The committee reviewed areas of concern, including the time frame in which paperwork is filed with the national office; salary caps for project personnel, which have been in place since 1985; drug-education development; age-appropriate programming for older participants; the effect of changes in Red Cross certification on the aquatics program; the U.S. Department of Agriculture application that must be filed by participants, and the time frame for dissemination of printed materials.

Mirian Hinds of Dingman's Ferry, Pennsylvania, was recognized

**NYSP participants at Temple University enjoy a relay race while others look over a list of activities provided by the project. During the past summer, more than 57,000 youths participated in 139 NYSP projects conducted by the NCAA.**

for her contributions to NYSP during a 20-year association with the program.

Drug-education specialists and activity directors from all extended projects will attend a workshop January 18, 19 and 20 in New Orleans.
